Power supply to Hindupur

Continuation Sheet. File No. Current No. of Page.

D 519

PWD)

Letter No. 8174 dated the 27th September 1945 from the Chief Electrical Engineer.

Requests orders of Govt. if he may inform the Chief Engineer for Electricity Govt. of Madras, that power supply to the extent of 500 K.W. could be made available at the State Border for distribution at Hindupur at rates to be mutually agreed upon.

The C.R.B. has taken advantage of the letter from the Govt. of Madras, to supply power to Bagepalli and Pavagada while supplying power to Hindupur. The right of way to run the line in the Madras territory is to be acquired from the Govt. of Madras.

2. The estimated cost of the entire scheme is Rs. 18/- lakhs and a revenue of Rs. 1,80,000 per annum is anticipated. By supplying power to Hindupur, the capital cost for supplying power to Bagepalli is reduced and the guarantee is also reduced. The C.R.B. states that without electrifying Hindupur, Bagepalli can never be supplied with power, as by itself it can never give the required guarantee. In 1939 power supply to Hindupur was estimated to cost Rs. 1,04,400/-

3. Submitted for orders.

4. C.E.E reports that enquiry for a block of power of 500 K.W. for Hindupur from our state border was received orally from Sir Henry Howard when he was last here. The C.E.E thinks that power could be supplied most economically by extending the Doddabalapur 33 K.V. lines to Paragada, thr. Gorribidnur & the 5 miles of narrow neck of the Madras territory to the ~~nearest~~ state border point nearest to Hindupur. This will have the advantage of ~~a~~ getting power for ~~also~~ Bagepalli & Paragada, which otherwise had no chance on such an economical basis. The cost of the scheme will be approximately 18 lakhs with details given in his letter, ~~&~~ out of which a capital of 5 lakhs could be allocated to the Hindupur 500 K.W. supply. The return anticipated for the scheme is Rs 1-80 lakh per year on a capital outlay of 18 lakhs i.e. about 10% which is remunerative. The letter from the C.E.E Madras shows that ~~he~~ is Madras is agreeable to give Mysore the permanent right to cross the Madras neck of territory of 5 miles ~~nearest~~ ~~Gorribidnur~~ if power supply is given to Hindupur. The Madras Govt want this power to be given as soon as possible. Sanction may therefore be given to ~~(i)~~ the agreement to supply 500 K.W. to Madras by June 1947, at suitable rates to be mutually agreed upon, provided Madras agree to the permanent running of a power line, ~~through~~ from Gorribidnur to Paragada, through the Madras neck of territory & that Madras may make a reference to this Govt if they are agreeable.

"EXTRACT"

Veeraraghavan
Chief Secretary to Government.

Final Note by the Minister for Public Works.

Subject.— Supply of electric power to the Government of Madras for utilisation at Hindupur.

The Chief Electrical Engineer has reported that the Government of Madras are keen on obtaining power supply from the Mysore State for distribution in Hindupur and surrounding areas. The power supply to the Government of Madras for electrification of Hindupur incidental reduces the capital cost and also "the guarantee" considerably for the electrification of Pavagada and Bagepally which otherwise would be very costly. The entire cost of the scheme for extending power supply to the Madras Presidency is estimated to cost Rs. 18 lakhs and a revenue of Rs. 1,80,000/- per annum, is anticipated on the capital investment. The Government of Madras appear to be agreeable to give this Government the permanent right to cross the Madras territory from Goribidnur to Pavagada, if power supply is made available to Hindupur. The Chief Electrical Engineer has, in view of these advantages, requested orders of Government if he may inform the Chief Engineer for Electricity, Government of Madras, that power supply to the extent of 500 K.W. could be made available at the State border for distribution at Hindupur, at rates to be mutually agreed upon.

This question was considered at the Meeting of the Council held on 4th October 1945 when it was decided to authorise the Chief Electrical Engineer to negotiate in the matter further, on the lines suggested by him. I solicit the gracious sanction of His Highness to the decision of the Council.

L. Siddappa

Supply of power to Hindupur - Draft Agreement.

File No. 297 of 194 5

General and Revenue Secretariat

Serial No. 11 331.

No EDS 417/Elect 298-45-30

Dated 28th July 1949.

The Chief Electrical Engineer

Forwards a copy of letter No. 643 E/S/46-38 and its enclosures & requests to offer his views regarding the supply of Power to Hindupur - Draft Agreement - early.

Ins A

Letter No. P.555 4380 dated the [illegible] Chief Electrical Engineer [illegible] architect.

181) Clause 2:- No further action is necessary. The correction in line 7 is accepted.

Clause 3 (ii):- The correction suggested is accepted.

Clause 10 (a):- As the Govt. of Madras have levied surcharge on their high tension consumers subsequent to the negotiations for power supply to ~~Hdp~~ Hindupur, the GRO is of the opinion that the levy of the surcharge by the Govt. of Mysore is in order and may be allowed to stand.

Clause 15:- The GRO is also of the opinion that the period

Serial No.

of 60 years mentioned in the clause is necessary, as the Govt. of Madras have in clause 19 of the agreement given permission the line through the Madras territory for a period of 60 years. The permission to run the vehicles of the Rlwl. Dept. in the Madras territory free of taxes is also considered necessary.

182) The Govt. of Madras may perhaps be informed as above. Submitted for orders.

186) Forwarded with compliments ~~to the~~ Ahmad-Rural of form & scrutiny

for Sy. to Govt. Ind. Dept.

187) Retransmitted with compliments.

Clause 10 (a):- The surcharge of 10% charged by the Madras Government on their high tension consumers may

No. 17 18-8-49

No. 19 22-8-49

Note.—Contn. Sheet

may be no doubt an argument for negotiating for higher charges to be paid by that Government to the Mysore Government (as evidencing extra cost of maintainance of the installations) but cannot be a ground for inserting a clause like 10(a) in the agreement without the concurrence first obtained of the Madras Government.

188) Re. Cl. 15:- Omission of the words "for a period of 60 years at the outset". I agree with the Chief Electrical Engineer that there must be a clause exempting Mysore Government vehicles used for purposes of installation and maintainance of the Power lines in Madras territory from the operation of the Madras Motor Vehicles Act. Such a provision has been accepted in other similar agreements, e.g., Kollegal Electric Supply agreement dated 6-8-1947 and now to be renewed. Probably, the Madras Government do not like the reference to the period of 60 years and want the words "for a period of 60 years at the outset" to be omitted. I think it will not detract from the efficacy of cl. 15 even if these words (brackettes in pencil) are omitted and the rest of the cl. No. 15 is allowed to stand. While forwarding the final draft or agreement for signature the Govt. may mention that the exemption is absolutely necessary so long as our power lines and installations are allowed to continue in the Madras Territory.

189) This document may also provide (as in the case of the Kollegal agreement) for the formality of approval and confirmation by the Governor-General and the seal of the Government of India - Ministry of States.

309) The amendment suggested by the State of Madras appears acceptable but might result in a small complication. -- I gather

NOTE—Contn. Sheet

Serial No.

I gather from a letter addressed by the Chief Electrical Engineer to our Government on Dec. 12, 1950, that clause 10-A of the draft was intended to provide for the payment of tax on the consumption of electricity imposed by the Mysore Electricity (Taxation on Consumption) Act, 1950, which although similar to the surcharge levied by the State of Madras could not for a 'technical reason' be regarded in Mysore as a surcharge. A surcharge means an overcharge beyond what is just and due, and of the same nature as the one to which it is an additional levy. In that view of the matter the 'Explanation' suggested by the State of Madras which defines surcharge as 'any charge or percentage increase', while stating nothing beyond the ordinarily accepted connotation of the expression, might absolve the State of Madras from payment of not only the aforementioned tax on the consumption of electricity, but of all taxes which might be imposed by our State hereafter in that regard. This is a matter which has to be considered before the amendment is accepted.

SECRETARY, LAW DEPT. 1783 19 MAY 1951 GOVT. OF MYSORE

Advocate-General.

H/18.5.51.

310) I think that cl 10 A as well as cl 15 must make it clear that the State of Madras has to pay the tax on consumption under the Mysore Electricity (Taxation on Consumption) Act 1950, even if Madras calls it a surcharge & Mysore calls it a tax. If the amendment proposed by Madras, gives rise for any doubt on this point, it cannot be accepted —

Power-Supply to Hindupur.

Serial No.

The opinion of the Advocate Gen' indicates that the amendment proposed by Madras does create doubts on this point. He may therefore kindly ~~advise~~ advise if we have to ~~press~~ reject the amendment proposed and ask for acceptance of the Draft already sent or suggest any further modifications. If he advises the latter course, he may kindly suggest the modification to be proposed. The file may therefore be again sent to the Advocate Gen' for this purpose.

312) (1) In view of the difficulty envisaged by me, I would suggest that clauses 10-A and 15 of the draft might be amended as hereunder, if it is not intended to make the State of Madras liable for the payment of any taxes which might be imposed hereafter:

(a)

No. 20.37
57-52
dt 23-5-57

LAW DEPARTMENT
1917
23 MAY 1951

NOTE—Contn. Sheet

Serial No.

(a) Clause 10-A may be re-written as follows:-

"The Consumer shall also pay to the Supplier all the taxes specified in and imposed by The Mysore Electricity (Taxation on Consumption) Act, 1950, i.e., Act XX of 1950. Such tax shall be added to and form part of the tariffs specified in clause 10 of this agreement. Should the supplier decide at a future date to levy a general surcharge on consumption of energy on high tension bulk supplies of electricity made by him in the Mysore Territory, such general surcharge shall also be applicable to the tarrifs specified in clause 10 at the same rate and for the same duration, and the consumer shall also pay the said surcharge to the supplier".

"EXPLANATION:/ In this clause, the expression "Surcharge" means any charge or percentage increase, whether called a surcharge or tax, which may be levied by the Supplier over and above the rates charged by the supplier in respect of high tension bulk supplies given by the supplier in the Mysore territory".

(b) Clause 15:

In this clause, after the words 'no tax', the words "or surcharge" have to be added in line one of this clause.

313) (2) If, however, the intention is that the State of Madras should be liable to pay all future taxes also, or if the State of Madras does not agree to the above, then, clauses 10-A and 15 of the draft sent by our State do not admit of any amendment and have to be accepted by the State of Madras.

Letter No. 58481 dated the 21st March 1953 from the Chief Electrical Engineer.

Requests that the Govt. of Madras may be informed of the enhancement of the rate, as has been done in the case of the South Kanara Agreement.

378) The Govt. of Madras have already been informed of the enhancement of the rate in the rate structure. The same will be done in this file also.

379) But a doubt arises as to whether the Govt. of Madras will agree to the increase in the rate now, when the power has been arranged to Hindupur in anticipation of the completion of the agreement.

380) When power is supplied at certain agreed rates pending finalisation of the agreement it is rather doubtful if the rate can be raised now, merely because the agreement has not been finalised.

381) It is not desirable. But the Law Secy may however be consulted as to the feasibility of proceeding at the stage

386) Clause 10 A of the draft agreement entitles the State to recover from the Consumers the cost of energy supplied at the enhanced rates. But since it is stated that the agreement has not been yet executed it would be desirable to address the State of Madras for the substitution of the enhanced rates for those mentioned in the draft agreement before its execution. This has to be done forthwith for the necessary action accordingly.

1/6 2/6/53

388) Though we agreed to supply power to Hindupur upto a quantity of 700 KW some years ago, and though power supply was actually commenced about the middle of 1950 in anticipation of the agreement with Madras being executed, the question of executing the agreement is still under correspondence. We have told Madras that the draft sent by us must be treated as final. In the meantime, the CEE has raised the point about the general enhancement in basic rates in the case of H.T. consumers and suggested that as proposed in the case of the draft agreement relating to Sonti Kanara, an enhancement of 0-1 anna per K.W.H. upto provided for in the draft in this case also and Madras asked to agree to the enhancement. The Advocate General is of opinion that Clause 10 A in the draft entitles the supplier to recover enhanced rates and that as the agreement has not yet been executed, we may write to Madras telling them to agree about the enhanced rate.

389) It would be pertinent in this connection to recall what happened in the case of the Sonti Kanara

NOTE—Contn. Sheet

Power supply to Hindupur — Special appeal

File No. Ena 298 of 1954-5 | General and Revenue Secretariat

Serial No. 5746 (86)

draft agreement when enhanced rates were claimed, Madras said that negotiations were going on at along on the basis of the original basic rate, that they had agreed even to surcharge clause and that any enhancement now would not amount to a change in the basis for negotiations but would work out uneconomical to them. We finally agreed to that case to a 22% increase over the basic rates.

39) In this case, no same contention is put forward by Madras. In fact, ~~the~~ negotiations were completed in the ignorance and rates practically agreed on. Power supply has also been begun. Madras may therefore think that they have greater claim to appeal of increase in the rate in this case. Nevertheless, in view of the increase in the working expenses of the Electrical Department, we will have to insist on the acceptance of enhanced rates. These must be payable at least from the date a corresponding enhancement was given effect to in Mysore, ~~and~~ and will be in addition of half the surcharge that may be ~~asked~~ in force from time to time. We are writing a circular letter to Madras proposing the revision of the rate structure, as in case they have any reasonable argument to present, we may consider the question in the light of what we agreed to about South Kanara.

Serial No.

in respect of Sandur Agn

been accepted by the Govt. of Madras in the form suggested by this Govt. There should be practically no difficulty for the Govt. of Madras to sign the agreement for Hindupur power supply.

397) One other important factor in the case of Hindupur is, that power has been supplied in anticipation of their approval to the agreement and this has been done sometime and till today the Govt. of Madras have not at all completed the agreement. They have also been apprised of the increase in the tariff for all the High Tension consumers. They have not at all communicated further in the matter.

398) It will be highly objectionable to continue supply of power without a proper agreement. In view of these it seems very desirable to address the Govt. of Madras now to complete this agreement without any further delay.

12/31/8 It is over two months since the letter

NOTE—Contn. Sheet.

Serial No.

and Transport Department, Government ... 1916

Requests to amend clauses 10-A and 15 of the agreement to be on a par with those clauses in the agreement for power supply to South-Kanara.

(404) While modifying clauses 10-A and 15 of the draft agreement to be entered into, the Govt. of Andhra have not correctly put the second ~~clause~~ sentence of 10-A which should be "If the supplier should, at a future date, levy a further surcharge or tax ... and not as put in by them. CF 187 CF 189 CF P. 183-192

(405) In clause 15 also the ~~words~~ "what is" ~~are not necessary~~ wording is allright. For the words "Madras" occurring in the agreement, the Govt. of Andhra desire the substitution of the word "Andhra". CF Para 189

(406) As regards the increase in the tariffs, the Govt. of Andhra contend that the power supply has been arranged in anticipation of the conclusion of the agreement, that the agreement could have been concluded ~~but~~ for the wording of the surcharge clauses, and that

864 / 4310 Revenue

Serial No.

the enhancement in the tariffs may apply only to future supplies and that it is not reasonable to reopen at this stage this question. As regards this question, the Advocate General has contended in para 386 of notes that as the agreement has not been yet executed, the Govt of Madras might be addressed for the substitution of the enhanced rates for those mentioned in the draft. and the Law Secretary has also agreed with this view. It was only after this that the Govt. of Madras were addressed. In view of this, the contention of the Govt. of Andhra is for perusal & orders.

407) Submitted for perusal and orders.

425) Secy (Ele)

N O T E

Subject: Electricity - Supply of power to Hindupur - Draft Agreement.

- - -

426) At the request of the Government of Madras the Government of Mysore agreed in the year 1947 to supply power to the extent of 700 K.W. for the purpose of distribution in Hindupur Area, ~~of~~ then in the State of Madras. A draft of an agreement incoporating the several clauses ~~of~~ were forwarded to the Government of Madras for their acceptance.

Pages 85 - 95 C.F.

427) The Government of Madras forwarded with their letter the 17th August 1948 a draft of an agreement incorporating their views on clauses 2,13(a) and 14 of the Draft agreement ~~and also forwarded a draft of an agreement~~. With letter dated the 25th April 1949 a revised draft of an agreement was forwarded by this Government to the Government of Madras for their acceptance. They were also requested in this letter that the right of way for running the transmission line to Pavagada through the Madras territory as provided for in clause 19 of the Agreement ~~may~~ might be accorded, pending the formal acceptance and completion of the agreement.

" 103 "

" 104-102 "

" 134-143 "

428) The Government of Madras in their letter dated 25th June 1949 again offered their views on clauses 2,3(~~2x~~ ii), 10(a) and 15 of the Draft Agreement. They also stated that they had no objection to the Government of Mysore running the Transmission Line ~~through~~ to Pavagada through Madras territory. The then Minister for Public Works, Government of Madras Sri M.Bhaktavatsalam, wrote to the then Minister for Law and Labour, Government of Mysore, on the 25th June 1949 that the draft of the agreement

" 145-146 "

149-150

forwarded by them might be accepted and that the question of the surcharge should not apply to the supplies to be given by the Government of Mysore for Ceded Districts and Hindupur.

Pages 149-150 C.F.

" 157-158 "

429) The Chief Electrical Engineer who was consulted in the matter offered his views on the suggestions made by the Government of Madras in their letter dated the 25th June 1949. The Government of Madras were thereafter addressed on the 28th September 1949 commenting on clauses 2,3(ii), 10(a) and 15. They were also requested to forward five copies of the draft agreement for acceptance and signature.

" 163 "

" 167-168 "

430) The Government of Madras on the 27th December 1949 stated that the surcharge which they were levying on consumers in their Province was purely a measure of general taxation and had no bearing on the administration of the Electricity Department, that this surcharge would be varied from year to year according to the deficits in the Provincial finance and that the Electricity Department had little voice in fixing its quantum. They added that clause 10(a) of the Revised Draft would imply that the proceeds of this measure of taxation from the area served by the Hindupur Scheme should be passed on to the Government of Mysore which by implication they could not accept. They have also in their letter dated the 18th April 1950 stated that the generating sets at the Municipal Power House Hindupur were giving trouble, that the supply in the area had already been rationed, that all arrangement necessary at the Hindupur end for taking supply of power in bulk from Mysore had almost been completed by them, and that in the interest of power supply

" 176 "

to the area, power may be arranged pending completion of the agreement.

Pages 178-187 C.F.

431) The Government of Madras have with their letter dated the 2nd June 1950 forwarded a revised draft of an agreement for the supply of electric power to Hindupur. They stated in this letter that clause 10(a) of the modified draft has been based on the decisions reached at the conference held at Bangalore on the 17th May 1950 between the representatives of Madras and Mysore Governments and that some further modifications necessary with reference to Article 299(1) of the Constitution of India have also been made in the draft. Pending finalisation of the agreement, power was supplied with effect from the 30th June 1950.

" 192-202 "

432) A revised draft of an agreement was thereafter forwarded to the Government of Madras with this Government's letter dated 22nd July 1950. The Government of Madras offered their views on this draft agreement in their letter dated 11th November 1950. The Government of Madras were informed on the 19th Jan. 1951 that during the discussions with their Representatives it was agreed by this Government not to charge ordinary taxes by either Governments, that the Representatives of the Government of Madras agreed that surcharge, if any, levied on High Tension consumers in the State might be levied for the bulk supply to be made available for Hindupur and that a tax on consumption had been levied on the consumers in the State and that this was identical with the surcharge that was being levied by the Government of Madras on their power consumers.

" 203 "

" 201-/2 "

" 203 "

433) The Government of Madras have in their letter dated the 28th March 1951 desired the addition of an explanation to the word "tax" occurring in clause 10(a) of the agreement. The Government of Madras

Page 228 C.F

were informed on the 15th June 1951 that on due consideration it was found that clause 10(a) and 15 as drafted by this Government were quite suitable and might therefore remain as such and that the amendments proposed by the Government of Madras was not acceptable. The Government of Madras requested on the 3rd September 1951 that the matter might be re-considered and that amendments proposed by them to clauses 10(a) and 15 might be accepted. The Government of Madras were definitely informed on the 26th September 1951 that the amendments suggeste by them were not acceptable to this Government and that the draft already forwarded to them was fair and final. They were again informed on the 26th June 1952 that the question was considered by the Government in all its aspects and that this Governme were of the view that the draft agreement already forwarded might be considered suitable. On the 29th June 1953 the Government of Madras were reminde that the question of the execution of the agreement was still pending and they were informed that in view of the recent enormous increase in the working expenses of the Department it had been found very necessary to propose an enhancement of the rates in the same manner in which increases in rates for all High Tension consumers in the State had been effected and that the increase in the rate was to the extent of 0.1 of an anna per unit with effect from the 23rd March 1953 and that the same enhancemen would have to be made applicable to the power supplied to Hindupur also.

" 232 "

" 235 "

434) The Government of Andhra under whom Hindupur came, have in their letter dated 15th December 1953 proposed certain additions to clauses 10(a) and 15 of the draft agreement

" 236-237 C.F.

and requested that the word "Andhra" might be substituted for the expression "Madras". They also stated that the supply of power was being availed of on the prior clear understanding of the Tariff applicable for such supply, that the draft could have been executed long ago, but for a small difference of opinion in regard to the wording of surcharge clauses in the draft and that if the agreement had been concluded, the question of enhancement of tariff would not have arisen. The Government of Andhra considered that any increase in rates might apply to fresh and future supplies and that it was not reasonable to re-open at this stage the question of the enhancement of the Tariff applicable in respect of the existing supply.

Page 248 C.F.

435) It is now ascertained from the Chief Electrical Engineer that bills for power supply to Hindupur are being paid at the rate of .45 of an anna per unit as per clause 10 of the agreement, as the consumption is below 1,00,000 units, along with maximum demand charges at Rs.3/- per K.W. and 10% surcharge.

436) In view of the fact that power supply has been arranged to the Government of Madras in anticipation of their completing the agreement for power supply to Hindupur, it is a matter for consideration and orders whether the suggestions of the present Government of Andhra made in their letter dated the 15th December 1953 might be considered, as an agreement entered into with the Government of Madras in the month of August 1953 for power supply to South Kanara has incorporated the clauses 10

Serial No.

and 11 relating to the Tariff and Surcharge.

27/2/2 2874

432) 16

8/3

438) Negotiations for the supply of 700 K.W. of power to Hindupur started some nine years ago and we agreed in 1947 to supply that quantity of power at rates ranging from 0.3 to 0.45 anna per unit. The matter has been under correspondence all a long and pending the finalisation of the draft agreement with Madras, we began supplying power from 30-6-1950. Payment for this is being made since then at the rate originally agreed to.

439) In pursuance of certain increases subsequently made in the basic rates for High Tension Supply in Mysore State, and as the agreement with Madras had not been finalised, we informed the Government of Madras in June 1953 that the rates would have to be raised by 0.1 anna. In the letter now received from the Government of Andhra on the subject, this increase has not been agreed to on the ground that the original rates had already been agreed upon between the two Governments and that all that was necessary was the formal execution of a document. The other conditions stipulated by this Govemment have all been agreed to. It is only the question of rate that has now to be decided.

440) It is true we agreed to certain rates as late as in 1950, and commenced supply during that year pending the execution of the agreement. The duration of the

NOTE—Contn. Sheet.

of the agreement being ten years from the date of supply, it may also be said, as has been said, that we have no right to claim higher rates than were originally agreed upon, before the expiry of that period. It is nevertheless a fact that no document which legally binds the Mysore Government has come into existence and also that an increase in the rate of supply has in the meantime become very necessary owing to increase in the cost of generation and distribution. Recently the Government of Madras, agreed, in somewhat similar circumstances, to a flat increase of 22% over the originally agreed rates in respect of power supply to South Kanara. The Government of Andhra have not been very helpful to us in most of the matters of common interest between them and Mysore State. The transmission lines from Hospet to Bellary and connected equipment were unwarrantedly handed over by their officers to the Tungabhadra Board on the eve of the merger of Bellary, leading to the deprivation of control over them by the Mysore Electrical Department. Several items of equipment in the Public Works Department and in the Electrical Department are reported to have been taken away from Bellary territory to Andhra just before the merger. I am not suggesting for a moment that we should act in any spirit of indiscriminate reaction, because it is very necessary to cultivate and maintain cordial inter-state relationship. I am merely pointing out

Serial No.

5180

that there are no special reasons why we should not insist on our rights so long as adequate consideration has not been forthcoming from the other side.

441) It is therefore proposed that the originally agreed rates may be made applicable up to 30-6-1953 (for a period of three years from commencement) and that for the rest of the agreement period of seven years, we may insist on a 22% increase as in the case of South Kanara (as against a flat increase 0.1 anna proposed latterly). These rates will be in addition to the Tax of 10% (presently to be raised to 20%). Certain verbal changes in the draft agreement are also necessary and they will be proposed while addressing the Government of Andhra accordingly. We will have to make it clear to them that in view of the heavy demand for power within the State and the increased cost of generation and distribution, this State would find it difficult to continue power supply to Hindupur except on these terms.

442) Law Secretary for kindly furnishing opinion as to whether the above proposal would be legally tenable in the light of the correspondence in the case.

have stated that with a view to enable the Andhra Electricity Dept. to supply power outside Hindupur area within the State the words "Hindupur area of" occurring in the second para of the preamble may be omitted. This is not possible, as the supply of power is meant for distribution in Hindupur.

457) The draft agreement forwarded has been compared with the one suggested by this Govt. The following corrections and changes are noted:-

a) In clause 1(i) the year should be 1951-52 and not 1955-56.

b) In clause 2. the word "supply" should be "delivery".

c) In clause 3(ii) in line 6, the word "the" has been omitted.

d) Clause 4:- Last but one line. The words "from time to time" have been omitted

e) Clause 8(1): The word

Power supply to Andhra

File No. of 195 Mysore Government Secretariat

No. — Pet. 170

Dear Sir Henry,

POWER SUPPLY TO HINDUPUR.

Just before you left on Friday morning, you enquired me whether it would be possible for us to supply about 500-kW. at our State border as bulk supply for your conveying the power & distributing the same at Hindupur. I am sure ~~in~~ you are in possession of a map of Mysore State with our distribution lines marked thereon. At present, a 4.4-kV.line is taken from Chikballapur to Goribidnur for supplying power to rural areas and irrigation pumping sets. This line is not capable of carrying a load of 500-kW. which is required by you at that border. The other alternative is the construction of a 33-kV.line from either Chikballapur or Dodballapur to a point on the State border probably Dodkurugode, from where you will have to convey the powerto Hindupur for a distance of about 10 miles. This ~~work~~ would mean the construction of a 33-kV.transmission line 30 miles long from Chikballa-pur or Dodballapur. You will readily see that this could hardly be an economical proposition if only 500-kW. has to be supplied. However, after going through the problem once again after you left, I feel that another alternative can be considered. The Government of Mysore are anxious to convey power to Pavagada, which is a centre of deep-well irrigation, and the demand for power is so great at the place that I can expect atleast a load of 500 to 1000-kW. This demand, combined with your demand of 500-kW. for Hindupur, would make the proposition attractive. But before we can reach Pavagada, we have to cross the Madras territory for a distance of 5 miles near Doddadalvatta. If I run a 33-kV.line either from Chikballapur or Dodballapur via Goribid nur, to Pavagada via Doddadalavatta, I will be within 4 miles of Hindupur. Thus, I could make power at 33-kV.available on the borders of the State within 4 miles of Hindupur, from which point ~~you~~ Madras can tap either a high-tension or a low-tension line to Hindupur as ~~you~~ they choose best. But permanent rights to cross the Madras territory for a length of about 5 miles of 33-kV.transmission line will have to be granted to us by the Government of Madras. I am enclosing herewith a sketch showing the alternative proposition for your consideration and if you could use your good offices to secure the permission of the Governmen of Madras, I feel I could pursuade the Government of Mysore to agree to the construction of a 33-kV.line via the above route to Pavagada and for the supply of power to the extent of 500-kW. to the Governme of Madras for distribution at Hindupur at rates & conditions to be mutually agreed upon. I shall be thankful to you for an early repl together with your valued opinion about the proposition above refer to.

Sec. P.W.D. Further reports may be awaited by 19/9/45

SECRETARY TO GOVERNMENT ELECTL RYS.

OFFICE OF
THE CHIEF ELECTRICAL ENGINEER TO THE
GOVERNMENT OF MYSORE, BANGALORE.

Date 27th September 1945.

SECRETARIAT BRANCH
BANGALORE
Rec. No. 519
Date 28-9-1945

The Secretary to the Government of Mysore,
Electrical Department,
BANGALORE.

Sir,

POWER SUPPLY TO HINDUPUR.

I have the honour to state that Sir Henry Howard, during his recent visit to Bangalore, enquired whether power supply to the extent of about 500 K.W. at our State Border, could be made available to enable the Government of Madras to supply the same to Hindupur.

With the approval of the Minister for Public Works, I wrote Sir Henry Howard, as per copy of the letter herewith enclosed and I am enclosing herewith a copy of the Confidential D.O. I have received from the Chief Engineer for Electricity, Madras, from which it will be seen that the Chief Engineer for Electricity, is agreeable to our running high tension line through Madras territory for power supply to Pavagada, provided we agree to make arrangements for power supply to the extent of 500 K.W. for supplying to Hindupur at the State Border. I, therefore, submit the following proposition for kind consideration and orders of Government :-

Power supply to Pavagada and areas surrounding Bagepalli, has been receiving the attention of the Department for sometime past. Pavagada is a very fertile taluk. Due to scarcity of surface water, the lands have not been made to yield to the extent they can, if plenty of water is made available. Further, it is understood that this taluk has plenty of underground water supply and therefore, the supply of electricity to this taluk would be a boon to enable the ryots to fully utilise the fertile land to grow essential food articles. Power supply could not be extended to this area in the past, as the Capital Cost in conveying the power is heavy as well as the prospects of adequate revenue were remote. Fortunately, it is learnt that the Government of Madras are keen on obtaining power supply from the Mysore State for distribution in Hindupur and surrounding areas and the residents of Bagepalli and the area around it are also clamouring for power supply for lift irrigation.

At present, Goribidnur is electrified by power supply with 4.6 ~~46~~ kV line from Chickballapur. The line is very long and cannot be extended to either Hindupur or Pavagada and cater for the loads anticipated there. Therefore, the nearest point where high tension power is available is Dodballapur or Chickballapur where the 33 kV line terminates from Bangalore. If power to the places referred to above is to be made available, the most economical way is to extend the 33 kV line from Dodballapur to Pavagada through Goribidnur and through the narrow neck of the Madras territory for a distance of about 5 miles, power supply to Bagepalli, Gudibanda, etc., being made available by a branch line from Goribidnur. Further, in order to meet the increased demand of Hindupur, Pavagada, Bagepalli, etc., the size of the conductor of the transmission line between Bangalore and Dodballapur will have to be increased. The Government of Madras, could be asked to take power supply to Hindupur at our border nearest to Hindupur. The cost of this entire scheme consisting of about 74 miles of transmission line, step-down equipment and distribution at Bagepalli and Pavagada, will amount to approximately 18 Lakhs, of which the cost of transmission line will be 15 Lakhs. The loads anticipated are as follows:-

Sketch enclosed.

Pavagada	700 K.W.
Bagepalli & surrounding area. ..	300 K.W.
Hindupur.	500 K.W.

P.T.O.

Distributing the Capital Cost of the transmission line proportionate to the load, the Capital to be allocated for Power supply to Hindupur would be about 5 Lakhs. If the rates that have been recommended for power supply to Ceded Districts at Ujjani is also applied in this case, a revenue of about Rs.50,000/- per year can be anticipated which works out to 10 per cent on the Capital Cost.

From the conversations I have had with the Deputy Commissioners who have worked in Tumkur District, I feel that adequate return can be anticipated from this Scheme costing about 18 Lakhs of Rupees to make it remunerative, Viz., a revenue of Rs.1,80,000/- per year can be expected to be realised, including the revenue payable by the Government of Madras. As power supply to Hindupur is to be a continuous one for several years to come, this Scheme is a remunerative one, apart from conferring the much needed boon on the residents of the fertile tracts of Pavagada.

Further, power supply to the Government of Madras for electrification of Hindupur incidentally reduces the Capital Cost for the electrification of Pavagada considerably, as otherwise Pavagada could never hope to give an adequate return on the capital to be invested in extending the power line from Doddballapur.

From the letter of the Chief Engineer for Electricity, Government of Madras, it is seen that he is agreeable to obtain for us a permanent right to cross the Madras territory from Goribidnur to Pavagada if power supply is made available to Hindupur.

The cost of the above scheme can be met out of the provision of 500 Lakhs made for the Ist Stage of Post War Development. The Scheme will have to be taken up during the course of the next year as the Government of Madras would like the power supply being made available as early as possible and the Scheme, if sanctioned, will require 12 to 18 months for completion and power supply could be made available with effect from June 1947 to all the areas including Hindupur.

I, therefore, request orders of Government if I may inform the Chief Engineer for Electricity, Government of Madras, that power supply to the extent of 500 K.W. could be made available at the State Border for distribution at Hindupur at rates to be mutually agreed upon, provided a permanent right to take the line to Pavagada through the Madras territory is granted and that power supply could be made available by June 1947 and that he could make a reference in this behalf through the appropriate channel.

Very early orders of Government, in this behalf, are solicited.

I have the honour to be,
Sir,
Your most obedient servant,

Chief Electrical Engineer. 27/9.

POWER SUPPLY TO HINDUPUR.

Sir Henry Howard has passed to me your D.O.No.4121-22 to him dated 17-9-1945 on power supply to Hindupur.

The alternative you suggest in the letter of taking a line to Pavagada through Madras territory and giving a tap from it at a suitable point for supply to Hindupur is acceptable to us.

I shall be glad if you could let me know the rates and conditions of such supply on the assumption that permanent right to cross the Madras territory will be accorded to you.

Kindly also let me know when the area will be changed over to 50 cycles - if at all.

Letter from the Secretary to the Government of Madras, Public Works Department, No.643-E/46-11, dated the 10th July 1946.

...

Electricity - Supply of Mysore Power to Hindupur in Anantapur District.

...

I am directed to inform you that the Chief Engineer (Electricity) Madras, had a discussion with Mr.Siddappa, the Minister for Public Works and Mr.Hayath, the Chief Electrical Engineer of the Government of Mysore, in October 1945 at Bangalore on the question of supply of Mysore Power to Hindupur. The Chief Engineer (Electricity) states that the Mysore Government agreed to give bulk supply at a point within their border nearest Hindupur at the same tariff as that agreed on for the Ceded Districts as referred to in this Government's letter No.1601 E/45-14 dated 4-12-1945, provided the Madras Government allowed them to take their line through the Madras Government's territory to Pavagada in their area. The matter has been further considered and the following terms are proposed by the Madras Government for the bulk supply as suggested by the Chief Engineer (Electricity), Madras.

(1) Mysore power at 33 KV 3 phase 25 cycles to be made available in bulk to the Madras Government at a point of supply on the border, in the neighbourhood of Hindupur or Chaulura at the same rate of charge as has been agreed to by Mysore, for supply at Ujjini for supply to the Ceded Districts - vide para 1(3) of this Government's letter No.1601 E/45-14, dated the 4th December 1945.

Demand Charge.

Upto 1000 K.W.	Rs.3/KW/ month
Over 1000 K.W.	Rs.2/12/KW month.

Plus Energy charge.

Upto 100,000 units consumption per month				0.45 anna unit
Exceeding 100,000	upto	150,000	units per month	0.425 anna unit
" 150,000	"	200,000	"	0.40 "
" 200,000	"	300,000	"	0.375 "
" 300,000	"	500,000	"	0.35 "
" 500,000	"	1000,000	"	0.325 "
" 1000,000	"	...	"	0.30 "

This tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment based on maximum demand, provided the consumption is in excess of 120,000 units, per month. If the consumption is below 120,000 units, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment based on maximum demand.

Power factor to be not less than 0.8.

If the power factor is less than 0.8 and more than 0.7, an additional charge of 8 annas per KW. of maximum demand per month would be levied. Power supply would be discontinued if the Power Factor is less than 0.7 until it is improved to 0.8 or above.

(2) The Madras Government expect to have the following demand but cannot give any revenue guarantee:-

1st Year of operation	200 KW
2nd "	300 "
3rd "	400 "
4th "	475 "
5th "	550 "
6th "	600 "
7th "	650 "
8th "	700 "

(3) Cost of line within Mysore territory and 33 KV metering equipment will be borne by Mysore and cost of line within Madras territory will be borne by the Madras.Government.

(4) Permission to be granted by the Madras Government to the Mysore Government for the latter taking a single circuit 33 KV line from

from Doddada lavatta to Pavagada in their territory through the intervening Madras territory for a distance of about 5 miles for a period of 50 years.

(5) The period of agreement for this bulk supply will be for 10 years in the first instance with provision for renewal if desired by Madras

(6) Taxes. No taxes are to be levied by either party on this bulk supply. If any such tax is levied, the party so taxed is to be reimbursed by other party.

2. As Hindupur requires urgent supply of power, I am to request that the Government of Mysore may kindly be aldressed on the above lines and their consent for bulk supply obtained and communicated to this Government at an early date. The probable date of supply may also be kindly ascertained.

GOVERNMENT OF MYSORE
ELECTRICAL DEPARTMENT

OFFICE OF THE CHIEF ELECTRICAL ENGINEER

Bangalore, 26th August 1946.
(MYSORE, S. INDIA.)

SECRETARY TO GOVERNMENT
Date
P. W., ELECTL & RYS

365
27.8.1946

The Secretary to the Govt. of Mysore,
Electrical Department,
BANGALORE.

Sir,

Subject:- Power supply to Hindupur.

With reference to your letter No.EDS-266/Elecl.298-45-4 dated the 27th July 1946, forwarding a copy of the letter received from the Secretary to the Hon'ble the Resident in Mysore, Bangalore, on the subject of power supply to Hindupur, I have the honour to state as follows:-

The power supply to Hindupur can be permitted to be tapped off from the transmission line from Dodballapur to Pavagada proposed to be constructed, as per estimate sanctioned by Government in EDS.No.2387-89 dated 18th April 1946, as at the time this transmission line was proposed, the prospective load at Hindupur was taken into consideration.

Subject separately

The conditions under which bulk power supply to the Govt. of Madras can be agreed to are the combination of conditions stipulated by us for power supply to Ceded districts at Ujjini and power supply to Kollegal, as even though power supply is proposed to be made available at a point within our border, as in the case of Ujjini, the 33 kV line going to Pavagada passes through Madras territory for a distance of about 5 miles. The conditions stipulated in the letter of the Secretary to Govt. of Madras, Public Works Department, No.643-E/46-11 dated the 10th July 1946, a copy of which was sent along with your letter referred to above, may be accepted, subject to the following modifications:-

A- Clause (1) Mysore power at 33 kV 3 phase 25 cycles, which will be converted to 33 kV 50 cycle 3 phase some time in the year 1949-50, to be made available in bulk, etc., etc.

The rates as specified in the letter being the same as those applicable to power supply to Ceded districts may be accepted.

Clause (2) The revenue guarantee referred to by Madras Govt. is probably the

P.T.O.

guarantee we demanded in the case of power supply to Ceded districts and Kollegal on the capital cost invested. As the Pavagada line is passing nearby and as the additional expenditure to be invested by this department will be the extension of the line by about half a mile and installation of metering equipment with a few quarters, all costing less than half a lakh of rupees, no revenue guarantee is necessary, as the minimum payable in accordance with the schedule of rates specified in Clause (1) will be more than the minimum on the capital cost tobe invested.

(3) Clause (3) may be accepted, as it is the same as in the case of power supply to Ceded Districts.

Clause (4). The permission to be granted is specified for a period of 50 years. As this is a permanent line to be constructed for supply of power to Pavagada, the Govt. of Madras may be requested to grant permanent right for running the line across their territory. However, if it is not possible to grant permanent rights, they may be requested to keep the door for negotiations open after the period of first 50 years by adding at the end of the clause the words "in the first instance."

Clause (5). This may be accepted.

Clause (6). This also may be accepted.

A further clause is to be added, as in the case of power supply to Kollegal, the vehicles belonging to the department and the departmental employees will have to pass through Madras terriotory for the construction and maintenance of this transmission line. The clause may read as follows:-

> The consumer shall exempt from the operation of the Madras Motor Vehicles Taxation Act 1931 all vehicles belonging to the Supplier and of the Supplier's employees for use for the purpose of construction and maintenance of the transmission line in the territory of the Consumer.

With regard to the probable date by which power supply can be made available, it is expected that the Pavagada line can be completed, if insulators and hardware are received in time, by June 1948. Therefore power supply about July 1948 could be made available to the Govt. of Madras. Every effort will be made to see to the construction of the line at least up to the tapping point for Pavagada as early as possible, but an outside limit has been fixed as July 1948.

In Clause (1) the places where power line is to be tapped is specified. It is proposed to construct the Dodaballapur-Pavagada line passing through the following places and the Government of Madras may arrange for tapping from this line at a place most convenient to them:-

Goribidnur to Chandanaduru, Tingluru, Teriyur, Chickka Dalavatta, Vithalapura and Basavanahalli to Pavagada.

I request that the proposition of power supply to Hindupur be favourably considered by Government.

I have the honour to be,
Sir,
Your most obedient servant,

Chief Electrical Engineer.

Draft – Copy

GOVERNMENT OF MYSORE. ELECTRICAL DEPARTMENT.

AGREEMENT MADE this..... day of .....
.....one thousand, nine hundred and forty .....

Between should be in capital

BETWEEN the Government of His Highness the Maharaja of Mysore (hereinafter called the 'Supplier' which expression shall where the context so admits include its successors and assigns) represented by the Secretary to the said Government Electrical Department for the time being Mr.....of the one part and His Excellency the Governor of Madras in the exercise of the executive authority of the Province of Madras (hereinafter called the 'Consumer' which expression shall where the context so admits include his successors in office and assigns) of the other part.

should be in capital

WHEREAS the Consumer has requested the supplier to furnish to him a supply of electrical energy up to 700 K.W. as detailed in the margin in bulk at the point hereinafter to be decided upon for the purpose of distribution by the consumer in Hindupur area of the Province of Madras and for any other purposes for which the consumer may require such energy;

I	Year of Operation:	200 K.W.
II	-do-	300 K.W.
III	-do-	400 K.W.
IV	-do-	475 K.W.
V	-do-	550 K.W.
VI	-do-	600 K.W.
VII	-do-	650 K.W.
VIII	-do-	700 K.W.

AND WHEREAS the supplier has agreed to supply such energy to the consumer for the period and upon the terms and conditions hereinafter set forth;

NOW THESE PRESENTS WITNESS that the parties have agreed in manner following, that is to say:-

1. (i) The Supplier agrees to supply to the Consumer electrical energy up to 700 K.W. in bulk at the point hereinafter to be decided upon at 33 KV, 3 phase, 25 cycles supply which will be converted to 33 KV., 3 phase, 50 cycles, sometime in the year 1949-50 or later. (The supplier will lay, fit up and maintain the telephone line or lines required for his use.)

(P.T.O.)

(ii) In the event of the consumer requiring at any time a supply of more than 700 K.W. such additional supply as the supplier may agree to afford may be made by the supplier to the consumer on terms and conditions to be mutually agreed upon, provided the consumer gives intimation of his requirements at least three months in advance.

2. The point of supply shall be at a place to be mutually agreed upon within the border of the Mysore territory and a single 33 K.V. line and Telephone line shall be run from the supplier's present terminal at Doddaballapur to Pavagada via Goribidanur, Chandanadaru, Tingluru, Teriyur, Chickka, Dalavatta, Vithalapura and Basavanahatti to the point to be mutually at the expense of the supplier who will at his expense lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such delivery and for metering at the point of supply. Cost of line within Mysore Territory, cost of line to Pavagada inclusive of 5 miles line passing through the intervening Madras territory and that of 33 K.V. metering equipment will be borne by supplier. The cost of line within Madras territory will be borne by the consumer.

3. (i) The Supplier will take all reasonable precautions to ensure a supply of power to the consumer and the due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the supplier shall not be liable to the consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the supplier, provided always that the supplier shall give notice as early as possible of the probable duration of any interruption in supply due to any of the aforesaid causes and will use every practicable means to make the period of interruption as short as possible.

(ii) If at any time the consumer is prevented from receiving

and using the electrical energy to be supplied under this agreement either in whole or in part owing to any strikes, riots, insurrections, lawful command of a Civil ~~and~~ or Military authority, fire, explosion, act of God or any other cause reasonably beyond control of the consumer, the minimum charge or guarantee under this agreement shall be reduced in proportion to the ability of the consumer to take supply.

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the consumer under this agreement there shall be provided by the supplier one suitable 33 K.V. volt metering equipment at the point of supply within the border of Mysore territory which shall be the property of and be kept in repair and calibrated by the supplier. Meter rent shall be charged in accordance with the rules from time to time in force in the Department of Electricity of the supplier.

5. The consumer may at his own expense install check meters at the metering point of the supplier.

6. The meters belonging to the supplier shall be kept properly sealed by the supplier and the meters belonging to the consumer shall be kept properly sealed by the consumer. The meters shall not be interfered with by either party except after due intimation to the other party.

7. The readings of the said meters installed by the supplier shall be taken by the accredited representatives of the supplier at or as near noon as practicable on the last day of each calendar month and the readings so taken shall be binding and conclusive between the supplier and the consumer as to the amount of electrical energy supplied to the consumer. The consumer's representative may arrange to be present at the time of the readings. In the event of any meter being found defective and a check meter not having been installed, the power consumed for the period during which the meter was defective shall be determined by taking the daily average consumption for the previous period of supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test the meter or meters is or are found to vary

within the limits prescribed by the Indian Electricity Rules 1937 or any statutory modification thereof for the time being in force.

8.(i) Once in every year the meters shall be calibrated and standardised if considered necessary by the supplier, in the presence of a representative of the consumer.

(ii) Adjustment in bills will be made for error at average load and power factor of the consumer, when the meter is found to be incorrect during annual periodical tests, for a preceding period of three months unless there is evidence for adopting a different period. The meter or meters shall be deemed to be correct if as a result of test the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules 1937 or ~~say~~ any statutory modification thereof for the time being in force.

9. Either party to this agreement may at any time and after notice to the other party have a special test carried out of any or all the meters belonging to the supplier above mentioned at a place to be fixed by mutual agreement. The meter or meters so tested shall be deemed to be correct if as a result of such test the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules 1937, or any statutory modification thereof for the time being in force. If the mean error be found to be more than that prescribed by the said Indian Electricity Rules or any statutory modification thereof for the time being in force the supplier will deduct from or add to the account of the preceding period of three months an amount equivalent to the error. The expenses of such test shall be borne by the supplier in the event of the account requiring any adjustment as hereinbefore mentioned. If no adjustment of the account is necessary as a consequence of such special test the party at whose instance the test was conducted shall bear the costs of such tests.

10. The rates to be charged by the supplier for the power-

power supply at the point of supply under this agreement will be in accordance with the high tension tariff set out below:-

Class and total monthly consumption in K.W.H.				Rate per K.W.H. Anna.	Rate per K.W. of maximum demand per month.
I. Up to	1,00,000			0.450	upto 1000 KW. Rs.3/-
II. Exceeding	1,00,000	& upto	150000	0.425)	(
III. "	1,50,000	"	200000	0.400)	(
IV. "	2,00,000	"	300000	0.375) plus	(1000 K.W. and
V. "	3,00,000	"	500000	0.350)	(over Rs.2-12-0
VI. "	5,00,000	"	1000000	0.325)	(
VII. "	10,00,000			0.300)	(

Does it mean that the first 1000 KW. will be charged @ Rs.3/- and all others @ Rs.2-12-0 ? R.P. 27.X.49

The above tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment defined in Clause 12, provided the consumption is in excess of 1,20,000 units per month. If the consumption is below 1,20,000 units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in Clause 12.

11. For the purpose of this agreement the maximum demand of supply to the consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

12 (i). Maximum demand charges for any month and at the point of supply shall be based on maximum kilowatt demand as determined in accordance with clause 11 for the previous calendar months commencing from January of each year and ending with the month in question. For the first calendar year of service the demand charge for any month will be based on the maximum kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum demand for that month.

(ii) The demand payment will be a fixed monthly charge whether energy is consumed or not and shall constitute the minimum monthly payment.

13. The power-factor of the plant and apparatus owned by the consumer at the point of supply shall not be less than 0.8. Should

(P.T.O.)

the power-factor be below 0.8 (and more than 0.7) it is liable to a penalty of 8 annas (eight annas) per K.W. of monthly demand while if the power-factor drops below 0.7 it must be brought up by methods approved by the Engineers of the supplier, failing which the services may be discontinued. For purposes of this clause the power-factor shall be that determined during the half-hour of maximum demand on any working day in the month.

13-A. The Supplier reserves the right to discontinue supply of power for purposes of testing for a period not exceeding one hour once every month and also at any other time if it should appear necessary for the supplier to test any portion of the plant in order to secure subsequent continuity of supply or for the purpose of connecting new machinery. These monthly stoppages may at the option of the supplier be extended on ~~one~~ due notice to six hours once every six months. No reduction of the monthly charges shall be claimed by the consumer on this account.

14. The supplier and the consumer agree that no tax shall be levied by either of them on the other in respect of the supply under this agreement. If any such tax is levied, the party so taxed shall be reimbursed by the other party. The consumer shall (for a period of 60 years) at the outset exempt from the operation of the Madras Motor Vehicles Taxation Act 1931, all vehicles belonging to the supplier and of the suppliers' employees for use for the purpose of construction and maintenance of the Transmission and Telephone line in the territory of the consumer.

15. The supplier shall within fifteen days after the expiration of each calendar month deliver to the consumer an account stating the number of units supplied to the consumer by the supplier in accordance with the readings of the said meters and the amount payable therefor as also the amount payable in respect of the maximum demand charge and other charges if any payable by the consumer to the supplier and the consumer shall pay the same within thirty days from the delivery of such account. Provided that the supplier shall

be at liberty to charge interest at the rate of 7 per cent (seven per cent) per annum on the amounts of such bills as are not paid within the abovesaid period of 30 days in addition to and without prejudice to the other rights of the supplier herein contained.

16. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid or if the consumer shall not in all things perform and observe the conditions herein contained and on the part of the consumer to be observed and performed then and in such cases and in addition to any other right or power possessed by the supplier, the supplier shall be at liberty at any time thereafter notwithstanding that the supplier may not have taken advantage of any previous breach or default or event of a like nature at its choice to suspend all further supply of electrical energy under this agreement or to discontinue the supply once for all. Such suspension of the supply of electrical energy shall not relieve the consumer of his liability to pay the minimum charge and the guaranteed revenue provided for herein nor shall such discontinuance effect any right, claim, demand or power which may have accrued to the supplier.

17. (i) This agreement shall, subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of supply of electrical energy under this agreement.

(ii) At the request of the consumer this agreement may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the supplier and the consumer.

18. The consumer confers on the supplier the right of laying, maintaining and supervising, etc., of the electric and telephone lines referred to above through the territory of the consumer and also the right of extending the lines within the supplier's territory and beyond the territory of the consumer for a period of 60 years (inclusive of the period of this agreement) in the first instance.

(P.T.O.)

19. The consumer shall give the supplier all necessary facilities for clearing jungle lands for the required width for the satisfactory running and maintenance of the above lines, through the territory of the consumer and the consumer shall not charge the supplier compensation or royalty in any shape or form on account of these works on Government lands within the consumer's territory.

20. Any dispute or difference arising between the supplier and the consumer or their respective Electrical Engineers as to the supply of electrical energy or the pressure thereof or as to the rates of supply or as to the interpretation of this agreement or the right of the supplier or the consumer to determine the same or any other question, matter or thing arising hereunder, shall be referred to a single arbitrator to be mutually agreed upon by both the parties and the arbitrator's decision thereon shall be final and binding on both parties.

IN WITNESS WHEREOF the Secretary to the Government of His Highness the Maharaja of Mysore, Electrical Department, for the time being Mr. for and on behalf of the Government of His Highness the Maharaja of Mysore and Chief Engineer for Electricity to the Government of Madras for and on behalf of and by the order and direction of His Excellency the Governor of Madras have hereunto set their hands.

Signed by the above-named
in the presence of:

1.

Secretary to the Government
of His Highness the Maharaja of
Mysore, Electrical Department.

2.

Draft-Copy

C.E.E.

AGREEMENT MADE this..... day of .....
.....one thousand, nine hundred and forty .....
BETWEEN the Government of His Highness the Maharaja of Mysore (hereinafter called the 'Supplier' which expression shall -- where the context so admits include its successors and assigns) represented by the Secretary to the said Government Electrical Department for the time being Mr.....of the one part and His Excellency the Governor of Madras in the exercise of the executive authority of the Province of Madras (hereinafter called the 'Consumer' which expression shall where the context admits include his successors in office and -- assigns) of the other part.

WHEREAS the Consumer has requested the supplier to furnis to him a supply of electrical energy up to 700 K.W. as detailed the margin in bulk at the point hereinafter to be decided upon

I	Year of Operation:	200 K.W.
II	-do-	300 K.W.
III	-do-	400 K.W.
IV	-do-	475 K.W.
V	-do-	550 K.W.
VI	-do-	600 K.W.
VII	-do-	650 K.W.
VIII	-do-	700 K.W.

the purpose of distribut by the consumer in Mind area of the Province of and for any other purp for which the consumer require such energy;

AND WHEREAS the supplier has agreed to supply such en to the consumer for the period and upon the terms and condit hereinafter set forth;

NOW THESE PRESENTS WITNESS that the parties have agre manner following, that is to say:-

1. (i) The Supplier agrees to supply to the Consumer electrical energy up to 700 K.W. in bulk at the point hereina to be decided upon 33 KV, 3 phase, 25 cycles supply which wil be converted to 33 KV, 3 phase, 50 cycles, sometime in the ye 1949-50 or later. The supplier will lay, fit up and maint the telephone line or lines required for his use.

(ii) In the event of the consumer requiring at any time a supply of more than 700 K.W. such additional supply as the supplier may agree to afford may be made by the supplier to the consumer on terms and conditions to be mutually agreed upon, provided the consumer gives intimation of his requirements at least three months in advance.

2. The point of supply shall be at a place to be mutually agreed upon within the border of the Mysore territory and a single 33 K.V. line and Telephone line shall be run from the supplier's present terminal at Doddaballapur to Pavagada via Goribidanur, Chandanadaru, Kinglurn, Teriyur, Chickka, Dalavatta, Vithalapura and Basavanahatti at the expense of the supplier who will at his expense lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such delivery and for metering at the point of supply. Cost of line within Mysore Territory, cost of line to Pavagada inclusive 5 miles line passing through the intervening Madras territory and that of 33 K.V. metering equipment will be borne by supplier. The cost of line within Madras territory will be borne by the consumer.

3. (i) The Supplier will take all reasonable precautions to ensure a supply of power to the consumer and the due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the supplier shall not be liable to the consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the supplier, provided always that the supplier shall give notice as early as possible of the probable duration of any interruption in supply due to any of the aforesaid causes and will do every practicable means to make the period of interruption as short as possible.

(ii) If at any time the consumer is prevented from receiving

and using the electrical energy to be supplied under this agreemen either in whole or in part owing to any strikes, riots, insurrections, lawful command of a Civil ~~and~~ or Military authority, fire, explosion, act of God or any other cause reasonably beyond control of the consumer, the minimum charge under this agreement shall be reduced in proportion to the ability of the consumer to take suppl

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the consumer under this agreement there shall be provided by the supplier one suitable 33 K.V. volt metering equipment at the point of supply within the border of Mysore territory which shall be the property of and be kept in repair and calibrated by the supplier. Meter rent shall be charged in accordance with the rules from time to time in force in the Department of Electricity of the supplier.

5. The consumer may at his own expense install check meters at the metering point of the supplier.

6. The meters belonging to the supplier shall be kept properly sealed by the supplier and the meters belonging to the consumer shall be kept properly sealed by the consumer. The meters shall not be interfered with by either party except after due intimation to the other party.

7. The readings of the said meters installed by the supplier shall be taken by the accredited representatives of the supplier at or as near noon as practicable on the last day of each calendar month and the readings so taken shall be binding and conclusive between the supplier and the consumer as to the amount of electric energy supplied to the consumer. The consumer's representative may arrange to be present at the time of the readings. In the event of any meter being found defective and a check meter not having been installed the power consumed for the period during which the meter was defective shall be determined by taking the daily average consumption for the previous period of supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test the meter or meters is or are found to

power-supply at the point o[illegible] in accordance with the high tension tariff set out below:-

Class and total monthly consumption in K.W.H.			Rate per K.W.H. Annas.	Rate per K.V.A. of maximum demand per month.
I. Up to	1,00,000		0.450	(upto 1000 K.V.A. Rs.3/-
II. Exceeding	1,00,000	& upto 150000	0.425)	(
III. "	1,50,000	" 200000	0.400)	(
IV. "	2,00,000	" 300000	0.375) plus	(1000 K.V.A. and
V. "	3,00,000	" 500000	0.350)	(over: Rs.2-12-0
VI. "	5,00,000	" 1000000	0.325)	(
VII. "	10,00,000	" ..	0.300)	(

The above tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment defined in clause 12, provided the consumption is in excess of 1,20,000 units per month. If the consumption is below 1,20,000 units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in clause 12.

11. For the purpose of this agreement the maximum demand of supply to the consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

12 (i). Maximum demand charges for any month and at the point of supply shall be based on maximum kilowatt demand as determined in accordance with clause 11 for the previous calendar months commencing from January of each year and ending with the month in question. For the first calendar year of service the demand charge for any month will be based on the maximum kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum demand for that month.

(ii) The demand payment will be a fixed monthly charge whether energy is consumed or not and shall constitute the minimum monthly payment.

13. The power factor of the plant and apparatus owned by the consumer at the point of supply shall not be less than 0.8. Should

be at liberty to charge interest at the rate of 7 per cent (seven per cent) per annum on the amounts of such bills as are not paid within the abovesaid period of 30 days in addition to and without prejudice to the other rights of the supplier herein contained.

16. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid or if the consumer shall not in all things perform and observe the conditions herein contained and on the part of the consumer to be observed and performed then and in such cases and in addition to any other right or power possessed by the supplier, the supplier shall be at liberty at any time thereafter notwithstanding that the supplier may not have taken advantage of any previous breach or default or event of a like nature at its choice to suspend all further supply of electrical energy under this agreement or to discontinue the supply once for all. Such suspension of the supply of electrical energy shall not relieve the consumer of his liability to pay the minimum charge and the guaranteed revenue provided for herein nor shall such discontinuance effect any right, claim, demand or power which may have accrued to the supplier.

17. (i) This agreement shall, subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of supply of electrical energy under this agreement.

(ii) At the request of the consumer this agreement may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the supplier and the consumer.

18. The consumer confers on the supplier the right of laying, maintaining and supervising, etc., of the electric and telephone lines referred to above through the territory of the consumer and also the right of extending the lines within the supplier's territory and beyond the territory of the consumer for a period of 60 years (inclusive of the period of this agreement) in the first instance.

Sir,

Electricity - Supply of power to Hindupur - Agreement.

Madras Government Lr. No. 643 E/46-32 dated 19-8-47.

I am directed to enquire when a reply may be expected.

Your obedient Servant,

T. V. Natesan
Assistant Secretary to Government.

PUBLIC WORKS DEPARTMENT
REGD. NO. 594
DATE 1-10-1947
BANGALORE

ij. 25/9

No E.D.S. 1179
Elect 298-45-15.

Dated, 27th October, 1947

The Chief Electrical Engineer
to the Government of Mysore, Bangalore.

Sir,

Agreements for power-supply to the Government of Madras at Ujjini, ~~Kavugoda~~, etc.
HINDUPUR.

In connection with the draft agreements for power supply to the Government of Madras, it is observed that under clause 10 the demand charge has been stipulated as follows:-

Rate per K.W. of maximum demand per month:	
Up to 1000 K.W.	Rs.3/-
1000 K.W. and over.	Rs.2-12-0

The demand charge as quoted above is ambiguous in as much as it is not clear whether cases of demand of 1000 K.W. and over have to be billed (a) at a flat rate of Rs.2-12-0 per K.W., or (b) the demand up to 1000 K.W., should be billed at Rs.3/- and the excess, i.e., 1000 K.W. and over to be billed at Rs.2-12-0 per K.W. There would be a considerable difference in billing according to the interpretation given to this clause.

For instance, if the consumer's maximum demand is, say, 1000 K.W., the billing for the maximum demand would be:-

As per (a).	1000 x 2-12-0	=	Rs.2,750 per month.
" (b).	999 x 3-0-0	=	Rs.2,997--0-0
	1 x 2-12-0	= Rs.	2-12-0
	Total.		2,999-12-0

In other words, under (a) a demand of 999 K.W. would pay more than a demand of 1000 K.W., or per contra a demand of 1000 K.W. would be billed for the same amount as a demand of 999 K.W. It will thus be seen that a consumer can, by just increasing his demand

demand by 1 K.W., get into the lower block rate, which is anomalous and unfair.

As the generally accepted procedure in billing for maximum demands is as per interpretation (b), it may kindly be intimated whether the agreement with the Government of Madras has been arrived at on this basis. It is very necessary that this point should leave no room for ambiguity or dispute at a later stage.

I have the honour to be,

Sir,

Sir,

Agreements for power supply to the Government of Madras at Ujjini, Hindupur, etc.

5D 18/11(4)

With reference to your letter No.EDS.1179/Elecl.298-45-15 dated the 27th October 1947 with regard to the interpretation of Clause 10, I have the honour to state that the agreement with the Government of Madras has been arrived at on the basis of the high tension rates applied by ~~it~~ them to their consumers in Madras territory. The practice adopted by them is as per alternative (a) referred to in para (3) of your letter under reply, which is the generally accepted practice. The discrepancy pointed out by you does exist and it is so in respect of all tariffs. I may here mention that similar anomaly exists in the tariffs applied by the Department at present for installations rated 100 H.P. and below.

Sub:- Agreement for power supply to you at Ujjini, Hindupur, etc.,

Ref:- Your letter No. 13469 dated 5/11/1947.

I acknowledge receipt of your letter quoted above and have to state that an method (b) of para 1 of your letter is the one adopted by this department i.e. the lower rate is charged for the whole demand, when it exceeds the specified limit.

Besides, in cases where the demand or consumption approached the limit for a lower step, but not actually reached it; the benefit of the lower step is given as marginal relief to the consumer, if he agrees to pay for the minimum required for the lower rate.

For Chief Electrical Engineer.

No. 13469

4th/5th November 1947.

The Chief Engineer for Electricity,
Govt. of Madras,
Chepauk,
MADRAS.

Sir,

Agreement for power supply to you at Ujjini, Hindupur, etc..

I have the honour to state that a doubt has arisen with regard to the billing as per clause 10 of the draft agreement, which stipulates that the maximum demand charged per month shall be up to 1000 KW., Rs. 3/- per KW. and 1000 KW and over, Rs. 2-12-0 per kW. Obviously there are two ways of billing for an installation, whose maximum demand is say 1050 kW:-

(a) 999 kW at Rs.3/- and 51 kW at 2-12-0, the total of the two being the maximum demand charged per month.

(b) 1050 kW at Rs. 2-12-0 per kW, which is the maximum demand charged per month.

As you are aware that the tariff agreed to in the draft agreement is the same as the High Tension tariff of your department applied to your High Tension consumers, I would request you to kindly let me know the method of billing adopted by you for your consumers, whose rating is above 1000 kW.

A very early reply in this matter will be greatly appreciated.

I have the honour to be,
Sir,
Your most obedient servant,

Sd./- M. HAYATH.
Chief Electrical Engineer.

ELECTRICAL WORKS SECRETARY No. 914 Date 26.11.47

The Secretary to the Govt. of Mysore,
Electrical Department,
BANGALORE.

Sir,

Subject:- Power supply to Hindupur - Draft Agreement.

With reference to your letter No. EDS-1349/Elcl.298-45-16 dated the 17th instant, on the above subject, I have the honour to inform you that it is desirable to define the route of the transmission line in detail, as proposed in Clause 2 of the Agreement, so that the Govt. of Madras may not require us to deviate this line from the proposed route in order to make the length of the line to be run from tapping point ~~from them~~ for power supply to Hindupur shorter.

With regard to your letter No. EDS-1179 dated 27th October 1947, a reply has been sent in my letter No. 14939 dated the 17th instant.

I have the honour to be,
Sir,
Your most obedient servant,

Chief Electrical Engineer.

Memo No.EDS. 1629 Dated Bangalore, 5 Dec. 1947
Copy of draft agreement

Copy of the foregoing is forwarded with compliments to the Chief Electrical Engineer for information with reference to correspondence ending with his letter No.15648 dated 25th November 1947.

By Order,

G.C. 13.12.47

Secretary to Government,
Electrical Department.

A.N.11th

AGREEMENT MADE this.....day of.....
.....one thousand, nine hundred and forty..... between THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE (hereinafter called the 'Supplier' which expression shall, where the context so admits, include its successors and assigns) represented by the Secretary to the said Government, Electrical Department for the time being Mr..... of the one part and HIS EXCELLENCY THE GOVERNOR OF MADRAS in the exercise of the executive authority of the Province of Madras (hereinafter called the 'Consumer' which expression shall where the context so admits, include his successors in office and assigns) of the other part.

WHEREAS the Consumer has requested the Supplier to furnish to him a supply of electrical energy up to 700 K.W. as detailed in the margin in bulk at the point hereinafter to be decided upon for the purpose of distribution by the Consumer in Hindupur area of the Province of Madras and for any other purposes for which the Consumer may require such energy,

I year of Operaton	200 K.W.	)
II Do.	300 K.W.	)
III Do.	400 K.W.	)
IV Do.	475 K.W.	)
V Do.	550 K.W.	)
VI Do.	600 K.W.	)
VII Do.	650 K.W.	)
VIII Do.	700 K.W.	)

AND WHEREAS the Supplier has agreed to supply such energy to the Consumer for the period and upon the terms and conditions hereinafter set forth;

NOW THESE PRESENTS WITNESS that the parties have agreed in manner following, that is to say:-

1. (i) The Supplier agrees to supply to the Consumer electrical energy up to 700 K.W. in bulk at the point hereinafter to be decided upon at 33 KV, 3-phase, 25 cycles, which may be converted to 33 KV, 3-phase, 50 cycles, sometime in the year 1949-50 or later.

(ii) In the event of the Consumer requiring at any time a supply of more than 700 K.W. such additional supply as the Supplier may agree to afford may be made by the Supplier to the Consumer on terms and conditions to be mutually agreed upon, provided inter alia that the Consumer gives intimation of his requirements at least three months in advance.

2. The point of supply shall be at a place to be mutually agreed upon within the border of the Mysore territory and a single 33 K.V. line and telephone line shall be run from the Supplier's present terminal at Doddaballapur to Pavagada via Goribidnur, Chandanadaru, Tingluru, Teriyur, Chickka, Dalavatta, Vithalapura and Basavanahatti to the point of supply at the expense of the Supplier who will at his expense lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such delivery and for metering at the point of supply. The cost of line within Mysore territory, cost of line to Pavagada inclusive of 5 miles line passing through the intervening Madras territory and that of the 33 K.V. metering equipment will be borne by the Supplier. The cost of line within Madras territory except the intervening territory mentioned above will be borne by the Consumer.

3.(i) The Supplier will take all reasonable precautions to ensure a supply of power to the Consumer and the due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the Supplier shall not be liable to the Consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the Supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the Supplier, provided always that the Supplier shall give notice as early as possible of the probable duration of any interruption in supply due to any of the aforesaid causes and will use every practicable

practicable means to make the period of interruption as short as possible.

(ii) If at any time the Consumer is prevented from receiving and using the electrical energy to be supplied under this agreement either in whole or in part owing to any strikes, riots, insurrections, lawful command of a Civil or Military authority, fire, explosion, act of God or any other cause beyond control of the Consumer, the minimum charge, or guarantee under this agreement shall be reduced in proportion to the ability of the Consumer to take supply.

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the Consumer under this agreement there shall be provided by the Supplier one suitable 33 K.V. metering equipment at the point of supply within the border of Mysore territory which shall be the property of and be kept in repair and calibrated by the Supplier. Meter rent shall be charged to the Consumer in accordance with the rules from time to time in force in the Department of Electricity of the Supplier.

5. The Consumer may at his own expense instal check meters at the metering point of the Supplier.

6. The meters belonging to the Supplier shall be kept properly sealed by the Supplier and the meters belonging to the Consumer shall be kept properly sealed by the Consumer. The meters shall not be interfered with by either party except after due intimation to the other party.

7. The readings of the said meters installed by the Supplier shall be taken by the accredited representatives of the Supplier at or as near noon as practicable on the last day of each calendar month and the readings so taken shall be binding and conclusive between the Supplier and the Consumer as to the amount of electrical energy supplied to the Consumer. The Consumer's

Consumer's representative may arrange to be present at the time of the readings. In the event of any meter being found defective and a check meter not having been installed, the power consumed for the period during which the meter was defective shall be determined by taking the daily average consumption for the previous period of supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules 1937 or any statutory modification thereof for the time being in force.

8.(i) Once in every year the meters shall be calibrated and standardised if considered necessary by the Supplier, and in the presence of a representative of the Consumer.

(ii) Adjustment in bills will be made for error at average load and power-factor of the Consumer, when the meter is found to be incorrect during annual periodical tests, for a preceding period of three months unless there is evidence for adopting a different period. The meter or meters shall be deemed to be correct if as a result of test the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules 1937 or any statutory modification thereof for the time being in force.

9. Either party to this agreement may, at any time and after reasonable notice to the other party, have a special test carried out of any or all the meters belonging to the Supplier above mentioned at a place to be fixed by mutual agreement. The meter or meters so tested shall be deemed to be correct if as a result of such test the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules 1937, or any statutory modification thereof for the time being in force. If the mean error be found to be more than that prescribed by the Indian Electricity Rules or any statutory modification thereof for the time being in force, the Supplier will deduct

deduct from or add to the account of the preceding period of three months an amount equivalent to the error. The expenses of such test shall be borne by the Supplier in the event of the account requiring any adjustment as hereinbefore mentioned. If no adjustment of the account is necessary as a consequence of such special test the party at whose instance the test was conducted shall bear the costs of such tests.

10. The rates to be charged by the Supplier for the power supply at the point of supply under this agreement will be in accordance with the high tension tariff set out below:-

Class and total monthly consumption in K.W.H.			Rate per K.W.H. in annas.		Rate per K.W. of maximum demand per month.
I. Upto	1,00,000		0.450	plus	Upto 1,000 KW. Rs 3/-
II. Exceeding	1,00,000 & upto	1,50,000	0.425		
III. "	1,50,000 "	2,00,000	0.400		
IV "	2,00,000 "	3,00,000	0.375		1,000 KW. and over : Rs 2/12/-
V "	3,00,000 "	5,00,000	0.350		
VI "	5,00,000 "	10,00,000	0.325		
VII "	10,00,000		0.300		

The above tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment defined in Clause 12, provided the consumption is in excess of 1,20,000 units per month. If the consumption is below 1,20,000 units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in Clause 12.

11. For the purpose of this agreement the maximum demand of supply to the Consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

12 (i) Maximum demand charges for any month and at the point of supply shall be based on maximum kilowatt demand as determined

determined in accordance with Clause ii for the previous calendar months commencing from January of each year and ending with the month in question. For the first calendar year of service the demand charge for any month will be based on the maximum kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum demand for the month.

(ii) The demand payment will be a fixed monthly charge whether energy is consumed or not and shall constitute the minimum monthly payment.

13. The power-factor of the plant and apparatus owned by the Consumer at the point of supply shall not be less than 0.8. Should the power-factor be below 0.8 and more than 0.7 it is liable to a penalty of 8 annas (eight annas) per K.W. of monthly demand while if the power-factor drops below 0.7 it must be brought up by methods approved by the engineers of the Supplier, failing which the services may be discontinued. For purposes of this clause the power-factor shall be that determined during the half-hour of maximum demand on any working day in the month.

13-A. The Supplier reserves the right to discontinue supply of power for purposes of testing for a period not exceeding one hour once every month and also at any other time if it should appear necessary for the Supplier to test any portion of the plant in order to secure subsequent continuity of supply or for the purpose of connecting new machinery. The monthly stoppages may, at the option of the Supplier, be extended on due notice to six hours once every six months. No reduction of the monthly charges shall be claimed by the Consumer on this account.

14. The Supplier and the Consumer agree that no tax shall be levied by either of them on the other in respect of the supply under this agreement. If any such tax is levied, the party so

so taxed shall be reimbursed by the other party. The Consumer shall, for a period of 60 years at the outset, exempt from taxation all vehicles belonging to the Supplier or the Suppliers' employees and used for the purpose of construction or maintenance of the Transmission and Telephone lines in the territory of the Consumer.

15. The Supplier shall, within fifteen days after the expiration of each calendar month, deliver to the Consumer an account stating the number of units supplied to the Consumer by the Supplier in accordance with the readings of the said meters and the amount payable therefor as also the amount payable in respect of the maximum demand charge and other charges if any payable by the Consumer to the Supplier and the Consumer shall pay the same within thirty days from the delivery of such account. Provided that the Supplier shall be at liberty to charge interest at the rate of 7 per cent (seven per cent) per annum on the amounts of such bills as are not paid within the abovesaid period of 30 days in addition to and without prejudice to the other rights of the Supplier herein contained.

16. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid or if the Consumer shall not in all things perform and observe the conditions herein contained and on the part of the Consumer to be observed and performed then and in such cases and in addition to any other right or power possessed by the Supplier, the Supplier shall be at liberty at any time thereafter notwithstanding that the Supplier may not have taken advantage of any previous breach or default or event of a like nature at its choice to suspend all further supply of electrical energy under this agreement or to discontinue the supply once for all. Such suspension or discontinuance of the supply of electrical energy shall not relieve the Consumer of his liability to pay the minimum charge and the guaranteed revenue provided for herein nor shall such

such suspension or discontinuance affect any right, claim, demand or power which may have accrued to the Supplier.

17(i) This agreement shall, subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of supply of electrical energy under this agreement.

(ii) At the request of the Consumer this agreement may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the Supplier and the Consumer.

18. The Consumer confers on the Supplier the right of laying, maintaining, and supervising, etc., of the electric and telephone lines referred to above through the territory of the Consumer and also the right of extending the lines within the Suppliers' territory and beyond the territory of the Consumer for a period of 60 years (inclusive of the period of this agreement) in the first instance.

19. The Consumer shall give the Supplier all necessary facilities for clearing jungle lands for the required width for the satisfactory running and maintenance of the above lines through the territory of the Consumer, and the Consumer shall not charge the Supplier compensation or royalty in any shape or form on account of these works on Government lands within the Consumer's territory.

20. Any dispute or difference arising between the Supplier and the Consumer or their respective Electrical Engineers as to the supply of electrical energy or the pressure thereof or as to the rates of supply or as to the interpretation of this agreement or the right of the Supplier or the Consumer to determine the same or any other question, matter or thing arising hereunder, shall be referred to a single arbitrator to be mutually agreed upon by both the parties and the arbitrator's decision thereon shall be final and binding on both parties.

IN WITNESS WHEREOF the Secretary to the Government of His Highness the Maharaja of Mysore, Electrical Department, for the time being Mr..... for and on behalf of the Government of His Highness the Maharaja of Mysore and..... Chief Engineer for Electricity to the Government of Madras for and on behalf of and by the order and direction of His Excellency the Governor of Madras have hereunto set their hands.

Signed by the above-named
in the presence of:-

1.

Secretary to the Government of
His Highness the Maharaja of

From
T.A. Varghese Esq., I.C.S.,
Secretary to Government.

To
The Chief Secretary to the Government of Mysore,
BANGALORE.

Sir,

Sub: Supply of electric power to Hindupur - Draft agreement.

Ref: Mysore Government's letter No. EDS.1628/Elecl. 298-45-21 dated 15th December, 1947.

***

I am directed to state that the Madras Government accept the draft agreement subject to the following remarks:-

Preamble:- The load forecast of power needs for each of the first 8 years described in para 2 of the preamble, though correct, is not usually provided for in the preamble or in the agreement proper. It will be enough if the power required by the Madras Government is indicated in broad outline - 700 K.W. The portion reading "as detailed in the margin in bulk at the point hereinafter to be decided upon" and the details furnished in the margin may be omitted.

Clause (2):- It is not essential to specify so many villages through which the proposed line of the Mysore Government to Pavagada will pass, as most of the villages lie in the Mysore territory. The words "via Goribidnur, Chandanadaru, Tingluru, Teriyur, Chickka, Dalavatta, Vithalapura and Basavanahatti" may therefore be deleted.

Clause 13 (A):- This clause may be numbered as 14 and the subsequent clauses suitably renumbered.

Clause 14:- This clause may be suitably recast embodying the provisions in the Madras Government's proceedings No. 832, Home, dated 6th March, 1948.

It is observed that the expression "for a period of 60 years at the outset" in line 5 of this clause is an addition made by the Mysore Government. In the agreement for supply of Mysore power at Kollegal, where a similar provision for exemption of the supplier's vehicles from the Motor Vehicles Taxation Act has been made, the period has not been specified. The expression may therefore be deleted.

2. Besides the above modifications, certain minor modifications are also found necessary. A revised copy of the draft agreement, embodying all the above modifications is forwarded herewi The acceptance of the Mysore Government to the revised draft may please be obtained and communicated to this Government at an early date.

Yours faithfully,

For Secretary to Government.

CR./18.8.

AGREEMENT MADE this .....day of .....
.....One thousand nine hundred and forty.....BETWEEN THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE (hereinafter called the 'Supplier', which expression shall, where the context so admits, include its successors and assigns) represented by the Secretary to the said Government, Electrical Department, for the time being Mr.....of the one part AND HIS EXCELLENCY THE GOVERNOR OF MADRAS in the exercise of the executive authority of the Province of Madras (hereinafter called the 'Consumer', which expression shall where the context so admits, include his successors in office and assigns) of the other part.

WHEREAS the Consumer has requested the Supplier to furnish to him a supply of electrical energy upto 700 K.W. for the purpose of distribution by the Consumer in Hindupur area of the Province of Madras and for any other purposes for which the Consumer may require such energy;

AND WHEREAS the Supplier has agreed to supply such energy to the Consumer for the period and upon the terms and conditions hereinafter set forth;

NOW THESE PRESENTS WITNESS that the parties have agreed in manner following, that is to say:-

1. (i) The Supplier agrees to supply to the Consumer electrical energy up to 700 K.W. in bulk at the point of supply mentioned in clause 2 hereof at 33 K.V. 3-phase, 25 cycles, which may be converted to 33 KV, 3-phase, 50 cycles, sometime in the year 1949-50 or later.

(ii) In the event of the Consumer requiring at any time a supply of more than 700 K.W., such additional supply as the Supplier may agree to afford may be made by the Supplier to the Consumer on terms and conditions to be mutually agreed upon, provided <u>inter alia</u> that the Consumer gives intimation of his requirements at least three months in advance.

2. The point of supply shall be at a place to be mutually agreed upon in the neighbourhood of Hindupur but within the border of the Mysore territory and a single 33 K.V. line and telephone line shall be run from the Supplier's present terminal at Doddaballapur to Pavagada through the point of supply, at the expense of the Supplier and the Supplier will at its expense lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such delivery and for metering at the point of supply. The cost of line within the Mysore territory, the cost of line to Pavagada inclusive of 5 miles line passing through the intervening Madras territory, and that of the 33 K.V. metering equipment, will be borne by the Supplier. The cost of line within Madras territory, except that in the intervening territory mentioned above, will be borne by the Consumer.

3. (i) The Supplier will take all reasonable precautions to ensure a supply of power to the Consumer and the due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the Supplier shall not be liable to the Consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of theSupplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the Supplier, provided always that the Supplier shall give notice as early as possible of the probable duration of any interruption in the supply due to any of the aforesaid causes and will use every practicable means to make the period of interruption as short as possible.

(ii) If at any time the Consumer is prevented from receiving ~~t~~ and using the electrical energy to be supplied under this agreement either in whole or in part owing to any strikes, riots, insurrections, lawful command of a Civil or Military authority, fire, explosion, act of God or any other cause beyond

the control of the Consumer, the minimum charge under this agreement shall be reduced in proportion to the ability of the Consumer to take supply.

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the Consumer under this agreement, there shall be provided by the Supplier one suitable 33 K.V. metering equipment at the point of supply within the border of the Mysore territory, which shall be the property of and be kept in repair and calibrated by the Supplier. The consumer shall be charged meter rent in accordance with the rules from time to time in force in the Department of Electricity of the Supplier.

5. The Consumer may at his own expense install check meters at the metering point of the Supplier.

6. The meters belonging to the Supplier shall be kept properly sealed by the Supplier, and the meters belonging to the Consumer shall be kept properly sealed by the Consumer. The meters shall not be interferred with by either party except after due intimation to the other party.

7. The readings of the said meters installed by the Supplier shall be taken by the accredited representatives of the Supplier at or as near noon as practicable on the last day of each calendar month, and the readings so taken shall be binding and conclusive between the Supplier and the Consumer as to the amount of electrical energy supplied to the Consumer. The Consumer's representative may arrange to be present at the time of taking the readings. In the event of any meter being found defective and a check meter not having been installed, the power consumed for the period during which the meter was defective shall be determined by taking the daily average consumption for the previous period of supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

8. (i) Once in every year the meters shall be calibrated and standardised if considered necessary by the Supplier, in the presence of a representative of the Consumer.

(ii) Adjustments in bills will be made for error at average load and power-factor of the Consumer, when the meter is found to be incorrect during annual periodical tests, for a preceding period of three months unless there is evidence for adopting a different period. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

9. Either party to this agreement, may, at any time and after reasonable notice to the other party, have a special test carried out of any or all the meters belonging to the Supplier above mentioned at a place to be fixed by mutual agreement. The meter or meters so tested shall be deemed to be correct if as a result of such test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force. If the mean error be found to be more than that prescribed by the said Indian Electricity Rules or any statutory modification thereof for the time being in force, the Supplier will deduct from or add to the account of the preceding period of three months an amount equivalent to the error. The expenses of such test shall be borne by the Supplier in the event of the account requiring ~~a~~ any adjustment as hereinbefore mentioned. If no adjustment of the account is necessary as a consequence of such special test, the party at whose instance the test was conducted shall bear the costs of such tests.

10. The rates to be charged by the Supplier for the power supply at the point of supply under this agreement will be

in accordance with the high tension tariff set out below:--

Class and total monthly consumption in K.W.H.	Rate per K.W.H. Anna.		Rate per K.W. of maximum demand per month.
I. Upto 1,00,000	0.450	Plus	Upto 1,000 K.W.:Rs.3/
II. Exceeding 1,00,000 & upto 1,50,000	0.425		
III. " 1,50,000 " 2,00,000	0.400		
IV. " 2,00,000 " 3,00,000	0.375		1,000 K.W. and over : Rs.2/12/=
V. " 3,00,000 " 5,00,000	0.350		
VI. " 5,00,000 " 10,00,000	0.325		
VII. " 10,00,000	0.300		

The above tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment defined in clause 12, provided the consumption is in excess of 1,20,000 units per month. If the consumption is below 1,20,000 units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in clause 12.

11. For the purpose of this agreement, the maximum demand of supply to the Consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

12. (i) Maximum demand charges for any month and at the point of supply shall be based on maximum kilowatt demand, as determined in accordance with clause 11, for the pervious calendar months commencing from January of each year and ending with the month in question. For the first calendar year of service the demand charge for any month will be based on the maximum kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum demand for that month.

(ii) The demand payment will be fixed monthly charge, whether energy is consumed or not, and shall constitute the minimum monthly payment.

13. The power-factor of the plant and apparatus owned by the Consumer at the point of supply shall not be less than 0.8. Should the power-factor be below 0.8 and more than 0.7 it is liable to a penalty of 8 annas (eight annas) per K.W. of monthly demand while if the power-factor drops below 0.7 it must be brought up by methods approved by the Engineers of the Supplier, failing which the service may be discontinued. For purposes of this clause, the power-factor shall be that determined during the half-hour of maximum demand on any working day in the month.

14. The Supplier reserves the right to discontinue supply of power for purposes of testing for a period not exceeding one hour once every month, and also at any other time, if it should appear necessary for the Supplier to test any portion of the plant in order to secure subsequent continuity of supply, or for the purpose of connecting new machinery. These monthly stoppages may, at the option of the Supplier, be extended on duenotice upto six hours once every six months. No reduction of the monthly charges shall be claimed by the Consumer on this account.

15. The Supplier and the Consumer agree that no tax shall be levied by either of them on the other in respect of the supply under this Agreement. If any such tax is levied, the party so taxed shall be reimbursed by the other party to the extent of the tax so levied. The Consumer shall exempt from the operation of the Madras Motor Vehicles Taxation Act, 1931, the motor vehicles belonging to the Mysore Government Electricity Department and to the officers of that Department specified below, when used on (1) the Madugiri-Madakasira-Pavagada Road, (2)the Goribidnur-Hindupur-Parigi-Madakasira Road, or (3) the Madakasira-Dommatimari-Penukonda Road for the purpose of construction, operation or maintenance of the transmission and telephone lines in the territory of the Consumer:-

(i) The Chief Electrical Engineer to the Government of Mysore, Bangalore.

(ii) The Deputy Chief Electrical Engineer, Bangalore.

(iii) The Technical Assistant to the Chief Electrical Engineer.

(iv) The Superintendent of Lines, Bangalore.

(v) The Assistant Superintendent of Lines, Bangalore.

(vi) The Superintendent, Power & Light, Chickballapur.

(vii) The Assistant Superintendent, Power & Light, Chickballapur.

(viii) The Government Electric Inspector, Bangalore.

(ix) The Assistant Government Electric Inspector, Bangalore.

16. The Supplier shall, within fifteen days after the expiration of each calendar month, deliver to the Consumer on account stating the number of units supplied to the Consumer by the Supplier in accordance with the readings of the aforesaid meters and the amount payable therefor as also the amount payable in respect of the maximum demand charge and other charges, if any, payable by the Consumer to the Supplier, and the Consumer shall pay the same within thirty days from the delivery of such account. Provided that the Supplier shall be at liberty to charge interest at the rate of 7 per cent (seven per cent) per annum on the amounts of such bills as are not paid within the abovesaid period of thirty days in addition to and without prejudice to the other rights of the Supplier herein contained.

17. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid, or if the Consumer shall not in all things perform and observe the conditions herein contained and on the part of the Consumer to be observed and performed, then and in such cases and in addition to any other right or power possessed by the Supplier, the Supplier shall be at liberty at any time thereafter, notwithstanding that the supplier may not have taken advantage of any previous breach or default or event of a like nature, at its choice to suspend all further supply of electrical energy under this agreement, or to discontinue the supply once for all. Such suspension or discontinuance of the supply of electrical

energy shall not relieve the Consumer of his liability to pay the minimum charge provided for herein, nor shall such suspension or discontinuance affect any right, claim, demand, or power, which may have accrued to the Supplier.

18. (i) This agreement shall, subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of the supply of electrical energy under this agreement.

(ii) At the request of the Consumer this agreement may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the Supplier and the Consumer.

19. The Consumer confers on the Supplier the right of construction, operation or maintenance, of the electric and telephone lines referred to above through the territory of the Consumer and also the right of extending the lines within the Supplier's territory and beyond the territory of the Consumer for a period of 60 years (inclusive of the period of this agreement) in the first instance.

20. The Consumer shall give the Supplier all necessary facilities for clearing jungle lands for the required width for the satisfactory running and maintenance of the above lines through the territory of the Consumer, and the Consumer shall not charge the Supplier compensation or royalty in any shape or form on account of these works on the Government lands within the Consumer's territory.

21. Any dispute or difference arising between the Supplier and the Consumer or their respective Electrical Engineers, as to the supply of electrical energy or the pressure thereof, or as to the rates of supply, or as to the interpretation of this agreement or the right of the Supplier or the Consumer to determine the same or any other question, matter or thing arising hereunder, shall be referred to a single arbitrator to be mutually agreed upon by

both the parties, and the arbitrator's decision thereon shall be final and binding on both the parties.

IN WITNESS WHEREOF the Secretary to the Government of His Highness the Maharaja of Mysore, Electrical Department, for the time being Mr.....for and on behalf of the Government of His Highness the Maharaja of Mysore, and.....-.....Chief Engineer for Electricity to the Government of Madras, for and on behalf of and by the order and direction of His Excellency the Governor of Madras, have hereunto set their hands.

Enc: A Draft Agreement a letter

10 September

The

Electrical Department.

To

The Chief Electrical Engineer in Mysore.

Subject:- Supply of electric power to Hindupur - Draft Agreement.

Sir,

In continuation of this office memo No. EDS.3201/ Elec.298-45-23 dated the 30th March 1948 on the above subject, I am directed to forward herewith for your remarks a copy of letter No.648.E/46-25 dated 17th August 1948 and of its enclosure, received from the Secretary to the Government of Madras, Public Works Department.

Yours faithfully,

10/9

for Secretary to Government,
Electrical Department.

Letter No. 648.E/46-25 dated 17th August 1948 from the Secretary to the Government of Madras, Public Works Department to the Chief Secretary to Government, Bangalore.

Subject:- Supply of electric power to Hindupur - Draft Agreement.

***

Ref: Mysore Government's letter No. EDS. 1628/Elec. 298-45-21 dated 15th December 1947.

I am directed to state that the Madras Government accept the draft agreement subject to the following remarks:-

Preamble: The load dorecast of power needs for each of the first 8 years described in para 2 of the preamble, though correct, is not usually provided for in the preamble or in the agreement proper. It will be enough if the power required by the Madras Government is indicated in broad outline - 700 K.W. The portion reading "as detailed in the margin in bulk at the point hereinafter to be decided upon" and the details furnished in the margin may be omitted.

Clause (2): It is not essential to specify so many villages through which the proposed line of the Mysore Government to Pavagada will pass, as most of the villages lie in the Mysore territory. The words "via Goribidnur, Chandanadaru, Tingluru, Teriyur, Chickka, Dalavatta, Vithalapura and Basavanahatti" may therefore be deleted.

Clause 13: This clause may be numbered as 14 and the subsequent clauses suitably renumbered.

Clause 14: This clause may be suitably recast embodying the provisions in the Madras Government's proceedings No.832, Home, dated 6th March 1948.

It is observed that the expression "for a period of 60 years at the outset" in line 5 of this clause is an addition made by the Mysore Government. In the agreement for supply of Mysore power at Kollegal, where a similar provision for exemption of the supplier's vehicles from the Motor Vehicles Taxation Act has been made, the period has not been specified. The expression may therefore be deleted.

2. Besides the above modifications, certain minor modifications are also found necessary. A revised copy of the draft agreement, embodying all the above modifications is forwarded herewith. The acceptance of the Mysore Government to the revised draft may please be obtained and communicated to this Government at an early date.

GOVERNMENT OF MYSORE
ELECTRICAL DEPARTMENT

OFFICE OF THE CHIEF ELECTRICAL ENGINEER,

Bangalore, 15th October 1948
Camp - Mysore 18
(MYSORE, S. INDIA.)

GENERAL & REVENUE SECRETARIAT
No 1219
20 OCT 1948

The Secretary to the Govt. of Mysore,
Electrical Department,
~~BANGALORE~~ (Camp) Mysore.

Sir,

Subject:- Supply of electric power to Hindupur - Draft Agreement.

A)

With reference to your letter No. EDS. 967/Elecl. 298-45-25 dated the 10th ultimo, forwarding a copy of the letter and its enclosure received from the Secretary to the Government of Madras, Public Works Department, on the above subject, I have the honour to state as follows:-

Preamble. The correction suggested by the Government of Madras may be accepted.

B) Clause 2. The object of mentioning the villages is explained in my letter No. 15648 dated 25th November 1947. Even though these villages lie within the Mysore territory, the Government of Madras have the choice to select any point on the line running through the villages enumerated and not specially ask us to deviate the line, thus increasing our capital cost, merely to reduce the capital cost to be incurred by them. Therefore it is very necessary that these villages are mentioned. However, if the Government of Madras do not wish to have so many villages enumerated, at least Goribidnur, Dalavatta, Vithalapura and Basavanhatti must be mentioned. Hence the Government of Madras may be requested to accept this, as it will not affect them in any way adversely.

Clause 13. The numbering of this clause as 14 and the re-numbering of the subsequent clauses suitably be accepted.

Clause 14. The modification suggested be accepted, subject however to the condition that the period of 50 years must be retained. The object is that if the power supply to Hindupur, which is for a limited period as per agreement, were to be discontinued either at supplier's or consumer's request at the

P.T.O.

118

end of the period of the agreement, the line constructed by this department between Goribidnur and Pavagada will be continued to be kept in service through the Madras territory until other alternative arrangements are made for supply of power to the place. Therefore a period of 50 years is considered as a reasonable period for alternative arrangements being made for supply of power to Pavagada after the termination of this agreement. Further if the line is to be maintained, the exemption from payment of Vehicular Tax for the same period is also necessary.

With regard to the minor corrections made in Clause 2 and Clause 3(ii) may be accepted.

The ~~rates~~ routes specified under clause 15 may also be accepted. In this connection I invite reference to clause 11(a) of Kollegal agreement wherein we have added a sub-clause prescribing the surcharge of 10%. This will also have to be included in this agreement as the amount of power and the rates are identical. Accordingly a sub-clause as 10(a) has been incorporated.

A revised draft agreement on the basis of the above remarks is enclosed for favour of communication to the Government of Madras.

Yours faithfully,

Chief Electrical Engineer.

MH-CSC.

GOVERNMENT OF MYSORE. ELECTRICAL DEPARTMENT.

AGREEMENT MADE THIS .....day of..... .....One thousand nine hundred and forty.....BETWEEN THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE (hereinafter called the 'Supplier', which expression shall, where the context so admits, include its successors and assigns) represented by the Secretary to the said Government, Electrical Department, for the time being Sri..... of the one part AND HIS EXCELLENCY THE GOVERNOR OF MADRAS in the exercise of the executive authority of the Province of Madras (hereinafter called the 'Consumer' which expression shall where the context so admits, includes his successors in office and assigns) of the other part.

WHEREAS the Consumer has requested the Supplier to furnish to him a supply of electrical energy up to 700 K.W., for the purpose of distribution by the Consumer in Hindupur area of the Province of Madras and for any other purposes for which the Consumer may require such energy:

AND WHEREAS the Supplier has agreed to supply such energy to the Consumer for the period and upon the terms and conditions hereinafter set forth;

NOW THESE PRESENTS WITNESS that the parties have agreed in manner following, that is to say:-

1. (i) The Supplier agrees to supply to the Consumer electrical energy up to 700 K.W. in bulk at the point of supply mentioned in clause 2 hereof at 33 K.V. 3 phase, 25 cycles, which may be converted to 33 K.V. 3 phase, ~~25~~ 50 cycles, ~~which may be converted to 48~~ sometime in the year 1949-50 or later.

(ii) In the event of the Consumer requiring at any time a supply of more than 700 K.W. such additional supply as the Supplier may agree to afford may be made by the Supplier to the Consumer on terms and conditions to be mutually agreed upon, provided inter alia that the Consumer gives intimation of his

CONTD.

120

requirements at least three months in advance.

2. The point of supply shall be at a place to be mutually agreed upon in the neighbourhood of Hindupur but within the border of the Mysore territory and a single 33 K.V. line and telephone line shall be run from the Supplier's present terminal at Doddaballapur to Pavagada via Goribidnur, Dalavatta, Vithalapura & Basavanhatti through the point of supply, at the expense of the Supplier and the Supplier will at his expense lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such delivery and for metering at the point of supply. The cost of line within the Mysore territory, the cost of line to Pavagada inclusive of 5 miles line passing through the intervening Madras territory and that of the 33 K.V. metering equipment, will be borne by the ~~Consumer~~ Supplier. The cost of line within Madras territory, except that in the intervening territory mentioned above, will be borne by the Consumer.

3.(i) The Supplier will take all reasonable precautions to ensure a supply of power to the Consumer and the due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the Supplier shall not be liable to the Consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the Supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the Supplier, provided always that the Supplier shall give notice as early as possible of the probable duration of any interruption in the supply due to any of the aforesaid causes and will use every practicable means to make the period of interruption as short as possible.

(ii) If at any time the Consumer is prevented from receiving and using the electrical energy to be supplied under this agreement either in whole or in part owing to any strike, riots, insurrection lawful command of a Civil or Military authority, fire, explosion,

CONTD.

act of God or any other cause beyond the control of the Consumer, the minimum charge under this agreement shall be reduced in proportion to the ability of the Consumer to take supply.

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the Consumer under this agreement, there shall be provided by the Supplier one suitable 33 KV metering equipment at the point of supply within the border of the Mysore territory, which shall be the property of and be kept in repair and calibrated by the Supplier. The consumer shall be charged meter rent in accordance with the rules from time to time in force in the Department of Electricity of the Supplier.

5. The Consumer may at his own expense install check meters at the metering point of the supplier.

6. The meters belonging to the Supplier shall be kept properly sealed by the Supplier, and the meters belonging to the Consumer shall be kept properly sealed by the Consumer. The meters shall not be interfered with by either party except after due intimation to the other party.

7. The readings of the said meters installed by the Supplier shall be taken by the accredited representatives of the Supplier at or as near noon as practicable on the last day of each calendar month, and the readings so taken shall be binding and conclusive between the Supplier and the Consumer as to the amount of electrical energy supplied to the Consumer. The Consumer's representative may arrange to be present at the time of taking the readings. In the event of any meter being found defective and a check meter not having been installed, the power consumed for the period during which the meter was defective shall be determined by taking the daily average consumption for the previous period of supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory

CONTD.

modification thereof for the time being in force.

8.(i) Once in every year the meters shall be calibrated and standardised if considered necessary by the Supplier, in the presence of a representative of the Consumer.

(ii) Adjustments in bills will be made for error at average load and power-factor of the Consumer, when the meter is found to be incorrect during annual periodical tests, for a preceding period of three months unless there is evidence for adopting a different period. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

9. Either party to this agreement, may, at any time and after reasonable notice to the other party, have a special test carried out of any or all the meters belonging to the Supplier above mentioned at a place to be fixed by mutual agreement. The meter or meters so tested shall be deemed to be correct if as a result of such test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force. If the mean error be found to be more than that prescribed by the said Indian Electricity Rules or any statutory modification thereof for the time being in force, the Supplier will deduct from or add to the account of the preceding period of three months an amount equivalent to the error. The expense of such test shall be borne by the Supplier in the event of the account requiring any adjustment as hereinbefore mentioned. If no adjustment of the account is necessary as a consequence of such special test, the party at whose instance the test was conducted shall bear the costs of such tests.

10. The rates to be charged by the Supplier for the power supply at the point of supply under this agreement will be in accordance with the high tension tariff set out below:-

CONTD.

Class and total monthly consumption in K.W.H.		Rate per K.W.H. Annas		Rate per K.W. of maximum demand per month.
I. Up to 1,00,000		0.450	Plus	Up to 1,000 K.W Rs.3/-
II. Exceeding 1,00,000 & up to 1,50,000		0.425		
III. " 1,50,000 " 2,00,000		0.400		
IV. " 2,00,000 " 3,00,000		0.375		1,000 K.W and over Rs 2-12-0
V. " 3,00,000 " 5,00,000		0.350		
VI. " 5,00,000 " 10,00,000		0.325		
VII. " 10,00,000		0.300		

The above tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment defined in clause 12, provided the consumption is in excess of 1,20,000 units per month. If the consumption is below 1,20,000 units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in clause 12

New P.662

10.(a) The above tariff and the maximum overall unit charges are further subject to a sur-charge of 10% or such other rate as may be levied from time to time by the Government of Madras on the Consumers served by the Electricity Department of the Government of Madras from their Hydro-Electric Stations.

11. For the purpose of this agreement, the maximum demand of supply to the Consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

12. (i) Maximum demand charges for any month and at the point of supply shall be based on maximum kilowatt demand, as determined in accordance with clause 11, for the previous calendar months commencing from January of each year and ending with the month in question. For the first calendar year of service the demand charge for any month will be based on the maximum kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum demand for that month.

(ii) The demand payment will be a fixed monthly charge, whether energy is consumed or not, and shall constitute the minimum monthly payment.

CONTD.

13. The power-factor of the plant and apparatus owned by the Consumer at the point of supply shall not be less than 0.8. Should the power-factor be below 0.8 and more than 0.7 it is liable to a penalty of 8 annas (eight annas) per K.W. of monthly demand while if the power-factor drops below 0.7, it must be brought up by methods approved by the Engineers of the Supplier, failing which the service may be discontinued. For purposes of this clause, the power-factor shall be that determined during the half-hour of maximum demand on any working day in the month.

14. The Supplier reserves the right to discontinue supply of power for purposes of testing for a period not exceeding one hour once every month, and also at any other time, if it should appear necessary for the Supplier to test any portion of the plant in order to secure subsequent continuity of supply, or for the purpose of connecting new machinery. These monthly stoppages may, at the option of the Supplier, be extended on due notice up to six hours once every six months. No reduction of the monthly charges shall be claimed by the Consumer on this account.

15. The Supplier and the Consumer agree that no tax shall be levied by either of them on the other in respect of the supply under this Agreement. If any such tax is levied, the party so taxed shall be reimbursed by the other party to the extent, of the tax so levied. The Consumer shall for a period of 60 years at the out set exempt from the operation of the Madras Motor Vehicles Taxation Act, 1931, the motor vehicles belonging to the Mysore Government Electricity Department and to the officers of that Department specified below, when used on (1) the Madhugiri-Madakasira Road, - Pavagada Road (2) the Goribidnur-Hindupur-Parigi-Madakasira Road, or (3) the Madakasira -Dommatimari-Penukonda Road for the purpose of construction, operation or maintenance of the transmission and telephone lines in the territory of the Consumer:-

Vide S.R.O. 3201/Stat 298-45 30-3-48.

(i) The Chief Electrical Engineer to the Government of Mysore, Bangalore.

(ii) The Deputy Chief Electrical Engineer, Bangalore.

CONTD.

(iv) The Superintendent of Lines, Bangalore.

(v) The Assistant Superintendent of Lines, Bangalore.

(vi) The Superintendent, Power and Light, Chickballapur.

(vii) The Assistant Superintendent, Power and Light, Chickballapur.

(viii) The Government Electric Inspector, Bangalore.

(ix) The Assistant Government Electric Inspector, Bangalore.

16. The Supplier shall, within fifteen days after the expiration of each calendar month, deliver to the Consumer an account stating the number of units supplied to the Consumer by the Supplier in accordance with the readings of the aforesaid meters and the amount payable therefor as also the amount payable in respect of the maximum demand charge and other charges, if any, payable by the Consumer to the Supplier, and the Consumer shall pay the same within thirty days from the delivery of such account. Provided that the Supplier shall be at liberty to charge interest at the rate of 7 per cent (seven per cent) per annum on the amounts of such bills as are not paid within the above said period of thirty days in addition to and without prejudice to the other rights of the Supplier herein contained.

17. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid, or if the Consumer shall not in all things perform and observe the conditions herein contained and on the part of the Consumer to be observed and performed, then and in such cases and in addition to any other right or power possessed by the Supplier, the Supplier shall be at liberty at any time thereafter, notwithstanding that the Supplier may not have taken advantage of any previous breach or default or event of a like nature, at its choice to suspend all further supply of electrical energy under this agreement, or to discontinue the supply once for all. Such suspension or discontinuance of the supply of electrical energy shall not relieve the Consumer of his liability

CONTD.

to pay the minimum charge provided for herein, nor shall such suspension of discontinuance affect any right, claim demand or power which may have accrued to the Supplier.

18. (i) This agreement shall, subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of the supply of electrical energy under this agreement.

(ii) At the request of the Consumer this agreement may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the Supplier and the Consumer.

19. The Consumer confers on the Supplier the right of construction, operation or maintenance, of the electric and telephone lines referred to above through the territory of the Consumer and also the right of extending the lines within the Supplier's territory and beyond the territory of the Consumer for a period of 60 years (inclusive of the period of this agreement) in the first instance.

20. The Consumer shall give the Supplier all necessary facilities for clearing jungle lands for the required width for the satisfactory running and maintenance of the above lines through the territory of the Consumer, and the Consumer shall not charge the Supplier compensation or royalty in any shape or form on account of these works on the Government lands within the Consumer's territory.

21. Any dispute or difference arising between the Supplier and the Consumer or their respective Electrical Engineers, as to the supply of electrical energy or the pressure thereof, or as to the rates of supply, or as to the interpretation of this agreement or the right of the Supplier or the Consumer to determine the same or any other question, matter or thing arising hereunder, shall be referred to a single arbitrator to be mutually agreed upon by both the parties, and the arbitrator's decision thereon shall be final and binding on both the parties.

CONTD.

Camp Mysore,

CONFIDENTIAL.

Dear Sri Visvesvaryya,

I am enclosing herewith my reply to your official letter No. EDS 967 dated the 10th ultimo, on the subject of power supply to Hindupur. It is a matter for special consideration of Government whether this agreement be completed in view of the fact that the Govt. of Madras during our recent negotiations have not come to an amicable settlement with regard to power generation at Mekadatu. I am of the opinion that this power supply should not be agreed to until the question of power generation at Mekadatu is finally settled.

I would therefore request you kindly to obtain the special orders of the Minister for Law and Labour before the revised draft agreement is sent to the Govt. of Madras.

Yours sincerely,

Sir,

SUPPLY OF ELECTRIC POWER TO HINDUPUR - DRAFT AGREEMENT.

...

Ref: Your No. Eds.1401, dated 19-10-48 and Madras Government's Rt.letter No.643 E/48-29, P.W., dated 13-12-1948.

I am directed to invite your attention to the references cited and to request that the reply to the Madras Government's letter No. 643 E/46-25, Public Works, dated 17-8-1948 may kindly be expedited. This Government have already entered into firm commitments and incurred considerable expenditure over the Hindupur scheme based on the assurance contained in Mysore Government's letter No. EDS.694/Elel.298-45-6, dated

P.T.O.

OFFICE OF THE ~~GENERAL SUPERINTENDENT~~
CAUVERY POWER SCHEME.

BANGALORE, 2nd April 1949
(S. INDIA)

Dear Sri Visvesvarayya,

I would invite your kind reference to this office No.14625 dated the 19th October 1948, forwarding my comments over the various clauses of the agreement for power supply at Hindupur and would request you kindly to let me know, if the revised draft agreement has been transmitte to the Govt. of Madras. As the question of power generation at Mekadatu has been decided, the agreement for power supply at Hindupur may be completed. I am anxious for its completion for the reason that we have to run the Pavagada Transmission Line through Madras territory.

I cannot write to the Govt. of Madras to give me the right of the way for running this line unless Government approve of the completion of the agreement, the draft of which was sent to you some time ago.

I would therefore request you kindly to obtain approval of Government to my contacting the Chief Engineer for Electricity, Govt. of Madra to authorise me to proceed with the construction of the Pavagada Transmission Line through Madras territory, pending completion of the agreement. As the work has been held up, very early action in this behalf is requested.

Yours sincerely,

Sri H. V. Visvesvarayya, M.E.,
Secretary to the Govt. of Mysore,
Electrical Department,
BANGALORE.

GOVERNMENT OF MYSORE. ELECTRICAL DEPARTMENT.

AGREEMENT MADE THIS.....day of.....
.....One thousand nine hundred and forty-
.....BETWEEN THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE(hereinafter called the 'Supplier', which expression shall, where the context so admits, include its successors and assigns) represented by the Secretary to the said Government, Electrical Department, for the time being Sri.....of the one part AND HIS EXCELLENCY THE GOVERNOR OF MADRAS in the exercise of the executive - authority of the Province of Madras (hereinafter called the 'Consumer' which expression shall where the context so admits, includes his successors in office and assigns) of the other part.

WHEREAS the Consumer has requested the Supplier to furnish to him a supply of electrical energy up to 700 K.W., for the purpose of distribution by the Consumer in Hindupur area of the Province of Madras and for any other purposes for which the Consumer may require such energy:

AND WHEREAS the Supplier has agreed to supply such energy to the Consumer for the period and upon the terms and conditions hereinafter set forth:

NOW THESE PRESENTS WITNESS that the parties have agreed in manner following, that is to say:-

1. (i) The Supplier agrees to supply to the Consumer - electrical energy up to 700 K.W. in bulk at the point of supply mentioned in clause 2 hereof at 33 K.V. 3 phase, 25 cycles, which may be converted to 33 K.V. 3 phase, 50 cycles, sometime in the year 1949-50 or later.

(ii) In the event of the Consumer requiring at any time a supply of more than 700 K.W. such additional supply as the Supplier may agree to afford may be made by the Supplier to the Consumer on terms and conditions to be mutually agreed

upon, provided inter alia that the Consumer gives intimation of his requirements at least three months in advance.

2. The point of supply shall be at a place to be mutually agreed upon in the neighbourhood of Hindupur but within the - border of the Mysore territory and a single 33 K.V. line and telephone line shall be run from the Supplier's present terminal at Doddaballapur to Pavagada via Goribidnur, Dalavatta, - Vithalapura & Basavanahatti through the point of supply, at the expense of the Supplier and the Supplier will at his expense lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such delivery and for metering at the point of supply. The cost of line within the Mysore territory, the cost of line to Pavagada inclusive of 5 miles line passing through the intervening Madras territory and that of the 33 K.V. metering equipment, will be borne by the Supplier. The cost of line within Madras territory, except that in the intervening territory mentioned above, will be borne by the Consumer.

3. (i) The Supplier will take all reasonable precautions to ensure a supply of power to the Consumer and the due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the Supplier shall not be liable to the Consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the Supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the Supplier, provided always that the Supplier shall give notice as early as possible of the probable duration of any interruption in the supply due to any of the aforesaid causes and will use every practicable means to make the period of interruption as short as possible.

(ii) If at any time the Consumer is prevented from - receiving and using the electrical energy to be supplied under

--

this agreement either in whole or in part owing to any - strike, riots, insurrections, lawful command of a Civil or Military authority, fire, explosion, act of God or any other cause beyond the control of the Consumer, the minimum charges under this agreement shall be reduced in proportion to the ability of the Consumer to take supply.

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the Consumer under this agreement, there shall be provided by the Supplier one suitable 33 KV metering equipment at the point of supply - within the border of the Mysore territory, which shall be the property of and be kept in repair and calibrated by the - Supplier. The Consumer shall be charged meter rent in - accordance with the rules from time to time in force in the Department of Electricity of the Supplier.

5. The Consumer may at his own expense install check meters at the metering point of the Supplier.

6. The meters belonging to the Supplier shall be kept properly sealed by the Supplier, and the meters belonging to the Consumer shall be kept properly sealed by the Consumer. The meters shall not be interfered with by either party - except after due intimation to the other party.

7. The readings of the said meters installed by the Supplier shall be taken by the accredited representatives of the Supplier at or as near noon as practicable on the last day of each calendar month, and the readings so taken shall be binding and conclusive between the Supplier and the Consumer as to the amount of electrical energy supplied to the Consumer. The Consumer's representative may arrange to be present at the time of taking the readings. In the event of any meter being found defective and a check meter not having been installed, the power consumed for the period during - which the meter was defective shall be determined by taking the daily average consumption for the previous period of

..

supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

8. (i) Once in every year the meters shall be calibrated and standardised if considered necessary by the Supplier, in the presence of a representative of the Consumer.

(ii) Adjustments in bills will be made for error at average load and power-factor of the Consumer, when the meter is found to be incorrect during annual periodical tests, for a preceding period of three months unless there is evidence for adopting a different period. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

9. Either party to this agreement, may, at any time and after reasonable notice to the other party, have a special test carried out of any or all the meters belonging to the Supplier above mentioned at a place to be fixed by mutual agreement. The meter or meters so tested shall be deemed to be correct if as a result of such test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force. If the mean error be found to be more than that prescribed by the said Indian Electricity Rules or any statutory modification thereof for the time being in force, the Supplier will deduct from or add to the account of the preceding period of three months an amount equivalent to the error. The expenses of such test shall be borne by the Supplier in the event of the account requiring any adjustment as hereinbefore mentioned. If no

adjustment of the account is necessary as a consequence of such special test, the party at whose instance the test was conducted shall bear the costs of such tests.

10. The rates to be charged by the Supplier for the power supply at the point of supply under this agreement will be in accordance with the high tension tariff set out below:-

Class and total monthly consumption in K.W.H.			Rate per K.W.H. Anna		Rate per K.W. of maximum demand per month.
I. Up to	1,00,000		0.450		Up to 1,000 K.W Rs. 3/-
II. Exceeding	1,00,000 & up to	1,50,000	0.425		
III. ,,	1,50,000 ,,	2,00,000	0.400		
IV. ,,	2,00,000 ,,	3,00,000	0.375	Plus	1,000 K.W. and over Rs.2/12/-
V. ,,	3,00,000 ,,	5,00,000	0.350		
VI. ,,	5,00,000 ,,	10,00,000	0.325		
VII. ,,	10,00,000		0.300		

The above tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment defined in clause 12, provided the consumption is in excess of 1,20,000 units per month. If the consumption is below 1,20,000 units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in clause 12.

10.(a) The above tariff and the maximum overall unit charges are further subject to a sur-charge of 10% or such other rate as may be levied from time to time by the Government of Madras on the Consumers served by the Electricity Department of the Government of Madras from their Hydro-Electric Stations.

11. For the purpose of this agreement, the maximum demand of supply to the Consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

12. (i) Maximum demand charges for any month and at the point of supply shall be based on ximum kilowatt demand, as determined in accordance with clause 11, for the previous calendar months commencing from January of each year and

ending with the month in question. For the first calendar year of service the demand charge for any month will be based on the maximum kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum demand for that month.

(ii) The demand payment will be a fixed monthly charge, whether energy is consumed or not, and shall constitute the minimum monthly payment.

13. The power-factor of the plant and apparatus owned by the Consumer at the point of supply shall not be less than 0.8. Should the power-factor be below 0.8 and more than 0.7 it is liable to a penalty of 8 annas (eight annas) per K.W. of monthly demand while if the power-factor drops below 0.7, it must be brought up by methods approved by the Engineers of the Supplier, failing which the service may be discontinued. For purposes of this clause, the power-factor shall be that determined during the half-hour of maximum demand on any working day in the month.

14. The Supplier reserves the right to discontinue supply of power for purposes of testing for a period not exceeding one hour once every month, and also at any other time, if it should appear necessary for the Supplier to test any portion of the plant in order to secure subsequent continuity of supply, or for the purpose of connecting new machinery. These monthly stoppages may, at the option of the Supplier, be extended on due notice up to six hours once every six months. No reduction of the monthly charges shall be claimed by the Consumer on this account.

15. The Supplier and the Consumer agree that no tax shall be levied by either of them on the other in respect of the supply under this Agreement. If any such tax is levied, the party so taxed shall be reimbursed by the other party to the extent, of the tax so levied. The Consumer shall for a period ~~xied~~ of 50 years at the out-set exempt from the operation of

the Madras Motor Vehicles Taxation Act, 1931, the motor vehicles belonging to the Mysore Government Electricity Department and to the officers of that Department specified below, when used on (1) the Madhugiri-Madakasira Road, - Pavagada Road (2) the Goribidnur-Hindupur-Parigi-Madakasira Road, or (3) the Madakasira-Pommatimari-Penukonda Road for the purpose of construction, operation or maintenance of the transmission and telephone lines in the territory of the Consumer:-

(i) The Chief Electrical Engineer to the Government of Mysore, Bangalore.

(ii) The Deputy Chief Electrical Engineer, Bangalore.

(iii) The Technical Assistant to the Chief Electrical Engineer.

(iv) The Superintendent of Lines, Bangalore.

(v) The Assistant Superintendent of Lines, Bangalore.

(vi) The Superintendent, Power and Light, ~~Bangalore~~ Chickballapur.

(vii) The Assistant Superintendent, Power and Light, Chickballapur.

(viii) The Government Electric Inspector, Bangalore.

(ix) The Assistant Government Electric Inspector, Bangalore.

16. The Supplier shall, within fifteen days after the expiration of each calendar month, deliver to the Consumer an account stating the number of units supplied to the Consumer by the Supplier in accordance with the readings of the aforesaid meters and the amount payable therefor as also the - amount payable in respect of the maximum demand charge and other charges, if any, payable by the Consumer to the Supplier, and the Consumer shall pay the same within thirty days from the delivery of such account. Provided that the Supplier shall be at liberty to charge interest at the rate of 7 per cent (seven per cent) per annum on the amounts of such bills as are not paid within the above said period of thirty days in addition to and without prejudice to the other rights of the Supplier herein contained.

17. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid, or if the Consumer shall not in all things perform and observe the conditions herein contained and on the part of the Consumer to be observed and performed, then and in such cases and in addition to any other right or power possessed by the Supplier, the Supplier shall be at liberty at any time thereafter, not-withstanding that the Supplier may not have taken advantage of any previous breach or default or event of a like nature, at its choice to suspend all further supply of electrical energy under this agreement, or to discontinue the supply once for all. Such suspension or discontinuance of the supply of electrical energy shall not relieve the Consumer of his liability to pay the minimum charge provided for herein, nor shall such suspension or discontinuance affect any right, claim demand or power which may have accrued to the Supplier.

18. (i) This agreement shall, subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of the supply of electrical energy under this agreement.

(ii) At the request of the Consumer this agreement may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the Supplier and the Consumer.

19. The Consumer confers on the Supplier the right of construction, operation or maintenance, of the electric and telephone lines referred to above through the territory of the Consumer and also the right of extending the lines within the Supplier's territory and beyond the territory of the Consumer for a period of 60 years (inclusive of the period of this agreement) in the first instance.

20. The Consumer shall give the Supplier all necessary facilities for clearing jungle lands for the required width for the satisfactory running and maintenance of the above lines through the territory of the Consumer, and the Consumer shall not charge the Supplier compensation or royalty in any shape or form on account of these works on the Government lands within the Consumer's territory.

21. Any dispute or difference arising between the Supplier and the Consumer or their respective Electrical Engineers, as to the supply of electrical energy or the pressure thereof, or as to the rates of supply, or as to the interpretation of this agreement or the right of the Supplier or the Consumer to determine the same or any other question, matter or thing arising hereunder, shall be referred to a single arbitrator to be mutually agreed upon by both the parties, and the arbitrator's decision thereon shall be final and binding on both the parties.

IN WITNESS WHEREOF the Secretary to the Government of His Highness the Maharaja of Mysore, Electrical Department, for the time being Sri.....for and on behalf of the Government of His Highness the Maharaja of Mysore and.... .....Chief Engineer for Electricity to the Government of Madras, for and on behalf of and by the order and direction of His Excellency the Governor of Madras, have hereunto set their hands.

Memo No. EDS. 4216/Elecl

Dated, the Bangalore, 4th May 1949.

Copy of the above is forwarded with compliments to the Chief Electrical Engineer, with reference to the correspondence ending with his D.O. letter No. 1628 dated 4th April 1949.

By order,

Secretary to Government,
Electrical Department.

Elcl 298-45-28

Government of Madras
Public Works Department

Letter No. 643 E/S/46-38

CHIEF ENGINEER SECRETARIAT
No. 95
23 JUN 49
ELECTRICAL BRANCH

From

T.A.Varghese Esq., I.C.S.,
Secretary to Government.

To

The Chief Secretary to the Government of
Mysore, Bangalore.

Dated, FORT ST. GEORGE, the 25th June 1949.

Sir,

Sub:- ELECTRICITY--Supply of power to Hindupur--
Draft agreement.

Ref:- Mysore Government's letter No. D.D.S.4056/
Elecl. 298/45-27, dated 25-4-1949.

I am directed to state that the Madras Government accept the draft agreement forwarded with the letter cited above, subject to the following remarks:--

Clause 2:- It was already pointed out to the Mysore Government in Madras Government's letter No.643 E/S/46-25 dated 17th August 1948 that it was not essential to specify the names of villages through which the proposed line of the Mysore Government to Pavagada will pass. In the draft agreement now received, the names of certain villages--Goribidnur, Dalavatta, Vithalapura and Basavanahatti-have been retained. It is presumed that reference to these villages is intended to help locating the Mysore line to Pavagada through the narrowest gap in the Madras territory. This Government have no objection to the retention of the reference to these villages.

The word 'his' occurring in line 7 of the clause may be substituted by 'its'.

Clause 3 (ii):- The word 'strike' occurring in line 4 may be corrected as 'strikes'.

Clause 10 (a):- The views of this Government on this clause have been communicated separately-vide D.O. No. E/S/46-39 dated 25.6.1949. Copy appended.

Clause 15:- In letter No. 643 E/46-25 dated 17- the Mysore Government were requested to delete the expression 'for a period of 60 years at the outset' occurring in the clause. But the expression has been retained in the draft agreement now received. It may kindly be deleted.

P.T.O.

11(G)

2. With reference to the proposal in para 2 of the letter cited above, this Government have no objection to the Mysore Government running the transmission line to Pavagada through Madras territory and they may do so accordingly.

Yours faithfully,

A.J.ch

For Secretary to Government.

kvg/25/6/

AM
25/6/

No. 643-E/S/46-39. (4)

25th June 1949.

My dear Bashyam,

Sub:- Electricity - Supply of power to Hindupur - Draft agreement.

-:-

As you are aware, the Mysore Government in their letter No. EDS.694/Elel. 298-45-6 dated 11th September, 1946 agreed to supply electric power upto 700 K.W. to this Government for supply in Hindupur area. The terms for this supply were settled as early as in 1946, but a formal agreement has not yet been executed. The Mysore Government have since sent a revised draft agreement with their letter No.E.D.S.4056/Elecl. 298/45-27 dated 25th April, 1949 for the acceptance of this Government. The draft varies from the one prepared by this Government, and as regards minor variations they are being pointed out to Mysore in our letter No. 643-E/S/46-38 dated 25th June, 1949 (copy enclosed). One important variation to which I would like to invite your kind attention, is clause 10(a) newly added by Mysore Government, which provides that the tariff and the maximum overall unit charges for supply to Hindupur area are subject to a surcharge of 10% or such other rate as may be levied from time to time by the Government of Madras on the Consumers served by the Electricity Department of the Government of Madras from their Hydro-Electric Stations.

2. In the D.O. correspondence that passed between our Chief Engineer and the Chief Electrical Engineer, Mysore, in 1946, it was clearly stated that surcharge should not apply to the supplies to be given by the Mysore Government for Ceded Districts and Hindupur. There is accordingly no provision for surcharge in the agreement for supply ~~to~~ of Jog power to Ceded Districts, and it is but proper that similarly there should be no provision for surcharge in the agreement for Hindupur. The rates for supply to Hindupur proposed by this Government and agreed to by the Mysore Government as early as in September, 1946 in their letter No.E.D.S.694/Elecl./298/45/6 dated 11th September, 1946, do not provide for the levy of surcharge. The Hindupur Distribution Scheme of this Government was prepared and sanctioned in 1947 itself on the assumption that Mysore Power would be available to Hindupur at the rate already agreed to by the Mysore Government. This Government have taken up and proceeded with the Hindupur Scheme on the specific understanding that the rates for supply of Mysore power would be the same for Hindupur as for Ceded Districts, especially after confirmation of these rates by Mysore in their letter dated 11th September, 1946. It is too late for Mysore now to raise the question of surcharge at this stage by inserting a clause in the draft agreement, which was never put forward before. If this new clause is accepted, the revenue return on the Hindupur

Government of Madras
Public (Misc) Department

Letter No. 643 /46-1

From

T.A.Varghese Esq., I.C.S.,
Secretary to Government.

To

The Chief Secretary to the Government of
Mysore, Bangalore.

Dated, FORT ST. GEORGE, the 25th June 1949.

Sir,

Sub:- MALOCHANDRY--Supply of power to Madras--
Draft agreement.

Ref:- Mysore Government's letter No. M.D. 403
Elect. 29 /46-27 dated 25-4-1949.

I am directed to state that the Madras Government accept the draft agreement forwarded with the letter of reference, subject to the following remarks:--

Clause 4:- As was already pointed out to the Mysore Government in Madras Government's letter No. 6/46-35 dated 17th August 1946 that it was not correct to specify the names of villages through which the line of the Mysore Government to Madras will pass, the draft agreement has accepted, the names of the villages--Dorbhanam, [illegible], Mahalapur and Venkatti--have been retained. As for grant of wayleave to those villages is intended to help locating the exact line to be taken through the [illegible] territory. This Government have no objection to the retention of the villages in the agreement.

[illegible] in line 7 of the [illegible] to be substituted by 'that'.

Clause 2 (ii):- The word 'strike' occurring in line 4 may be substituted by 'stricken'.

Clause 1 (a):- The phrases [illegible] Government on this clause have been withdrawn subsequently-vide [illegible] 3/3/46-39 dated 25-6-1949. [illegible]

Clause 25:- [illegible] 3/4-45 dated [illegible] the Mysore Government [illegible] to delete the [illegible] sub-clause [illegible] clause [illegible]

Encls. Copy of letter and its enclosures)

FROM

The *Secretary to the Government of*
His Highness the Maharaja of Mysore.
Electrical Department,
Bangalore.

To

The Chief Electrical Engineer
to the Government of Mysore,
Bangalore.

Sir,

Subject:- Electricity - Supply of power to Hindupur - Draft Agreement.

In continuation of this office Memo No.EDs.4216/Elect. 298-45-27 dated the 25th April 1949 on the above subject, I am directed to forward herewith a copy of letter No.643 E/S/46-38 dated the 25th June 1949 and its enclosures received from the Secretary, Public Works Department, Government of Madras and to request you kindly to offer your views in the matter at a very early date.

Yours faithfully,

for Secretary to Government,
Electrical Department.

MKR/2

Letter No.643 E/S/46-38 dated the 25th June 1949 from the Secretary, Public Works Department, Government of Madras addressed to the Chief Secretary to the Government of Mysore, Bangalore.

Sub:- ELECTRICITY -- Supply of power to Hindupur -- Draft agreement.

Ref:- Mysore Government's letter No.E.D.S.4056/Elecl. 298/45-27 dated 25-4-1949.

I am directed to state that the Madras Government accept the draft agreement forwarded with the letter cited above, subject to the following remarks:--

Clause.2:- It was already pointed out to the Mysore Government in Madras Government's letter No.643 E/S/46-25 dated 17th August 1948 that it was not essential to specify the names of villages through which the proposed line of the Mysore Government to Pavagada will pass. In the draft agreement now received, the names of certain villages -- Goribidnur, Dalavatta, Vithalapura and Basavanahatti have been retained. It is presumed that reference to these villages is intended to help locating the Mysore line to Pavagada through the narrowest gap in the Madras territory. This Government have no objection to the retention of the reference to these villages.

The word 'his' occurring in line 7 of the clause may be substituted by 'its'.

Clause 3 (ii):- The word 'strike' occurring in line 4 may be corrected as 'strikes'.

Clause 10 (a):- The views of this Government on this clause have been communicated separately-vide D.O.No.643 E/S/46-39 dated 25-6-1949. Copy appended.

Clause 15:- In letter No.643 E/48-25 dated the 17th August 1948, the Mysore Government were requested to delete the expression 'for a period of 60 years at the outset' occurring in the clause. But the expression has been retained in the draft agreement now received. It may kindly be deleted.

2. With reference to the proposal in para 2 of the letter cited above, this Government have no objection to the Mysore Government running the Transmission line to Pavagada through Madras territory and they may do so accordingly.

"COPY".

Secretary to Government,
Electrical Department.

MKR/2

Letter No.643-E/S/46-39 dated the 25th June 1949 from the Minister for Public Works, Government of Madras addressed to the Minister for Law and Labour , Government of Mysore, Bangalore.

Sub:- Electricity - Supply of power to Hindupur - Draft agreement.

As you are aware, the Mysore Government in their letter No.EDS. 694/Elecl. 298-45-6 dated 11th September, 1946 agreed to supply electric power upto 700 K.W. to this Government for supply in Hindupur area. The terms for this supply were settled as early as in 1946, but a formal agreement has not yet been executed. The Mysore Government have since sent a revised draft agreement with their letter No.E.D.S.4056/Elecl. 298/45-27 dated 25th April 1949 for the acceptance of this Government. The draft varies from the one prepared by this Government, and as regards minor variations they are being pointed out to Mysore in our letter No.643-E/S/46-38 dated 25th June, 1949 (copy enclosed). One important variation to which I would like to invite your kind attention, is clause 10(a) newly added by Mysore Government, which proveds that the tariff and the maximum overall unit charges for supply to Hindupur area are subject to a surcharge of 10% or such other rate as may be levied from time to time by the Government of Madras on the Consumers served by the Electricity Department of the Government of Madras from their Hydro-Electric Stations.

2. In the D.O. correspondence that passed between our Chief Engineer and the Chief Electrical Engineer, Mysore, in 1946, it was clearly stated that surcharge should not apply to the supplies to be given by the Mysore Government for Ceded Districts and Hindupur. There is accordingly no provision for surcharge in the agreement for supply of Jog power to Ceded Districts, and it is but proper that similarly there should be no provision for surcharge in the agreement for Hindupur. The rates for supply to Hindupur proposed by this Government and agreed to by the Mysore Government as early as in September, 1946 in their letter No.E.D.S.694/Elecl./298/45/6 dated 11th September, 1946, do not provide for the levy of surcharge. The Hindupur Distribution Scheme of this Government was prepared and sanctioned in 1947 itself on the assumption that Mysore Power would be available to Hindupur at the rate already agreed to by the Mysore Government. This Government have taken up and proceeded with the Hindupur Scheme on the specific understanding that the rates for supply of Mysore power would be the same for Hindupur as for Ceded Districts, especially after confirmation of these rates by Mysore in their letter dated 11th September, 1946. It is too late for Mysore now to raise the question of surcharge at this stage by inserting a clause in the draft agreement, which was never put forward before. If this new clause is accepted, the revenue return on the Hindupur Scheme, which is already low, will be reduced further.

3. In the circumstances may I request you that the Mysore Government be moved to delete the surcharge clause, adhere to their original terms, and expedite the execution of the agreement.

"COPY".

Secretary to Government,
Electrical Department.

OFFICE OF THE CHIEF ELECTRICAL ENGINEER,
Bangalore, 30th July 1949.
(MYSORE STATE, INDIA)

GENERAL & REVENUE SECRETARIAT No 331 3 AUG 1949 ELECTRICAL BRANCH

The Secretary to the Govt. of Mysore,
Electrical Department,
BANGALORE.

Sir,

Subject:- Electricity - Supply of power to Hindupur - Draft Agreement.

With reference to your letter No.EDS.417/Elecl.298-45-30 dated the 28th instant, on the above subject, I have the honour to state as follows:-

Clause 2. As the Government of Madras have agreed to the insertion of the names of the villages, no further action is necessary.

The correction suggested in line 7 of the clause may be accepted.

Clause 3 (ii). The correction suggested may be accepted.

Clause 10(a). It is true that in the correspondence that passed between the two Governments in the year 1946 the surcharge clause was not included, but as the question of supply of power was not finalised, the terms offered then cannot be treated as final. The rates that were proposed are the rates that were being levied by the Government of Madras for their High Tension consumers. At the time these terms were being negotiated, Government of Madras were not levying surcharge to their consumers. Subsequently it was learnt that Government of Madras are levying surcharge to all consumers. In as much as the Government of Madras agreed to accept power supply and pay for the same at the rates at which they were charging to their H.T. consumers, it was but right that we included the surcharge clause in the present draft agreement in order to bring it in line with the charges levied by the Madras Electricity Department to their consumers. I therefore feel that there is no justification for its deletion.

P.T.O.

158

Clause 15. The period of 60 years has to be incorporated in this clause, as the Government of Madras in Clause 19 have agreed to give us permission to run the line through Madras territory for a period of 60 years. If our line exists in Madras terriotory, the right to run the vehicles of this department through the Madras territory free of taxes during the above period is also necessary. Therefore it has been incorporated in the Clause and the Government of Madras may be requested to accept the same in view of the fact that these vehicles will have to move about for the maintenance of the line so long as the line exists in Madras territory.

Para 2. I am glad that the Government of Madras have agreed to our construction of the Pavagada Transmission Line through Madras territory and accordingly necessary action is being taken.

Yours faithfully,

K. Anjaiah

Chief Electrical Engineer.

(PUBLIC WORKS DEPARTMENT)

G.O.Ms.No.3912 Dated the 19th October 1949.

READ:-

From the Chief Engineer (Electricity) letter 4 E/49-29 dated 19-9-1949.

ORDER.

Under rule 117(1) of the Indian Electricity Rules, 1937, His Excellency the Governor of Madras hereby exempts the Government of Mysore from the provisions of rules 62(1), 63, 66, 68, 69, 73 and 79 of the said rules in respect of works and supply to the Hindupur area in the Anantapur District of the Province of Madras subject to the condition that no conductor of an aerial line erected in, over, along or across any street shall be at a height less than twenty feet from the ground and at places other than road crossings the height from the ground shall be not less than 15 feet.

2. In exercise of the powers conferred by Section 51 of the Indian Electricity Act, 1910, (Central Act IX of 1910) His Excellency the Governor of Madras hereby confers upon the Chief Electrical Engineer to the Government of Mysore, for the placing of appliances and apparatus, for the transmission of electrical energy and telephone messages in the Hindupur area in the Anantapur District along the route indicated in the sketch forwarded by the Government of Mysore with their letter No.5640 dated 23-5-1949 to the Chief Engineer (Electricity), Madras the powers which the Telegraph authority possesses under sections 10 to 18 of the Indian Telegraph Act 1885 (Central Act XIII of 1885), with respect to the placing of telegraph lines and posts for the purposes of a telegraph established or maintained by the Government or to be so established or maintained. The 33 K.V.transmission line to Pavagada will enter the Madras territory near Nagenahalli at its southern end , will run close to Kodigenahalli and will leave the Madras territory near Agarampalli at its northern end. The exercise of these powers is subject to the provisions of the said Indian Telegraph Act and also to the following conditions:--

(1) All telegraph and telephone lines crossing the transmission line shall be efficiently guarded to the satisfaction of the Telegraph authority.

(2) In cases where telegraph and telephone lines are diverted or altered at the request of the Chief Electrical Engineer to the Government of Mysore, the cost of such diversion or alteration shall be borne by the Government of Mysore.

***
Letter No.643-E/S/46-48.

From T.A.Varghese, Esq., I.C.S.,
Secretary to Government.

To The Chief Secretary to the Government of Mysore
BANGALORE.

Dated, Fort St. George, the 27th December 1949.

Sir,

Sub: Electricity - Supply of power to Hindupur - Draft agreement.
Ref: From the Government of Mysore No.EWS.1007/Elecl.-298-45-32 dated 28-9-1949.

--

With reference to para 1 (c) of the letter cited above, I am directed to state that this Government are unable to accept the suggestion of the Mysore Government that clause 10(a) of the draft agreement should be retained. The terms of this agreement were negotiated by the Chief Engineer to this Government at a Conference with the Hon'ble Minister for Public Works, Mysore and the Chief Electrical Engineer on 25-10-1945 in Bangalore. As per this negotiation, this Government addressed the then Resident of Mysore in letter No.643-E/46-11 dated 10-7-1946 offering among other terms the tariff on which power should be supplied to this Government as agreed to at the Conference in Bangalore - vide para 1 (1) of that letter. This tariff was accepted by the Mysore Government in para 1 (1) of their letter No.EDS.694-Elec. 298-45-6 dated 11-9-1946. On the strength of that letter, this Government sanctioned the Hindupur distribution scheme in G.O.No. 355, Public Works, dated 8-2-1947. In clause 10 of the draft agreement forwarded by the Government of Mysore in their letter No.EDS. 1628/Elecl.-298-45-21 dated 15-12-1947, the agreed tariff had been provided for. This Government had therefore no reason to think that a Sub-Clause would subsequently be added to clause 10 of the draft which would materially alter the scope of the tariff which had already been agreed to. This Government took up the execution of the scheme on the strength of the correspondence summarised above and the works are almost completed. This Government had also issued instructions to their officers to render the Mysore Government all facilities to take their transmission line to Pavagada through the intervening territory in this Province. The intention to vary the tariff as contemplated in Clause 10 (a) of the revised draft communicated with Mysore letter EDS.4056/Elec.289-45-7 dated 25-4-1949 had not been discussed with representatives of this Government or agreed to by this Government.

2. The surcharge which this Government are levying on consumers in this Province is purely a measure of general taxation, and has no bearing on the administration of the Electricity Department. This surcharge will be varied from year to year according to the deficits in Provincial finance and the Electricity Department has little voice in fixing its quantum. Clause 10 (a) of the revised draft, would imply that the proceeds of this measure of taxation from the area

P.T.O.

served by the Hindupur Scheme, should be passed on to the Mysore Government. This implication cannot normally be accepted in an agreement between two States.

3. The terms of the Hindupur supply should not be compared, with those for Kollegal where it is at 13.2 K.V. and distribution at that voltage is straightaway possible. Supply at Hindupur is at 33. K.V. and a sub-station is required for stepping it down to the voltage of distribution viz. 11 K.V. and lower. I am therefore, to state that 33 K.V. bulk supply should be taken on a par with 66 K.V. supply at Ceded Districts. This was already pointed out by the Chief Engineer (Electricity), Madras, quite early in the negotiations with the Mysore Government and the Mysore Government had agreed to a tariff identical to that of the Ceded Districts. I am therefore to request that the Government of Mysore be moved to delete the surcharge clause 10 (a) from the draft agreement.

4. With reference to para 1 (d) of the Mysore letter quoted above, this Government note that Mysore may need exemption from taxation under the Motor Vehicles Taxation Act even beyond the period of the present agreement. This point can be settled when the agreement comes up for renewal at the end of 10 years.

5. This Government agree that the draft may provide for approval and confirmation of the agreement by the Government of India.

6. I am to request that the concurrence of the Government of Mysore to the above proposals may kindly be obtained and communicated to this Government at an early date.

Yours faithfully,

(T.A.Varghese)
SECRETARY TO GOVERNMENT.

GOVERNMENT OF MYSORE
ELECTRICAL DEPARTMENT

OFFICE OF THE CHIEF ELECTRICAL ENGINEER

Bangalore, 31st January 1950
(Mysore S. India.)

GENERAL & REVENUE SECRETARIATE
No. 3101
6 FEB 1950
ELECTRICAL BRANCH

1-2

The Secretary to the Govt. of Mysore,
Electrical Department,
BANGALORE.

SECRETARY TO GOVERNMENT
Date 2/2
PUBLIC WORKS & ELEC. DEPTS.

Sir,

Subject:- Electricity - Supply of power to Hindupur, Draft Agreement.

With reference to your letter No.EDS-3310/Elecl.298-45-35 dated the 23rd instant, forwarding a copy of the letter received from the Secretary to Government, Public Works Department, Government of Madras, on the above subject, I have the honour to state as follows:-

Sur-charge. The Government of Madras have stated that the sur-charge, which they are levying on consumers in the province of Madras, is purely a measure of general taxation and has no bearing on the administration of the Electricity Department and therefore they feel that the proceeds of the measure of taxation cannot be passed on to the Govt. of Mysore. I have to point out that I believe that the sur-charge levied at Kollegal is also a measure of taxation and the Govt. of Madras have agreed to pass on this income to us. I do not believe they can consider this as admissible in one case and inadmissible in another case.

It is true that in the case of agreement for power supply at Ujjini the surcharge clause was not included because at the time this agreement was negotiated the question of levy of surcharge was not in the forefront, but that cannot be considered as a reason why we should omit to include the same in the agreement to power supply to Hindipur, when we are definitely aware that the Govt. of Madras are levying sur-charge in the case of H.T. supply in their territory. However, in order

P.T.O.

not to prolong this correspondence I recommend to Government that this surcharge clause be deleted, provided the Law Secretary to Government agrees that if Govt. of Mysore were to levy any surcharge on consumers to be supplied with power from our system at some future date such a surcharge would be leviable for the supply effected to the Govt. of Madras on this agreement. Even though the surcharge clause is not specifically mentioned in the agreement, I am inclined to believe that it is leviable, because surcharge would be a measure of general taxation by an act of legislature and therefore will be applicable to the power supply under the agreement to be entered into, even though it is not included in the agreement. However, I would request you kindly to consult the Legal Department of the Government and if such a levy is admissible as and when the Govt. of Mysore introduce surcharge, the clause now objected to by the Govt. of Madras may be deleted.

With regard to the exemption from taxation under the Motor Vehicles Taxation Act even beyond the period of the present agreement, in asmuch as the Govt. of Madras have agreed to consider it favourably at the end of the present period of the agreement, its retention in the draft agreement need not be insisted upon.

Yours faithfully,

Chief Electrical Engineer.

GOVERNMENT OF MYSORE
ELECTRICAL DEPARTMENT

OFFICE OF THE CHIEF ELECTRICAL ENGINEER

Bangalore, 11th April 1950
(Mysore, S. India.)

GENERAL BRANCH 287 17

SECRETARY TO GOVERNMENT Date Elec 12/6 PUBLIC WORKS & ELEC DEPTS.

The Secretary to the Govt. of Mysore,
Electrical Department,
BANGALORE.

Sir,

Subject:- Electricity - Supply of power to Hindupur - Agreement.

In continuation of this office letter No.35116 dated the 1st February 1950, on the above subject, I have the honour to enclose herewith a copy of the letter I have received from the Chief Engineer for Electricity, Govt. of Madras.

In as much as no special line had to be run for power supply to Hindupur, but the supply was to be tapped off from the line that has been run from Goribidnur to Pavagada, the works of this department connected with the supply are ready and completed some time ago. Technically it is possible to arrange power supply immediately it is authorised to be done. The Chief Engineer for Electricity, Govt. of Madras, also states that his portion of the work is also ready. The draft agreement, both in respect of power supply to Hindupur and the draft agreement in respect of Mekadatu have not been yet finalised.

I request you kindly to obtain and communicate early orders of Government if power supply to Hindupur may be made available, pending finalising of the two agreements referred to above.

Yours faithfully,

Chief Electrical Engineer.

MH-CSC.

176

Copy of D.O.letter No.4 E/49-40 dated 6th April 1950 from the Chief Engineer for Electricity, Madras, to the Chief Electrical Engineer to the Govt. of Mysore, Bangalore.

Sub:- Electricity - Supply of power to Hindupur - Agreement.

In enclosing herewith a copy of my letter No.4 E/49-39 dated 6-4-50 to the Madras Government, which is self-explanatory, I shall be glad if you would kindly arrange for the bulk supply being given to us by your department early.

Actual completion of the agreement may take some time since it has to pass through a number of routine formalities. When both the sides are ready for the supply and all major points about the agreement have been settled, there appears no necessity in postponing supply till the formal completion of the agreement. I shall be glad if you would kindly agree to arrange for supply being given to us very early and get the concurrence of your Govt.

Copy

No.4 E/49-39 dated 6th April 1950.

Electricity - Mysore supply for Hindupur.

--

All arrangements necessary at the Hindupur end for taking supply of power in bulk from Mysore have almost been completed by this department. It is also understood that work on the Mysore sid has already been completed. The generating sets at the Municipal Power House, Hindupur, are giving trouble and the supply in the area has already been rationed. In the circumstance and in the interest of power supply in the area, taking of bulk supply from Mysore which is possible now since the arrangements at both the ends have been completed, need not be postponed further for the reason that the agreement with Mysore is yet to be completed. Completion of the agreement was delayed due to the inclusion by Mysore of the surcharge clause. As it is likely to take some more time for the completion of the agreement, bulk supply can be taken now by this Dept. from Mysore and the position at Hindupur improved if Mysore agrees to give supply now. I endorse the suggestion you made the other day that Mysore might be requested by Government to give supply to this department in anticipation of completion of the agreement.

I request that Government send an urgent letter to Mysore on the matter. I am writing to Mr.Hayath, the Chief Electrical Engineer, Mysore, a D.O. letter to the same purport.

Sd/- G. Sundaram,

Chief Engineer for Electricity.

Sir,

Sub:- Electricity - Supply of power to Hindupur.

Ref:- Madras Government's letter No.643-E/S/46-48 dated 27th December 1949.

A.

I am directed to state that the generating sets at the Municipal Power House, Hindupur, are giving trouble and the supply in the area has already been rationed. All arrangements necessary at the Hindupur end for taking supply of power in bulk from Mysore have almost been completed by the Madras Government. It is reported that the work on the Mysore side has also been completed. I am to state that, in the interests of power supply in the area, taking of bulk supply from Mysore which is possible now since the arrangements at both the ends have been completed, need not be postponed further for the reason that the agreement between the two Governments is yet to be completed. I am therefore, to request that the Government of Mysore may be moved to supply bulk power to this Government for distribution in and around Hidupur in anticipation of completion of the agreement. The Mysore Government's reply to this Government's letter cited may also please be expedited.

Yours faithfully,

GOVT. OF MYSORE

Sir,

Sub: Electricity - Supply of power to Hindupur.
--
Ref: Madras Government's letter No. 643-E/S/46-48 dated 18-4-1950.
--

I am directed to forward a revised draft agreement for supply of electric power to Hindupur. The draft mainly follows the one sent by the Mysore Government with their letter No.EDS-4056/Elecl.298-45-27 dated 25-4-1949 with the modifications subsequently agreed to by them. Clause 10-A has been modified based on the decision reached at the Conference held at Bangalore on the 17th May, 1950 between the representatives of Madras and Mysore Governments. Some further modifications necessary with referance to article 299 (1) of the Constitution of India have also been made in the draft.

2. I am to request that the concurrence of the Mysore Government to the revised draft may kindly be obtained and communicated to this Government at an early date.

Yours faithfully,

T.V. Natesan
(T.V.Natesa Mudaliar)
OR SECRETARY TO GOVERNMENT.

mk.3.6
Encl:

AGREEMENT MADE THIS ... .. day of ... ... One thousand nine hundred and ... BETWEEN HIS HIGHNESS THE RAJPRAMUKH OF MYSORE acting in the exercise of the executive authority of the State of Mysore (hereinafter called the 'Supplier', which expression shall, where the context so admits, include his successors and assigns) of the one part AND HIS EXCELLENCY THE GOVERNOR OF MADRAS in the exercise of the executive authority of the State of Madras (hereinafter called the 'Consumer' which expression shall where the context so admits, include his successors in office and assigns) of the other part.

WHEREAS the Consumer has requested the Supplier to furnish to him a supply of electrical energy upto 700 K.W., for the purpose of distribution by the Consumer in Hindupur area of the ~~Province~~ State of Madras and for any other purposes for which the Consumer may require such energy:

AND WHEREAS the Supplier has agreed to supply such energy to the Consumer for the period and upon the terms and conditions hereinafter set forth:

NOW THESE PRESENTS WITNESS that the parties have agreed in manner following, that is to say:-

1. (i) The Supplier agrees to supply to the Consumer electrical energy up to 700 K.W. in bulk at the point of supply mentioned in clause 2 hereof at 33 K.V. 3 phase, 25 cycles, which may be converted to 33 K.V. 3 phase, 50 cycles, sometime in the year 1949-50 or later.

(ii) In the event of the Consumer requiring at any time a supply of more than 700 K.W., such additional supply as the Supplier may agree to afford may be made by the Supplier to the Consumer on terms and conditions to be mutually agreed upon, provided inter alia that the Consumer gives intimation of his requirements at least three months in advance.

2. The point of supply shall be at a place to be mutually agreed upon in the neighbourhood of Hindupur but within the border of the Mysore territory and a single 33 K.V. line and telephone line shall be run from the Supplier's present terminal at Doddaballapur to Pavagada (via Goribidnur, Dalvatta, Vithalapura & Basavanahatti) through the point of supply, at the expense of the Supplier and the Supplier will at his expense lay, fit up, maintain, supervise and keep in repair, suitable and proper dables and other apparatus for such delivery and for metering at the point of supply. The cost of line within the Mysore territory, the cost of line to Pavagada inclusive of 5 miles line passing through the intervening Madras territory and that of the 33 K.V. metering equipment, will be borne by the Supplier. The cost of line within Madras territory, except that in the intervening territory mentioned above, will be borne by the Consumer.

3. (i) The supplier will take all reasonable precautions to ensure a supply of power to the Consumer and the due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the Supplier shall not be liable to the Consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the Supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the Supplier, provided always that the Supplier shall give notice as early as possible of the probable duration of any interruption in the supply due to any of the aforesaid causes and will use every practicable means to make the period of interruption as short as possible.

(ii) If at any time the Consumer is prevented from receiving and using the electrical energy to be supplied under this agreement either in whole or in part owing to any

strikes, riots, insurrections, lawful command of a Civil or Military authority, fire, explosion, act of God or any other cause beyond the control of the Consumer, the minimum charge under this agreement shall be reduced in proportion to the ability of the Consumer to take supply.

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the Consumer under this agreement, there shall be provided by the Supplier one suitable 33 KV metering equipment at the point of supply within the border of the Mysore territory, which shall be the property of and be kept in repair and calibrated by the Supplier. The Consumer shall be charged meter rent in accordance with the rules from time to time in force in the Department of Electricity of the Supplier.

5. The Consumer may at his own expense instal check meters at the metering point of the Supplier.

6. The meters belonging to the Supplier shall be kept properly sealed by the Supplier, and the meters belonging to the Consumer shall be kept properly sealed by the Consumer. The meters shall not be interfered with by either party except after due intimation to the other party.

7. The readings of the said meters installed by the Supplier shall be taken by the accredited representatives of the Supplier at or as near noon as practicable on the last day of each calendar month, and the readings so taken shall be binding and conclusive between the Supplier and the Consumer as to the amount of electrical energy supplied to the Consumer. The Consumer's representative may arrange to be present at the time of taking the readings. In the event of any meter being found defective and a check meter not having been installed, the power consumed for the period during which the meter was defective shall be determined by taking the daily average consumption for the previous period

xxof

of supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

8.(i) Once in every year the meters shall be calibrated and standardised if considered necessary by the Supplier, in the presence of a representative of the Consumer.

(ii) Adjustments in bills will be made for error at average load and power-factor of the Consumer, when the meter is found to be incorrect during annual periodical tests, for a preceding period of three months unless there is evidence for adopting a different period. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

9. Either party to this agreement, may, at any time and after reasonable notice to the other party, have a special test carried out of any or all the meters belonging to the Supplier above mentioned at a place to be fixed by mutual agreement. The meter or meters so tested shall be deemed to be correct if as a result of such test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force. If the mean error be found to be more than that prescribed by the said Indian Electricity Rules or any statutory modification thereof for the time being in force, the Supplier will deduct from or add to the account of the preceding period of three months an amount equivalent to the error. The expenses of such test shall be borne by the Supplier in the event of the account requiring any adjustment as hereinbefore mentioned. If no adjustment of the account is necessary as a consequence of

such special test, the party at whose instance the test was conducted shall bear the costs of such tests.

10. The rates to be charged by the Supplier for the power supply at the point of supply under this agreement will be in accordance with the high tension tariff set out below:-

Class	and total monthly consumption in K.W.H.			Rate per K.W.H. Anna.		Rate per K.W. of maximum demand per month.
I.	Up to	1,00,000		0.450		
II.	Exceeding	1,00,000 &	upto 1,50,000	0.425		Up to 1,000 K.W. Rs.3/-
III.	"	1,50,000	" 2,00,000	0.400		
IV.	"	2,00,000	" 3,00,000	0.375	Plus	
V.	"	3,00,000	" 5,00,000	0.350		1,000 K.W. and over Rs.2/12-
VI.	"	5,00,000	" 10,00,000	0.325		
		10,00,000	"	0.300		

The above tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment defined in clause 12, provided the consumption is in excess of 1,20,000 units per month. If the consumption is below 1,20,000 units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in clause 12.

10-A Should the Supplier decide at a future date to levy a general surcharge or tax on consumption of energy on high tension bulk supplies of electricity given by him in the Mysore territory, such general surcharge or tax shall be applicable to the tariffs specified in clause 10 at the same rate and for the same duration.

11. For the purpose of this agreement, the maximum demand of supply to the Consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

12. (i) Maximum demand charges for any month and at the point of supply shall be based on maximum kilowatt demand, as determined in accordance with clause 11, for the previous calendar months commencing from January of each year and ending with the month in question. For the first calendar

year of service the demand charge for any month will be based on the maximum kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum demand for that month.

(ii) The demand payment will be a fixed monthly charge, whether energy is consumed or not, and shall constitute the minimum monthly payment.

13. The power-factor of the plant and apparatus owned by the Consumer at the pointof supply shall not be less than 0.8 . Should the power-factor be below 0.8 and more than 0.7 it is liable to a penalty of 8 annas (eight annas) per K.W. of monthly demand while if the power factor drops below 0.7 it must be brought up by methods approved by the Engineers of the Supplier, failing which the service may be discontinued. For purposes of this clause, the power factor shall be that determined during the half-hour of maximum demand on any working day in the month.

14. The Supplier reserves the right to discontinue supply of power for purposes of testing for a period not exceeding one hour once every month, and also at any other time, if it should appear necessary for the Supplier to test any portion of the plant in order to secure subsequent continuity of supply, or for the purpose of connecting new machinery. These monthly stoppages may, at the option of the Supplier, be extended on due notice up to six hours once every six months. No reduction of the monthly charges shall be claimed by the Consumer on this account.

15. The Supplier and the Consumer agree that no tax other than that referred to in cl 10(A) supra shall be levied by either of them on the other in respect of the supply under this Agreement . If any such tax is levied, the party so taxed shall be reimbursed by the other party to the extent of the

tax so levied. The Consumer shall exempt from the operation of the Madras Motor Vehicles Taxation Act, 1931, the motor vehicles belonging to the Mysore Government Electricity Department and to the officers of that Department specified below, when used on (1) the Madugiri-Madakasira Road, Pavagada Road (2) the Goribidnur-Hindupur-Parigi-Madakasira Road, or (3) the Madakasira-Dammatimari-Penukonda Road for the purpose of construction, operation or maintenance of the transmission and telephone lines in the territoy of the Consumer:-

(i) The Chief Electrical Engineer to the Government of Mysore, Bangalore.
(ii) The Deputy Chief Electrical Engineer, Bangalore
(iii) The Technical Assistant to the Chief Electrical Engineer.
(iv) The Superintendent of Lines, Bangalore
(v) The Assistant Superintendent of Lines, Bangalore.
(vi) The Superintendent, Power and Light, Chickballapur
(vii) The Assistant Superintendent, Power and Light, Chickballapur.
(viii) The Government Electric Inspector, Bangalore
(ix) The Assistant Government Electric Inspector Bangalore.

16. The Supplier shall, within fifteen days after the expiration of each calendar month, deliver to the Consumer an account stating the number of units supplied to the Consumer by the Supplier in accordance with the readings of the aforesaid meters and the amount payable therefor as also the amount payable in respect of the maximum demand charge and other charges, if any, payable by the Consumer to the Supplier and the Consumer shall pay the same within thirty days from the delivery of such account. Provided that the Supplier shall be at liberty to charge interest at the rate of 7 per cent (seven per cent) per annum on the amounts of such bills as are not paid within the above said period

of thirty days in addition to and without prejudice to the other rights of the Supplier herein contained.

17. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid, or if the Consumer shall not in all things perform and observe the conditions herein contained and on the part of the Consumer to be observed and performed, then and in such cases and in addition to any other right or power possessed by the Supplier, the Supplier shall be at liberty at any time thereafter, notwithstanding that the Supplier may not have taken advantage of any previous breach or default or event of a like nature, at its choice to suspend all further supply of electrical energy under this agreement, or to discontinue the supply once for all. Such suspension or discontinuance of the supply of electrical energy shall not relieve the Consumer of his liability to pay the minimum charge provided for herein, nor shall such suspension or discontinuance affect any right, claim demand or power which may have accrued to the Supplier.

18. (i) This agreement shall subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of the supply of electrical energy under this agreement.

(ii) At the request of the Consumer this agreement may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the Supplier and the Consumer.

19. The Consumer confers on the Supplier the right of construction, operation, or maintenance, of the electric and telephone lines referred to above through the territory of the Consumer and also the right of extending the lines within the Supplier's territory and beyond the territory

of the Consumer for a period of 60 years (inclusive of the period of this agreement) in the first instance.

20. The Consumer shall give the Supplier all necessary facilities for clearing jungle lands for the required width for the satisfactory running and maintenance of the above lines through the territory of the Consumer, and the Consumer shall not charge the Supplier compensation or royalty in any shape or form on account of these works on the Government lands within the Consumer's territory.

21. Any dispute or ~~difficulties~~ difference arising between the Supplier and the Consumer or their respective Electrical Engineers, as to the supply of electrical energy or the pressure thereof, or as to the rates of supply, or as to the interpretation of this agreement or the right of the Supplier or the Consumer to determine the same or any other question, matter or thing arising hereunder shall be referred to a single arbitrator to be mutually agreed upon by both the parties, and the arbitrator's decision thereon shall be final and binding on both the parties.

IN WITNESS WHEREOF the Secretary to the Government of Mysore, Electrical Department, for the time being Sri ... for and on behalf of and by the order and direction of His Highness the Rajpramukh of Mysore and ... Chief Engineer for Electricity to the Government of ~~Mysore~~ Madras, for and on behalf of and by the order and direction of His Excellency the Governor of Madras, have hereunto set their hands.

BS/3.

Memo No. EDS. 1912 | Elect 298-45-42

Dated, Bangalore, the 22 July 1950.

Copy of the above is forwarded with compliments to the Chief Electrical Engineer to the Government of Mysore, for information.

By order,

Secretary to Government,
Electrical Department.

ENCLOSURE TO DO NO 952

193

AGREEMENT MADE THIS.....day of.....
.....One thousand nine hundred and.....
BETWEEN HIS HIGHNESS THE RAJPRAMUKH OF MYSORE acting in the exercise of the executive authority of the State of Mysore (hereinafter called the 'Supplier', which expression shall, where the context so admits, include his successors and assigns) of the one part AND HIS EXCELLENCY THE GOVERNOR OF MADRAS in the exercise of the executive authority of the State of Madras (hereinafter called the 'Consumer' which expression shall where the context so admits, include his successors in office and assigns) of the other part;

WHEREAS the Consumer has requested the Supplier to furnish to him a supply of electrical energy upto 700 k.W., for the purpose of distribution by the Consumer in Hindupur area of the State of Madras and for any other purposes for which the Consumer may require such energy;

AND WHEREAS the Supplier has agreed to supply such energy to the Consumer for the period and upon the terms and conditions hereinafter set forth:

NOW THESE PRESENTS WITNESS that the parties have agreed inmanner following, that is to say:-

1. (i) The Supplier agrees to supply to the Consumer electrical energy up to 700 K.W. in bulk at the point of supply mentioned in clause 2 hereof at 33 K.V. 3 phase, 25 cycles, which may be converted to 33 k.V. 3 phase, 50 cycles sometime in the year 1951-52 or later.

(ii) In the event of the Consumer requiring at any time a supply of more than 700 K.W., such additional supply as the Supplier may agree to afford may be made by the --

Contd.

Supplier to the Consumer on terms and conditions to be mutually agreed upon, provided inter alia that the Consumer gives intimation of his requirements at least three months in advance.

2. The point of supply shall be at a place to be mutually agreed upon in the neighbourhood of Hindupur but within the border of the Mysore territory and a single 33 K.V. line and telephone line shall be run from the Supplier's present terminal at Doddaballapur to Pavagada (via Goribidnur, Dalvatta, Vithalapura & Basavanahatti) through the point of supply, at the expense of the Supplier and the Supplier will at his expense lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such delivery and for metering at the point of supply. The cost of line within the Mysore territory, the cost of line to Pavagada inclusive of 5 miles line passing through the intervening Madras territory and that of the 33 K.V. metering equipment, will be borne by the Supplier. The cost of line within the Madras territory, except that in the intervening territory mentioned above, will be borne by the Consumer.

3. (i) The Supplier will take all reasonable precautions to ensure a supply of power to the Consumer and the due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the Supplier shall not be liable to the Consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the Supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the Supplier, provided always that the Supplier shall give notice as early as possible of the probable duration of any interruption in the supply due to any of the aforesaid causes and will use every practicable means to make the period of interruption as short as possible.

Pont

195

(ii) If at any time the Consumer is prevented from receiving and using the electrical energy to be supplied under this agreement either in whole or in part owing to any strikes, riots, insurrections, lawful command of a Civil or Military authority, fire, explosion, act of God or any other cause beyond the control of the Consumer, the minimum charge under this agreement shall be reduced in proportion to the ability of the Consumer to take supply.

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the Consumer under this agreement, there shall be provided by the Supplier one suitable 33 kV. metering equipment at the point of supply within the border of the Mysore territory, which shall be the property of and be kept in repair and calibrated by the Supplier. The Consumer shall be charged meter rent in accordance with the rules from time to time in force in the Department of Electricity of the Supplier.

5. The Consumer may, at his own expense, instal check meters at the metering point of the Supplier.

6. The meters belonging to the Supplier shall be kept properly sealed by the Supplier, and the meters belonging to the Consumer shall be kept properly sealed by the Consumer. The meters shall not be interfered with by either party -- except after due intimation to the other party.

7. The readings of the said meters installed by the Supplier shall be taken by the accredited representatives of the Supplier at or as near noon as practicable on the last day of each calendar month, and the readings so taken shall be binding and conclusive between the Supplier and the Consumer as to the amount of electrical energy supplied to the Consumer. The Consumer's representative may arrange to be present at the time of taking the readings. In the event of

Pont

any meter being found defective and a check meter not having been installed, the power consumed for the period during which the meter was defective shall be determined by taking the daily average consumption for the previous period of supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

8. (i) Once in every year the meters shall be calibrated and standardised if considered necessary by the Supplier, in the presence of a representative of the Consumer.

(ii) Adjustments in bills will be made for error at average load and power-factor of the Consumer, when the meter is found to be incorrect during annual periodical tests, for a preceding period of three months unless there is evidence for adopting a different period. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

9. Either party to this agreement, may, at any time and after reasonable notice to the other party, have a special test carried out of any or all the meters belonging to the Supplier above mentioned at a place to be fixed by mutual agreements. The meter or meters so tested shall be deemed to be correct if as a result of such test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force. If the mean error be found to be more than that prescribed by the said Indian Electricity Rules or any statutory modification thereof for the time being in force, the Supplier will deduct

from or add to the account of the preceding period of three months an amount equivalent to the error. The expenses of such test shall be borne by the Supplier in the event of the account requiring any adjustment as hereinbefore mentioned. If no adjustment of the account is necessary as a consequence of such special test, the party ~~to~~ at whose instance the test was conducted shall bear the costs of such tests.

10. The rates to be charged by the Supplier for the power supply at the point of supply under this agreement will be in accordance with the high tension tariff set out below:

Class and total monthly consumption in K.W.H.	Rate per K.W.H. anna.	Rate per K.W. of maximum demand per month.
I. Upto 1,00,000	0.450	Up to 1,000 K.W. Rs.3/-
II. Exceeding 1,00,000 & up to 1,50,000	0.425)	
III " 1,50,000 " 2,00,000	0.400)	Plus 1,000 K.W. and over Rs.2.12.0
IV " 2,00,000 " 3,00,000	0.375)	
V " 3,00,000 " 5,00,000	0.350)	
VI " 5,00,000 " 10,00,000	0.325)	
VII " 10,00,000	0.300)	

The above tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment defined in clause 12, provided the consumption is in excess of 1,20,000 units per month. If the consumption is below 1,20,000 units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in clause 12.

10. A. Should the Supplier decide at a future date to levy a general surcharge or tax on consumption of energy on high tension bulk supplies of electricity given by him in the Mysore territory, such general surcharge or tax shall be applicable to the tariffs specified in clause 10 at the same rate and for the same duration.

11. For the purpose of this agreement, the maximum -

Pomt

demand of supply to the Consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

12. (i) Maximum demand charges for any month and at the point of supply shall be based on maximum kilowatt demand, as determined in accordance with clause 11, for the previous calendar months commencing from January of each year and ending with the month in question. For the first calendar year of service the demand charge for any month will be based on the maximum kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum demand for that month.

(ii) The demand payment will be fixed monthly charge, whether energy is consumed or not, and shall constitute the minimum monthly payment.

13. The Power-factor of the plant and apparatus owned by the Consumer at the point of supply shall not be less than 0.8. Should the power-factor be below 0.8 and more than 0.7 it is liable to a penalty of 8 annas (eight annas) per K.W.of monthly demand while if the power factor drops below 0.7 it must be brought up by methods approved by the Engineers of the Supplier, failing which the service may be discontinued. For purposes of this clause, the power factor shall be that determined during the half-hour of maximum demand on any working day in the month.

14. The Supplier reserves the right to discontinue supply of power for purposes of testing for a period not exceeding one hour once every month, and also at any other time, if it should appear necessary for the Supplier to test any portion of the plant in order to secure subsequent continuity of supply or for the purpose of connecting new machinery. These monthly

Bmk

stoppages may, at the option of the Supplier, be extended, on due notice, up to six hours once every six months. No reduction of the monthly charges shall be claimed by the Consumer on this account.

15. The Supplier and the Consumer agree that no tax other than that referred to in clause 11(a) supra shall be levied by either of them on the other in respect of the supply under this Agreement. If any such tax is levied, the party so taxed shall be reimbursed by the other party to the extent of the tax so levied. The Consumer shall exempt, from the operation of the Madras Motor Vehicles Taxation Act, 1931, the motor vehicles belonging to the Mysore Government Electricity Department and to the officers of that Department specified below, when used on (1) the Madhugiri-Madakasira Road, Pavagada Road (2) the Goribidnur-Hindupur-Parigi-Madakasira Road, or (3) the Madakasira-Dammatimari-Penukonda Road for the purpose of consturction, operation or maintenance of the transmission and telephone lines in the territory of the Consumer:

(I) The Chief Electrical Engineer to the Government of Mysore, Bangalore

(II) The Deputy Chief Electrical Engineer, Bangalore

(III) The Technical Assistant to the Chief Electrical Engineer.

(IV) The Superintendent of Lines, Bangalore.

(V) The Assistant Superintendent of Lines, Bangalore

(VI) The Superintendent, Power and Light, Chickballapur

(VII) The Assistant Superintendent, Power and Light, Chickballapur

(VIII) The Government Electric Inspector, Bangalore

(IX) The Assistant Government Electric Inspector, Bangalore

16. The Supplier shall, within fifteen days after the expiration of each calendar month, deliver to the Consumer an account stating the number of units supplied to the Consumer

Pmk

200

by the Supplier in accordance with the readings of the aforesaid meters and the amount payable therefor as also the amount payable in respect of the maximum demand charge and other charges, if any, payable by the Consumer to the Supplier and the Consumer shall pay the same within thirty days from the delivery of such account. Provided that the Supplier shall be at liberty to charge interest at the rate of 7 per cent (seven per cent) per annum on the amounts of such bills as are not paid within the abovesaid period of thirty days in addition to and without prejudice to the other rights of the Supplier herein contained.

17. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid, or if the Consumer shall not in all things perform and observe the conditions herein contained and on the part of the Consumer to be observed and performed, then and in such cases and in addition to any other right or power possessed by the Supplier, the Supplier shall be at liberty at any time thereafter, notwithstanding that the Supplier may not have taken advantage of any previous breach or default or event of a like nature, at its choice to suspend all further supply of electrical energy under this agreement, or to discontinue the supply once for all. Such suspension or discontinuance of the supply of electrical energy shall not relieve the Consumer of his liability to pay the minimum charge provided for herein, nor shall such suspension or discontinuance affect any right, claim, demand or power which may have accrued to the Supplier.

18.(i) This agreement shall, subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of the supply of electrical energy under this agreement.

(ii) At the request of the Consumer this agreement

Bmt

may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the Supplier and the Consumer.

19. The Consumer confers on the Supplier the right of construction, operation, or maintenance, of the electric and telephone lines referred to above through the territory of the Consumer and also the right of extending the lines within the Supplier's territory and beyond the territory of the Consumer for a period of 60 years (inclusive of the period of this agreement) in the first instance.

20. The Consumer shall give the Supplier all necessary facilities for clearing jungle lands for the required width for the satisfactory running and maintenance of the above lines through the territory of the Consumer, and the Consumer shall not charge the Supplier compensation or royalty in any shape or form on account of these works on the Government lands within the Consumer's territory.

21. Any dispute or difference arising between the Supplier and the Consumer or their respective Electrical Engineers, as to the supply of electrical energy or the pressure thereof or as to the rates of supply, or as to the interpretation of this agreement or the right of the Supplier or the Consumer to determine the same or any other question, matter or thing arising hereunder shall be referred to a Board of Arbitrators to be constituted as follows, namely, each Government to select its own Arbitrator and both the Arbitrators together to select a third who shall be be Chairman of the Board and the decision of the Board of Arbitrators thereon shall be final and binding on both the parties.

IN WITNESS WHEREOF THE SECRETARY to the Government of Mysore, Electrical Department, for the time being Sri. ..... for and on behalf of and by the order and direction of His Highness the Rajpramukh of Mysore and .... Chief Engineer for Electricity to the

202)

Government of Madras, for and on behalf of and by the order and direction of His Excellency the Governor of Madras, have hereunto set their hands.

Letter No. 643 E/S/46-59.

SECRETARY TO GOVERNMENT
Date
PUBLIC

From: D. Padmanabhan, I.C.S.,
Secretary to Government of Madras.,
Public Works Department.

To: The Chief Secretary to the Government of Mysore,
Bangalore.

Dated, Fort St. George, the 11th November 1950.

Sir,

CHIEF SECRETARY
16 NOV 1950
32
GOVT. OF MYS

Sub: Supply of power to Hindupur - Draft agreement.
Ref: Mysore Government's letter No. EDS-3066/Elecl. 298-45 Rd. dated 9-10-50 and this Government's reply letter No. 643 E/S-46-58 P.W. dated 24th October 1950.

I am directed to state that the draft of a revised agreement relating to supply of power to Hindupur sent with your Government's letter No. EDS-1911-Elecl. 298-45-42 dated 22-7-50 is acceptable to this Government subject to the following remarks:

(i) At the discussion in the conference held at Bangalore on the 17th May 1950 between the representatives of the Mysore Govt. and of this Govt, this Govt. agreed to pay only such general centage surcharge in respect of bulk supplies for Hindupur as is payable by similar H.T. bulk consumers in the Mysore area - please see also para 2 of the D.O. No. T.4861 dated 8-3-1950 from the Hon. Sri K.T. Bhashyam, Minister for Law and Labour, Government of Mysore, to the Hon. Minister for Public Works, Madras. For this purpose it is considered sufficient to refer only to the "surcharge" in clause 10-A. The word "surcharge" has a special connotation and is intended to refer to an additional charge or percentage - increase over the existing levy. On the other hand, if the word 'tax' is substituted for surcharge, it will refer to tax of any kind. This is clearly not the intention, and the use of the word 'tax' may lead to difficulties later on. If the Mysore draft of this clause is to be accepted, the result of the agreement will be that this Government will bind themselves not to levy any tax whereas the Mysore Government will be at liberty to levy any tax they like. There is therefore no reciprocity and clause 15 becomes unmeaning. I am directed to request you to consider the above position and to obtain and communicate the acceptance by your Government for deletion of the words 'or tax' occuring in the draft of this clause 10.A.

(ii) Consequent on the position explained above in regard to clause 10.A, the words 'other than that referred to in clause 10-A supra' occurring in clause 15 may be deleted. I am to request you to obtain and communicate the acceptance of your Government for this modification also.

2. As supply to Hindupur has already commenced, I am to request that reply may be sent urgently.

Yours faithfully,

for Secretary to Government.

S i r,

Subject:- Supply of power to Hindupur - Draft Agreement.

Mr. B.D)
280

With reference to your letter No. EDS. 4308/El. 298-45-44 of 27-11-1950 on the above subject, forwarding a copy of the letter received from the Govt. of Madras, I have the honour to state as follows:-

Clause 10-A:- It is true that during the discussions with the representatives of the Government of Madras we agreed not to charge ordinary taxes, either by the Government of Mysore or by the Government of Madras. But the representatives of the Govt. of Madras agreed that surcharge, if any, levied on high tension consumers in the State may be levied for the bulk supply to be made available for Hindupur. For reasons known to Government we could not increase the rates or levy a sur-charge and therefore a tax on consumption of electricity has been levied. This is identical to the surcharge that is being levied by the Govt. of Madras on its power consumers, and for a particular technical reason the term 'tax' has been used in Mysore. In order not to cause any confusion, the clause has been appropriately worded as "tax on consumption of energy" which excludes other taxes - such as income-tax etc. as agreed to during discussions. Therefore, there should be no difficulty in the Govt. of Madras accepting the clause as drafted. The facts of the case may be explained to them in detail and it may be made clear that the tax on consumption of energy proposed in clause 10-A is identical with the surcharge that is being levied by the Government of Madras and is agreed to during our discussions, and they may be requested to accept the clause as worded in our draft sent to them

Yours faithfully,

CHIEF ELECTRICAL ENGINEER.

SIR,

Sir,

Subject:- Supply of power to Hindupur - Draft Agreement.

With reference to the correspondence ending with your letter No.643-E/S/46-60 dated the 14th December 1950 on the above subject, I am directed to state that it is true that during the discussions with the representatives of the Government of Madras, it was agreed by this Government not to charge ordinary taxes by either Governments, but the representatives of the Government of Madras agreed that surcharge, if any, levied on high tension consumers in the State may be levied for the bulk supply to be made available for Hindupur. I am to add that a tax on consumption has been levied on the consumers in the State and this is indentical with the surgharge that is being levied by the Government of Madras on its power consumers. In these circumstances, I am to state that there should be no difficulty for the Government of Madras in accepting the Clause 10-A, as drafted by this Government.

Yours faithfully,

Sd. S. Biligiri Rao,
Secretary to Government,
Electrical Department.

GENERAL & REVENUE SECRETARIAT ELECTRICAL BRANCH No. 2 APR 1951 42

From

Sri D.Padmanabhan, I.C.S.,
Secretary to Government.

To

The Secretary to the Government of Mysore,
Electrical Department,
General and Revenue Secretariat,
Bangalore.

SECRETARY TO GOVERNMENT No. 21/3 PUBLIC WORKS & ELEC. DEPTS. 31/3

DATED, FORT ST. GEORGE, THE 28TH MARCH, 1951.

Sir,

Sub:- ELECTRICITY - Supply to Hindupur - Draft agreement

Ref:- Your letter No. EDS.5198/Elecl-298-45M46 dated 19-1-1951.

I am directed to state that, if according to the Mysore Government the "tax" referred to in clause 10-A of the draft agreement is identical to the surcharge levied by this Government, it is not clear why they should insist on the retention of any reference to "tax" in the clause. However, as the Mysore Government insist on the retention of "tax" in clause 10-A I am to suggest that an explanation may be added to clause 10A as follows:-

- "EXPLANATION: In this clause, the expression "surcharge" means any charge or percentage increase, whether called a surcharge or tax, which may be levied by the Supplier over and above the rates charged by the supplier in respect of high tension bulk supplies given by the supplier in the Mysore territory".

In view of the above explanation, the reference to "tax" in the body of clause 10-A may be omitted in both the places in which it occurs, and in clause 15, the words "other than that referred to in clause 10-A supra" may also be omitted.

2. I am to request that the concurrence of the Mysore Government to the above suggestions may be obtained and communicated to this Government at an early date.

Yours faithfully,

T.V. Natesan
(T.V.Natesa Mudaliar)
for Secretary to Government.

OFFICE OF THE CHIEF ELECTRICAL ENGINEER

Bangalore, 24th April 1951.
(Mysore, S. India.)

GENERAL & REVENUE SECRETARIAT
No. 369
27 APR 1951
ELECTRICAL BRANCH

To

The Secretary to Government of Mysore,
Electrical Department,
Bangalore.

S i r:

Subject:- Electricity - Supply of Power to Hindupur.
Draft Agreement.
--

With reference to your letter No.EDS.383/Elecl.298-45-48 dated 20th April 1951, forwarding a copy of the letter received from the Secretary to Government, Public Works Department, Govt. of Madras, dated 28th March 1951, on the above subject, I write to state that I am unable to understand the objection of the Government of Madras to the Clauses of Agreement, viz., Clause 10(A) and Clause 15 as now worded. However, in view of the fact that they are persistently ~~requesting~~ refusing to accept the draft agreement as now prepared, the suggestion made by them may be accepted. I have to point out that -- as it appears to me -- the explanation suggested to be added for Clause 10(A) will be contrary to Clause 15, if the words "other than that referred to in Clause 10(A) supra" are omitted. If the Law Department of the Government of Mysore find ~~any~~ no difficulty in accepting the suggestion of the Government of Madras and do not feel that the Government of Madras may refuse to pay the Sur-charge or tax that may be levied from time to time on the consumption of energy due to existence of Clause 15 without any qualifications thereon, the suggestion may be accepted.

Yours faithfully,

Chief Electrical Engineer.

SIR,

Subject: Electricity-Supply of power to Hindupur - Draft Agreement.

- - -

I am directed to refer to this office letter No.EDS.1213/Elecl.298-45-55, dated the 26th June 1952 on the abovementioned subject, and to state that the question of execution of the agreement is still pending. Certain rates for the supply of power were mentioned on previous occasions, but consequent on the enormous increase in the working Expenses of the Government Electrical Department it has been found necessary to propose an enhancement of the rates in the same manner in which increases in rates for all High Tension Consumers in the State have been effected. The increase in the rate is to the extent of 0.1 annas per unit with effect from 23rd March 1953 and the same enhancement will have to be made applicable to the power supplied to Hindupur also.

2. I am therefore to request you to have this increase in rate included in the Draft Agreement to be forwarded by you.

Sir,

Sub: ELECTRICITY - Supply of power to Hindupur - Draft agreement.

Ref: Your letters to the Government of Madras No. EDS. 1213/Elecl. 298-45-58 dated 26-6-52 and No. EDS. 1176/Elecl. 298-45-58 dated 29-6-53.

P-222
P-227

-oOo-

I am directed to state that the draft agreement for the supply of power to Hindupur, sent with your letter No. EDs. 1911/Elecl. 298-45-42 dated 22-7-50 has been examined by this Government and that they have the following comments to make:-

P-182

(1) Clauses 10-A and 15 relating to surcharge: These clauses may be revised on the lines of clauses 11 and 16 of the agreement already concluded for the supply of power to the South Kanara district in Madras State.

(i) For clause 10-A, the following clause may be substituted, namely:-

"10-A. In addition to the rates specified in clause 10 of the agreement, the Consumer shall also pay to the Supplier a sum of money which shall be equivalent to the tax levied under section 3 of the Mysore Electricity (Taxation on Consumption) Act, 1950, in respect of energy consumed by consumers of high tension bulk supplies of electricity, on consumers of electricity in the territories of Mysore. If (at a future date) the Supplier levies a further surcharge or tax on consumption of energy on high tension bulk supplies of electricity on consumers of electricity in the territories of Mysore, the Consumer shall be liable to pay to the Supplier such further sums of money which shall be equivalent to such further surcharge or taxes."

Clause 15:

(ii) For the first two sentences of clause 15, the following may be substituted, namely:-

"The Supplier and the Consumer agree that no tax other than what is referred to in clause 10-A shall be levied by either of them on the other in respect of the supply under this agreement. If any such tax is levied, the party so taxed shall be reimbursed by the other party."

(2) Since Hindupur is in the Andhra State, the expression "Andhra" may be substituted for the expression "Madras" wherever it occurs in the draft agreement.

(P.T.O.).

2. As regards enhancing the rate of supply raised in your letter No. 1176/Elecl.298-45-58, dated 29-6-53, I am to state that supply to Hindupur has been in existence from June, 1950. This supply is being availed of on the prior clear understanding of the tariff applicable for such supply. The agreement could have been executed long ago, but for a small difference of opinion in regard to the wording of surcharge clauses in the draft agreement and had the agreement been concluded, the question of enhancement of tariff would not have arisen. Further it has been agreed that the tax or sur-charge over and above the tariffs as stipulated in clause 10-A of the agreement should be paid. Any increase in the working expenses of the Mysore Electrical Department should therefore be met from this tax. In the circumstances, this Government consider that any increase in rates may apply to fresh and future supplies and that it is not reasonable to reopen at this stage the question of enhancement of the tariff applicable in respect of the existing supply.

3. I am to request that the concurrence of the Government of Mysore to the alterations to the draft agreement suggested in para 1 above and to the question of enhancement of rates of supply to Hindupur being dropped may be obtained and communicated to this Government at an early date.

Yours faithfully,

T P Kothandaraman

(T.P. KOTHANDARAMAN)
For SECRETARY TO GOVERNMENT.

pty1712.

To 6012 | Elec 298-45-62 31/3/54

The Secretary to the Government of Andhra,
Public Works and Transport, Kurnool.

S i r,

Subject:- Electricity - Supply of power to Hindupur - Draft Agreement.

With reference to your letter No.1C/53-2 dated the 15th December 1953 on the above subject, I am directed to offer the following comments:-

(1) Clauses 10-A and 15 may be revised on the lines of clauses 11 and 16 of the agreement entered into with the Government of Madras for power supply to South Kanara.

(ii) The first two sentences of clause 15 may be substituted by the two sentences noted in your letter.

(iii) The word "Andhra" may be substituted for the word "Madras" wherever it occurs in the agreement.

2. The second paragraph of the preamble may be revised as below:-

"Whereas the Government has agreed to supply to furnish to have a supply of electrical energy upto 300 kw. (seven hundred kilowatts) for a period of three years from the commencement of supply in the Hindupur area of the State of Andhra"

3. As regards the tariff for power supply referred to in the agreement, I am to state that power has been supplied in anticipation of the execution of the agreement and of the settlement of the details. The need for increasing the rates has been explained in this Government's letter No. EDS1176/Elecl.298-45-58 dated the 29th June 1953. However as power supply has commenced from the 30th June 1950, this Government have no objection to levy the basic rates referred to in the previous Drafts of the Agreement up to 30th June 1953 i.e. for a period of three years from the commencement of supply. For the rest of the Agreement period, this Government are also agreeable to the same rates being levied as in the case of the proposed power supply to South Kanara. An extract of the relevant tariff table agreed between Madras & the State is given below for ready reference

(continued)

239

Class and total monthly consumption in K.W.H.	Rate per K.W.H. in annas	Rate per K.W. of maximum demand per month.
I. Upto 1,00,000	0.450 plus 22% of 0.450	Less than 1000 K.W. Rs.3/-
II. Exceeding 1,00,000 upto 1,50,000	0.425 " 22% of 0.425	
III. Exceeding 1,50,000 upto 2,00,000	0.400 " 22% of 0.400	
IV. " 2,00,000 upto 3,00,000	0.375 " 22% of 0.375	1000 K.W. and over Rs.2/12/0
V. " 3,00,000 upto 5,00,000	0.350 " 22% of 0.350	
VI. " 5,00,000 upto 10,00,000	0.325 " 22% of 0.325	
VII " 10,00,000	0.300 " 22% of 0.300	

These ~~rates~~ payment under provisions of Cl. 10 A. will, of course, ~~be subject to the provisions of Clause 10(A)~~. have to be made in addition.

3. I am to add that this Government ~~would~~ do not find it ~~extremely difficult to continue~~ profitable to make the supply except on the modified terms mentioned above. to agree to your proposals.

4. I am to request that a draft of the agreement as revised above and with Clause 10A renumbered as Clause 11 (and with the subsequent clauses also renumbered suitably) may be caused to be prepared and forwarded to this Government for necessary further action.

Yours faithfully,

Secretary to Government
Electrical Department

From

Sri V.V.Subramanian, I.C.S.,
Secretary to Government.

To

The Secretary to the Government of Mysore,
Electrical Department,
BANGALORE (with enclosure)

Dated, Kurnool the 27th February 1956.

Sir,

Sub:- ELECTRICITY - Supply of power to Hindupur
Draft agreement.

Ref:- Your letter No.EDS.6012/Elecl/298-45-62
dated 31-3-1954.

--ooOoo--

I am directed to state that, with a view to enable the Andhra Electricity Department to supply power outside Hindupur area within the State, this Government suggest that the words "Hindupur area of", occurring in the recast second paragraph of the preamble suggested in para 2 of the letter cited may be omitted, if the Mysore Government see no objection.

2. A draft of the agreement suitably revised with reference to paras 1 and 2 of the letter cited and the above suggestion is enclosed. I am to request you kindly to obtain and communicate the acceptance of the Government of Mysore to the revised draft agreement.

Yours faithfully,

(B.GOPALAKRISHNAYYA),
for Secretary to Government.

s.s.2721956.

DRAFT.

AGREEMENT MADE THIS ..... day of .... One thousand nine hundred and ....BETWEEN ~~HIS HIGHNESS~~ THE RAJPRAMUKH OF MYSORE ~~acting in the exercise of the executive authority of the State of Mysore~~ (hereinafter called the 'Supplier', which expression shall, where the context so admits, include his successors and assigns) of the one part AND THE GOVERNOR OF ANDHRA ~~in the exercise of the executive authority of the State of Andhra~~ (hereinafter called the 'Consumer' which expression shall where the context so admits, include his successors in office and assigns) of the other part;

WHEREAS the Consumer has requested the Supplier to furnish to him a supply of electrical energy upto 700 K.W., (Seven hundred Kilo-watts) for the purpose of distribution by the Consumer in the Hindupur area of the State of Andhra;

AND WHEREAS the Supplier has agreed to supply such energy to the Consumer for the period and upon the terms and conditions hereinafter set forth:

NOW THESE PRESENTS WITNESS that the parties have agreed in manner following, that is to say:--

1. (i) The Supplier agrees to supply to the Consumer electrical energy upto 700 K.W. in bulk at the point of supply mentioned in clause 2 hereof at 33 K.V. 3 phase, 25 cycles, which may be converted to 33 K.V. 3 phase, 50 cycles sometime in the year 1955-56 or later.

(ii) In the event of the Consumer requiring at any time a supply of more than 700 K.W. such additional supply as the Supplier may agree to afford may be made by the Supplier to the Consumer on terms and conditions to be mutually agreed upon, provided inter alia that the Consumer gives intimation of his requirements at least three months in advance.

P.T.O.

2. The point of supply shall be at a place to be mutually agreed upon in the neighbourhood of Hindupur but within the border of the Mysore territory and a single 33 K.V. line and telephone line shall be run from the Supplier's present terminal at Doddaballapur to Pavagada (via Goribidnur, Dalvatta, Vithalapura and Basavanahatti) through the point of supply, at the expense of the Supplier and the Supplier will at his expense ~~aly~~ lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such supply and for metering at the point of supply. The cost of line within the Mysore territory, the cost of line to Pavagada inclusive of 5 miles line passing through the intervening Andhra territory and that of the 33 K.V. metering equipment, will be borne by the Supplier. The cost of line within the Andhra territory, except that in the intervening territory mentioned above, will be borne by the Consumer.

3. (i) The Supplier will take all reasonable precautions to ensure a supply of power to the Consumer and the due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the Supplier shall not be liable to the Consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the Supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the Supplier, provided always that the Supplier shall give notice as early as possible of the probable duration of any interruption in the supply due to any of the aforesaid causes and will use every practicable means to make the period of interruption as short as possible.

Continued..page..3..

245

(ii) If at any time the Consumer is prevented from receiving and using the electrical energy to be supplied under this agreement either in whole or in part owing to any strikes, riots, insurrections, lawful ~~and~~ command of a Civil or Military authority, fire, explosion, act of God or any other cause beyond the control of the Consumer, the minimum charge under this agreement shall be reduced in proportion to the ability of the Consumer to take supply.

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the Consumer under this agreement, there shall be provided by the Supplier one suitable 33 K.V. metering equipment at the point of supply within the border of the Mysore territory, which shall be the property of and be kept in repair and calibrated by the Supplier. The Consumer shall be charged meter rent in accordance with the rules (for the time being) in force in the Department of Electricity of the Supplier.

5. The Consumer may, at his own expense, instal check meters at the metering point of the Supplier.

6. The meters bolonging to the Supplier shall be kept properly sealed by the Supplier, and the meters belonging to the Consumer shall be kept properly sealed by the Consumer. The meters shall not be interfered with by either party except after due intimation to the other party.

7. The readings of the said meters installed by the Supplier shall be taken by the accredited representatives of the Supplier at or as near noon as practicable on the last day of each calendar month, and the readings so taken shall be binding and conclusive between the Supplier and the Consumer as to the amount of electrical energy supplied to the Consumer. The Consumer's representative may arrange to be present at the time of taking the readings. In the event of any meter being found defective and a check meter not having been installed, the power consumed for the

P.T.O.

period during which the meter was defective shall be determined by taking the daily average consumption for the previous period of supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

8. (i) Once in every year the meters shall be calibrated and standardised if considered necessary by the Supplier, in the ~~resence~~ presence of a representative of the Consumer.

(ii) Adjustments in bills will be made for error at average load and power-factor of the Consumer, when the meter is found to be incorrect during annual periodical tests, for a preceding period of three months unless there is evidence for adopting a different period. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

9. Either party to this agreement, may, at any time and after reasonable notice to the other party, have a special test carried out of any or all the meters belonging to the Supplier above mentioned at a place to be fixed by mutual agreements. The meter or meters so tested shall be deemed to be correct if as a result of such test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force. If the mean error be found to be more than that prescribed by the said Indian Electricity Rules or any statutory modification

Continued..page..5..

thereof for the time being in force, the Supplier will deduct from or add to the account of the preceding period of three months an amount equivalent to the error. The expenses of such test shall be borne by the Supplier in the event of the account requiring any adjustment as herein before mentioned. If no adjustment of the account is necessary as a consequence of such special test, the party at whose instance the test was conducted shall bear the costs of such tests.

10. The rates to be charged upto 30th June 1953 by the Supplier for the power supply at the point of supply under thistagreement will be in accordance with the high tension tariff set out below:-

Class and total monthly consumption in K.W.H.	Rate per K.W.H. anna.	Rate per K.W. of maximum demand per month.
I. Upto 1,00,000	0.450	Up to 1,000 K.W. Rs.3/-
II. Exceeding 1,00,000 & up to 1,50,000 ..	0.425	Plus 1,000 K.W. and over Rs.2.12.0
III. Exceeding 1,50,000 " 2,00,000 ..	0.400	
IV. " 2,00,000 " 3,00,000 ..	0.375	
V. " 3,00,000 " 5,00,000 ..	0.350	
VI. " 5,00,000 " 10,00,000 ..	0.325	
VII. " 10,00,000 " ..	0.300	

But from 1st July 1953, the rates to be charged will be in accordance with the high tension tariff set out below:--

Class and total monthly consumption in K.W.H.	Rate per K.W.H. in annas.	Rate per K.W. of maximum demand per month.
I. Upto 1,00,000	0.450 plus 22% of 0.450	Less than 1000 K.W. + Rs.3/-; Plus 1000 K.W. and over Rs.2/12/0
II. Exceeding 1,00,000 Upto 1,50,000	0.425 " 22% of 0.425	
III. " 1,50,000 " 2,00,000	0.400 " 22% of 0.400	
IV. " 2,00,000 " 3,00,000	0.375 " 22% of 0.375	
V. " 3,00,000 " 5,00,000	0.350 " 22% of 0.350	
VI. " 5,00,000 " 10,00,000	0.325 " 22% of 0.325	
VII. " 10,00,000 "	0.300 " 22% of 0.300	

The above tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment defined in clause 12, provided the consumption is in excess of 1,20,000 units per month.

P.T.O.

If the consumption is below 1,20,000 units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in clause 12.

11. In addition to the rates specified in Clause 10 of the agreement, the Consumer shall also pay to the Supplier a sum of money which shall be equivalent to the tax levied under section 3 of the Mysore Electricity (Taxation on Consumption) Act, 1950, in respect of energy consumed by consumers of high tension bulk supplies of electricity, on consumers of electricity, in the territories of Mysore. If the Supplier should, at a future date, levy a further surcharge or tax on consumption of energy on high tension bulk supplies of electricity on Consumers of electricity in the territories of Mysore, the Consumer shall be liable to pay to the Supplier such further sums of money which shall be equivalent to such further surcharge or taxes.

12. (i) For the purpose of this agreement, the maximum demand of supply to the Consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

(ii) Maximum demand charges for any month and at the point of supply shall be based on maximum kilowatt ~~deamdn~~ demand, as determined in accordance with sub-clause (i) for the previous calendar months commencing from January of each year and ending with the month in question. For the first calendar year of service the demand charge for any month will be based on the maximum ~~kxx~~ kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum ~~deamndfax~~ demand for that month.

Continued..page..7..

(iii) The demand payment will be a fixed monthly charge, whether energy is consumed or not, and shall constitute the minimum monthly payment.

13. The Power-factor of the plant and apparatus owned by the Consumer at the point of supply shall not be less than 0.8. Should the power-factor be below 0.8 and more than 0.7 it is liable to a penalty of 8 annas (eight annas) per K.W. of monthly demand while if the power factor drops below 0.7 it must be brought up by methods approved by the Engineers of the Supplier, failing which the service may be discontinued. For purposes of this clause, the power factor shall be that determined during the half-hour of maximum demand on any working day in the month.

14. The Supplier reserves the right to discontinue supply of power for purposes of testing for a period not exceeding one hour once every month, and also at any other time, if it should appear necessary for the Supplier to test any portion of the plant in order to secure subsequent continuity of supply or for the purpose of connecting new machinery. These monthly stoppages may, at the option of the Supplier, be extended, on due notice, up to six hours once every six months. No reduction of the monthly charges shall be claimed by the Consumer on this account.

15. The Supplier and the Consumer agree that no tax other than that referred to in clause 11 supra shall be levied by either of them on the other in respect of the supply under this Agreement. If any such tax is levied, the party so taxed shall be reimbursed by the other party to the extent of the tax so levied. The Consumer shall exempt from the operation of the Madras Motor Vehicles Taxation Act, 1931 as in force in Madras the motor vehicles belonging to the Mysore Government Electricity Department and to the officers of that Department specified below, when used on (1) the Madhugiri-Madakasira Road, Pavagada Road (2) the Goribidnur-Hindupur-Parigi-

Madakasira Road, or (3) the Madakasira-Dammathimari-Penukonda Road for the purpose of construction, operation or maintenance of the transmission and telephone lines in the territory of the Consumer:

(I) The Chief Electrical Engineer to the Government of Mysore, Bangalore.

(II) The Deputy Chief Electrical Engineer Bangalore.

(III) The Technical Assistant to the Chief Electrical Engineer.

(IV) The Superintendent of Lines, Bangalore

(V) The Assistant Superintendent of Lines Bangalore.

(VI) The Superintendent, Power and Light, Chickballapur

(VII) The Assistant Superintendent, Power and Light, Chickballapur

(VIII) The Government Electric Inspector, Bangalore

(IX) The Assistant Government Electric Inspector Bangalore.

16. The Supplier shall, within fifteen days after the expiration of each calendar month, deliver to the Consumer an account stating the number of units supplied to the Consumer by the Supplier in accordance with the readings of the aforesaid meters and the amount payable therefor as also the amount payable in respect of the maximum demand charge and other charges, if any, payable by the Consumer to the Supplier and the Consumer shall pay the same within thirty days from the delivery of such account. Provided that the Supplier shall be at liberty to charge interest at the rate of 7 per cent (seven per cent) per annum on the amounts of such bills as are not paid within the abovesaid period of thirty days in addition to and without prejudice to the other rights of the Supplier herein contained.

Continued..page..9..

17. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid, or if the Consumer shall not in all things perform and observe the conditions herein contained and on the part of the Consumer to be observed and performed, then and in such cases and in addition to any other right or power possessed by the Supplier, the Supplier shall be at liberty at any time thereafter, notwithstanding that the Supplier may not have taken advantage of any previous breach or default or event of a like nature, at its choice to suspend all further supply of electrical energy under this agreement, or to discontinue the supply once for all. Such suspension or discontinuance of the supply of electrical energy shall not relieve the Consumer of his liability to pay the minimum charge provided for herein, nor shall such suspension or discontinuance ~~affect~~ affect any right, claim, demand or power which may have accrued to the Supplier.

18. (i) This agreement shall, subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of the supply of electrical energy under this agreement.

(ii) At the request of the Consumer this agreement may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the Supplier and the Consumer.

19. The Consumer confers on the Supplier the right of construction, operation, or maintenance, of the electric and telephone lines referred to above through the territory of the Consumer and also the right of extending the lines within the Supplier's territory and beyond the territory of the Consumer for a period of 60 years (inclusive of the period of this agreement) in the first instance.

P.T.O.

252

20. The Consumer shall give the Supplier all necessary facilities for clearing jungle lands for the required width for the satisfactory running and maintenance of the above lines through the territory of the Consumer, and the Consumer shall not charge the Supplier compensation or royalty in any shape or form on account of these works on the Government lands within the Consumer's territory.

21. Any dispute or difference arising between the Supplier and the Consumer or their respective Electrical Engineers, as to the supply of electrical energy or the pressure thereof or as to the rates of supply, or as to the interpretation of this agreement or the right of the Supplier or the Consumer to determine the same or any other question, matter or thing arising hereunder shall be referred to a Board of Arbitrators to be constituted as follows, namely, each Government to select its own Arbitrator and both the Arbitrators together to select a third who shall be the Chairman of the Board and the decision of the Board of Arbitrators thereon shall be final and binding on both the parties.

IN WITNESS WHEREOF THE ~~SECRETARY to the Government~~ parties ~~hereunto~~ have set their hand & seal hereunto in the presence of witnesses of Mysore, Electrical Department, for the time being Sri ..... ~~for and on behalf of and~~ in the name and by ~~the order~~ and under the direction of His ~~Highness the~~ Rajpramukh of Mysore and..... the Chief Engineer for Electricity to the Government of Andhra, ~~for and on behalf of and by the order and~~ in the name of and under the direction of the Governor of Andhra, have hereunto set their hands, ~~this.....day of.....~~ one thousand nine hundred and fifty..... ~~....in the Seventh year of the Republic of India.~~

AGREEMENT MADE THIS..... day of.....

.....One thousand nine hundred and.....
.....BETWEEN THE RAJPRAMUKH OF MYSORE
(hereinafter called the "Supplier", which expression shall, where the context so admits, include his successors and assigns) of the one part AND THE GOVERNOR OF ANDHRA (hereinafter called the 'Consumer' which expression shall where the context so admits, m include his successors in office and assigns) of the other part;

HEREAS the Consumer has requested the Supplier to furnish to him a supply of electrical energy upto 700 K.W. (Seven hundred Kilo-watts) for the purpose of distribution by the Consumer in the Hindupur area of the State of Andhra;

AND WHEREAS the Supplier has agreed to supply such energy to the Consumer for the period and upon the terms and conditions hereinafter set forth:

NOW THESE PRESENTS WITNESS that the parties have agreed in manner following, that is to say:--

1. (i) The Supplier agrees to supply to the Consumer electrical energy upto 700 K.W. in bulk at the point of supply mentioned in Clause 2 hereof at 33 K.V. 3 Phase, 25 cycles, which may be converted to 33 K.V. 3 phase, 50 cycles sometime in the year 1955-56 or later.

(ii) In the event of the Consumer requiring at any time a supply of more than 700 K.W. such additional supply as the Supplier may agree to afford may be made by the Supplier to the Consumer on terms and conditions to be mutually agreed upon, provided inter alia that the Consumer gives intimation of his requirements at least three months in advance.

2. The point of supply shall be at a place to be mutually agreed upon in the neighbourhood of Hindupur but within the border of the Mysore territory and a

single 33 K.V. line and telephone line shall be run from the Supplier's present terminal at Doddaballapur to Pavagada (via Goribidanur, Dalvatta, Vithalapura and Basavanahatti) through the point of supply, at the expense of the Supplier and the Supplier will at his expense lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such supply and for metering at the point of supply. The cost of line within the Mysore territory, the cost of line ~~of within th~~ to Pavagada inclusive of 5 miles line passing through the intervening Andhra territory and that of the 33 K.V. meter equipment, will be borne by the Supplier. The cost of line within the Andhra territory, except that in the intervening territory mentioned above, will be borne by the Consumer.

3.(i) The Supplier will take all reasonable precautions to ensure a supply of power to the Consumer and due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the Supplier shall not be liable to the Consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the Supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the Supplier, provided always that the Supplier shall give notice as early as possible of the probable duration of any interruption in the supply due to any of the aforesaid causes and will be very practicable means to make the period of interruption as short as possible.

(ii) That at any time the Consumer is preventing and using the electrical energy to be supplied under this agreement either in whole or in part by reason of strikes, riots, insurrections, lawful

single 33 K.V. line and telephone line shall be run from the Supplier's present terminal at Doddaballapur to Pavagada (via Goribidanur, Dalvatta, Vithalapura and Basavanahatti) through the point of supply, at the expense of the Supplier and the Supplier will at his expense lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such supply and for metering at the point of supply. The cost of line within the Mysore territory, the cost of line ~~of within th~~ to Pavagada inclusive of 5 miles line passing through the intervening Andhra territory and that of the 33 K.V. meter equipment, will be borne by the Supplier. The cost of line within the Andhra territory, except that in the intervening territory mentioned above, will be borne by the Consumer.

3.(i) The Supplier will take all reasonable precautions to ensure a supply of power to the Consumer and due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the Supplier shall not be liable to the Consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the Supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the Supplier, provide always that the Supplier shall give notice as early as possible of the probable duration of any interruption in the supply due to any of the aforesaid causes and will use every practicable means to make the period of interruption as short as possible.

(ii) If at an time the Consumer is prevented from receiving and using the electrical energy to be supplied under this agreement either in whole or in part owing to any strikes, riots, insurrections, lawful command of a

Civil or Military authority, fire, explosion, act of God or any other cause beyond the control of the Consumer, the minimum charge under this agreement shall be reduced in proportion to the ability of the Consumer to take supply.

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the Consumer under this agreement, there shall be provided by the Supplier one suitable 33 K.V. metering equipment at the point of supply within the border of the Mysore territory, which shall be the property of and be kept in repair and calibrated by the Supplier. The Consumer shall be charged meter rent in accordance with the rules for the time being in force in the Department of Electricity of the Supplier.

5. The Consumer may, at his own expense, instal check meters at the metering point of the Supplier.

6. The meters belonging to the Supplier shall be kept properly sealed by the Supplier, and the meters belonging to the Consumer shall be kept properly sealed by the Consumer. The meters shall not be interfered with by either party except after due intimation to the other party.

7. The readings of the said meters installed by the Supplier shall be taken by the accredited representatives of the Supplier at or as near noon as practicable on the last day of each calendar month, and the readings so taken shall be binding and conclusive between the Supplier and the Consumer as to the amount of electrical energy supplied to the Consumer. The Consumer's representative may arrange to be present at the time of taking the readings. In the event of any meter being found defective and a check meter not having been installed, the power consumed for the period during which the meter was defective shall be determined by taking the daily average consumption

for the previous period of supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

8.(i) Once in every year the meters shall be calibrated and standardised if considered necessary by the Supplier, in the presence of a representative of the Consumer.

(ii) Adjustments in bills will be made for error at average load and power-factor of the Consumer, when the meter is found to be incorrect during annual periodical tests, for a preceding period of three months unless there is evidence for adopting a different period. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

9. Either party to this agreement, may, at any time and after reasonable notice to the other party, have a special test carried out of any or all the meters belonging to the Supplier above mentioned at a place to be fixed by mutual agreements. The meter or meters so tested ~~by mutual~~ shall be deemed to be correct if as a result of such test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules 1937, or any statutory modification thereof for the time being in force. If the mean error be found to be more than that prescribed by the said Indian Electricity Rules or any statutory modification thereof for the time being in force, the Supplier will deduct from or add to

the account of the preceding period of three months an amount equivalent to the error. The expenses of such test shall be borne by the Supplier in the event of the account requiring any adjustment as herein before mentioned. If no adjustment of the account is necessary as a consequence of such special test, the party at whose instance the test was conducted shall bear the cost of such tests.

10. The rates to be charged upto 30th June 1953 by the Supplier for the power supply at the point of supply under this agreement will be in accordance with the high tension tariff set out below:-

Class and total monthly consumption in K.W.H.	Rate per K.W.H. anna	Rate per K.W. of maximum demand per month.
I. Upto 1,00,000	0.450	Upto 1,000 K.W. Rs.3/-
II. Exceeding 1,00,000 & upto 1,50,000 ..	0.425	Plus 1,000 K.W. and over Rs.2.12.0
III. " 1,50,000 " 2,00,000 ..	0.400	
IV " 2,00,000 " 3,00,000 ..	0.375	
V. " 3,00,000 " 5,00,000 ..	0.350	
VI. " 5,00,000 " 10,00,000 ..	0.325	
VII. " 10,00,000	0.300	

But from 1st July 1953, the rates to be charged will be in accordance with the high tension tariff set out below:

Class and total monthly consumption in K.W.H.	Rate per K.W.H. in anna.	Rate per K.W. of maximum demand per month.
I. Upto 1,00,000	0.450 plus 22½ of 0.450	Less than 1000 K.W. + Rs.3/-
II. Exceeding 1,00,000 Upto 1,50,000	0.425 plus 22½ of 0.425	
III. 1,50,000 " 2,00,000	0.400 " 22½ of 0.400	
IV " 2,00,000 " 3,00,000	0.375 " 22½ of 0.375	Plus 1000 K.W. and over Rs.2.12.0
V. " 3,00,000 " 5,00,000	0.350 " 22½ of 0.350	
VI " 5,00,000 " 10,00,000	0.325 " 22½ of 0.325	
VII " 10,00,000 "	0.300 " 22½ of 0.300	

The above tariff is subject to a maximum overall unit charge of 0.56 anna per unit without prejudice to the minimum monthly payment defined in Clause 12, provided the consumption is in excess

of 1,20,000 units per month. If the consumption is below 1,20,000 ~~mx~~ units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in clause 12.

11. In addition to the rates specified in Clause 10 of the agreement, the Consumer shall also pay to the Supplier a sum of money which shall be equivalent to the tax levied under section 3 of the Mysore Electricity (Taxation on consumption) Act, 1950, in respect of energy consumed by consumers of high tension bulk supplies of electricity, on consumers of electricity, in the territories of Mysore. If the Supplier should, at a future date, levy a further surcharge or tax on consumption of energy on high tension bulk supplies of electricity on consumers of electricity in the territories of Mysore, the Consumer shall be liable to pay to the Supplier such further sums of money which shall be equivalent to such further surcharge or taxes.

12 (i) For the purpose of this agreement, the maximum demand of supply to the Consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

(ii) Maximum demand charges for any month and at the point of supply shall be based on maximum kilowatt demand as determined in accordance with sub-clause (i) for the previous calendar months commencing from January of each year and ending with the month in question. For the first calendar year of service the demand charge for any month will be based on the maximum kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum demand for

that month.

(iii) The demand payment will be a fixed monthly charge, whether energy is consumed or not, and shall constitute the minimum monthly payment.

13. The Power-factor of the plant and apparatus owned by the Consumer at the point of supply shall not be less than 0.8. Should the power-factor be below 0.8 and more than 0.7 it is liable to a penalty of 8 annas (eight annas) per K.V. of monthly demand while if the power factor drops below 0.7 it must be brought up by methods approved by the Engineers of the Supplier, failing which the service may be discontinued. For purposes of this clause, the power factor shall be that determined during the half-hour of maximum demand on any working day in the month.

14. The Supplier reserves the right to discontinue supply of power for purposes of testing for a period not exceeding one hour once every month, and also at any other time, if it should appear necessary for the Supplier to test any portion of the plant in order to secure subsequent continuity of supply or for the purpose of connecting new machinery. These monthly stoppages may, at the option of the Supplier, be extended, on due notice, up to six hours once every six months. No reduction of the monthly charges shall be claimed by the Consumer on this account.

15. The Supplier and the Consumer agree that no tax other than that referred to in clause 11 supra shall be levied by either of them on the other in respect of the supply under this agreement. If any such tax is levied, the party so taxed shall be reimbursed by the other party to the extent of the tax so levied. The Consumer shall exempt from the operation of the Madras Motor Vehicles Taxation Act, 1931 as in force in Andhra State the motor

vehicles belonging to the Mysore Government Electricity Department and to the officers of that Department specified below, when used on (1) the Madhugiri-Madakasira Road, Pavagada Road (2) the Goribidnur-Hindupur-Parigi-Madakasira Road, or (3) the Madakasira-Dammathimari-Penukonda Road for the purpose of construction, operation or maintenance of the transmission and telephone lines in the territory of the Consumer:

(I) The Chief Electrical Engineer to the Government of Mysore, Bangalore.

(II) The Technical Assistant to the Chief Electrical Engineer.

(III) The Deputy Chief Electrical Engineer, Bangalore.

(IV) The Superintendent of Lines, Bangalore.

(V) The Assistant Superintendent of Lines Bangalore.

(VI) The Superintendent, Power and Light, Chickballapur.

(VII) The Assistant Superintendent, Power and Light, Chickballapur.

(VIII) The Government Electric Inspector, Bangalore.

(IX) The Assistant Government Electric Inspector, Bangalore.

16. The Supplier shall, within fifteen days after the expiration of each calendar month, deliver to the Consumer an account stating the number of units supplied to the Consumer by the Supplier in accordance with the readings of the aforesaid meters and the amount payable therefor as also the amount payable in respect of the maximum demand charge and other charges, if any, payable by the Consumer to the Supplier and the Consumer shall pay the same within thirty days from the delivery of such account. Provided that the Supplier shall be at liberty to charge interest at the rate of 7 per cent (seven per cent per annum on the amounts of such bills as are not paid within the abovesaid period of thirty days in addition to and without prejudice to the other rights of the Supplier

herein contained.

17. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid, or if the Consumer shall not in all things perform and observe the conditions herein contained and on the part of the Consumer to be observed and performed, then and in such cases and in addition to any other right or power possessed by the Supplier, the Supplier shall be at liberty at any time thereafter, nothwithstanding that the Supplier may not have taken advantage of any previous breach or default or event of a like nature, at its choice to suspend all further supply of electrical energy under this agreement, or to discontinue the supply once for all. Such suspension or discontinuance of the supply of electrical energy shall not relieve the Consumer of his liability to pay the minimum charge provided for herein nor shall such suspension or discontinuance affect any right, claim, demand or power which may have accrued to the Supplier.

18. (i) This agreement shall, subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of the supply of electrical energy under this agreement.

(ii) At the request of the Consumer this agreement may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the Supplier and the Consumer.

19. The Consumer confers on the Supplier the right of construction, operation, or maintenance, of the electric and telephone lines referred to above through the territory of the Consumer and also the right of extending the lines within the Supplier's territory and beyond the territory of the Consumer for a period of 60 years (inclusive of the period of this agreement) in the first instance.

20. The Consumer shall give the Supplier all necessary facilities for clearing jungle lands for the required width for the satisfactory running and maintenance of the above lines through the territory of the Consumer, and the Consumer shall not charge the Supplier compensation or royalty in any shape or form on account of these works on the Government lands within the Consumer's territory.

21. Any dispute or difference arising between the Supplier and the Consumer or their respective Electrical Engineers, as to the supply of electrical energy or the pressure thereof or as to the rates of supply, or as to the interpretation of this agreement or the right of the Supplier or the Consumer to determine the same or any other question, matter or thing arising hereunder shall be referred to a Board of Arbitrators to be constituted as follows, namely, each Government to select its own Arbitrator and both the Arbitrators together to select a third who shall be the Chairman of the Board and the decision of the Board of Arbitrators thereon shall be final and binding on both the parties.

Sir,

Subject: Electricity - Supply of Power to H ndupur
Draft agreement.

- - -

With reference to your letter No.1-C/D53-26, dated the 4th July 1956 on the above subject, I am directed to forward herewith two copies of the agreement duly signed for information and record.

Yours faithfully,

Sd. (B. Siddappa)
For Secretary to Government
Electrical Department

Memo No.EDS. 2358 | Elect 298-45-65

Enclosed (one copy of agreement) Dated Bangalore the 27th July 1956.

Copy of the above together with a copy of the agreement is forwarded to the Chief Electrical Engineer to the Government of Mysore, Bangalore for information.

By Order,

gc

(B.Siddappa)
For Secretary to Government
Electrical Dpartment.

nab.3)

AGREEMENT MADE THIS NINETEENTH day of JULY One thousand nine hundred and fifty six BETWEEN THE RAJPRAMUKH OF MYSORE (hereinafter called the "Supplier", which expression shall, where the context so admits, include his successors and assigns) of the one part AND THE GOVERNOR OF ANDHRA (hereinafter called the 'Consumer' which expression shall where the context so admits include his successors in office and assigns) of the other part;

WHEREAS the Consumer has requested the Supplier to furnish to him a supply of electrical energy upto 700 K.W. (Seven hundred Kilo-watts) for the purpose of distribution by the Consumer in the Hindupur area of the State of Andhra;

AND WHEREAS the Supplier has agreed to supply such energy to the Consumer for the period and upon the terms and conditions hereinafter set forth;

NOW THESE PRESENTS WITNESS that the parties have agreed in manner following, that is to say:--

1.(i) The Supplier agrees to supply to the Consumer electrical energy upto 700 K.W. in bulk at the point of supply mentioned in Clause 2 hereof at 33 K.V. 3 Phase, 25 cycles, which may be converted to 33 K.V. 3 Phase, 50 cycles sometime in the year 1955-56 or later.

(ii) In the event of the Consumer requiring at any time a supply of more than 700 K.W. such additional supply as the Supplier may agree to afford may be made by the Supplier to the Consumer on terms and conditions to be mutually agreed upon, provided inter alia that the Consumer gives intimation of his requirements at least three months in advance.

2. The point of supply shall be at a place to be mutually agreed upon in the neighbourhood of Hindupur but within the border of the Mysore territory and a single 33 K.V.line and telephone line shall be run from the Supplier's present terminal at

Doddaballapur to Pavagada (via Goribidanur, Dalvatta, Vithalapura and Basavanahatti) through the point of supply, at the expense of the Supplier and the Supplier will at his expense lay, fit up, maintain, supervise and keep in repair, suitable and proper cables and other apparatus for such supply and for metering at the point of supply. The cost of line within the Mysore territory, the cost of line to Pavagada inclusive of 5 miles line passing through the intervening Andhra territory and that of the 33 K.V. metering equipment, will be borne by the Supplier. The cost of line within the Andhra territory, except that in the intervening territory mentioned above, will be borne by the Consumer.

3.(i) The Supplier will take all reasonable precuations to ensure a supply of power to the Consumer and the due continuity of such supply with as little variation of voltage and frequency as is reasonably practicable, but the Supplier shall not be liable to the Consumer for any loss due to interruption in the supply of power by reason of cutting off of or damage to any wires or works of the Supplier due to war, mutiny, riot, or strike or by reason of earthquake, hurricane, or tempest, or of any accident or causes not within the control of the Supplier, provided always that the Supplier shall give notice as early as possible of the probable duration of any interruption in the supply due to any of the aforesaid causes and will use every practicable means to make the period of interruption as short as possible.

(ii) If at any time the Consumer is prevented from receiving and using the electrical energy to be supplied under this agreement either in whole or in part owing to any strikes, riots, insurrections, lawful command of a

Civil or Military authority, fire, explosion, act of God or any other cause beyond the control of the Consumer, the minimum charge under this agreement shall be reduced in proportion to the ability of the Consumer to take supply.

4. For the purpose of registering the electrical energy taken and the demand in kilowatts made by the Consumer under this agreement, there shall be provided by the Supplier one suitable 33 K.V. metering equipment at the point of supply within the border of the Mysore territory, which shall be the property of and be kept in repair and calibrated by the Supplier. The Consumer shall be charged meter rent in accordance with the rules for the time being in force in the Department of Electricity of the Supplier.

5. The Consumer may, at his own expense, install check meters at the metering point of the Supplier.

6. The meters belonging to the Supplier shall be kept properly sealed by the Supplier, and the meters belonging to the Consumer shall be kept properly sealed by the Consumer. The meters shall not be interfered with by either party except after due intimation to the other party.

7. The readings of the said meters installed by the Supplier shall be taken by the accredited representatives of the Supplier at or as near noon as practicable on the last day of each calendar month, and the readings so taken shall be binding and conclusive between the Supplier and the Consumer as to the amount of electrical energy supplied to the Consumer. The ~~Conquerrs~~ Consumer's representative may arrange to be present at the time of taking the readings. In the event of any meter being found defective and a check meter not having been installed, the power consumed for the period during which the meter was defective shall be determined by taking the daily average consumption

for the previous period of supply not exceeding three months. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force.

8.(i) Once in every year the meters shall be calibrated and standardised if considered necessary by the Supplier, in the presence of a representative of the Consumer.

(ii) Adjustments in bills will be made for error at average load and power-factor of the Consumer, when the meter is found to be incorrect during annual periodical tests, for a preceding period of three months unless there is evidence for adopting a different period. The meter or meters shall be deemed to be correct if as a result of test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electri Rules, 1937, or any statutory modification thereof for the time being in force.

9. Either party to this agreement, may, at any time and after reasonable notice to the other party, have a special test carried out of any or all the meters belonging to the Supplier above mentioned at a place to be fixed by mutual agreements. The meter or meters so tested shall be deemed to be correct if as a result of such test, the meter or meters is or are found to vary within the limits prescribed by the Indian Electricity Rules, 1937, or any statutory modification thereof for the time being in force. If the mean error be found to be more than that prescribed by the said Indian Electricity Rules or any statutory modification thereof for the time being in force, the Supplier will deduct from or add to

the account of the preceding period of three months an amount equivalent to the error. The expenses of such test shall be borne by the Supplier in the event of the account requiring any adjustment as herein before mentioned. If no adjustment of the account is necessary as a consequence of such special test, the party at whose instance the test was conducted shall bear the cost of such tests.

10. The rates to be charged upto 30th June 1953 by the Supplier for the power supply at the point of supply under this agreement will be in accordance with the high tension tariff set out below:--

Class and total monthly consumption in K.W.H.	Rate per K.W.H. anna.	Rate per K.W. of maximum demand per month.
I. Upto 1,00,000	0.450	Upto 1,000 K.W. Rs.3/-
II. Exceeding 1,00,000 & upto 1,50,000	0.425	
III. " 1,50,000 " 2,00,000	0.400	1,000 K.W. and over
IV. " 2,00,000 " 3,00,000	0.375	Rs.2.12.0
V. " 3,00,000 " 5,00,000	0.350	
VI. " 5,00,000 " 10,00,000	0.325	
VII. " 10,00,000	0.300	

But from 1st July 1953, the rates to be charged will be in accordance with the high tension tariff set out below:

Class and total monthly consumption in K.W.H.	Rate per K.W.H. in anna.	Rate per K.W. of maximum demand per month.
I. Upto 1,00,000	0.450 plus 22% of 0.450	Less than 1000 K.W. Plus Rs.3/-
II. Exceeding 1,00,000 Upto 1,50,000	0.425 plus 22% of 0.425	
III. " 1,50,000 " 2,00,000	0.400 plus 22% of 0.400	
IV. " 2,00,000 " 3,00,000	0.375 plus 22% of 0.375	Plus 1000 K.W. and over Rs.2.12.0
V. " 3,00,000 " 5,00,000	0.350 plus 22% of 0.350	
VI. " 5,00,000 " 10,00,000	0.325 plus 22% of 0.325	
VII. " 10,00,000	0.300 plus 22% of 0.300	

The above tariff is subject to a maximum overall unit charge of 0.66 anna per unit without prejudice to the minimum monthly payment defined in Clause 12, provided the consumption is in excess

of 1,20,000 units per month. If the consumption is below 1,20,000 units per month, the tariff is subject to a maximum overall unit charge of 0.75 anna per unit without prejudice to the minimum monthly payment defined in clause 12.

11. In addition to the rates specified in Clause 10 of the agreement, the Consumer shall also pay to the Supplier a sum of money which shall be equivalent to the tax levied under section 3 of the Mysore Electricity (Taxation on consumption) Act, 1950, in respect of energy consumed by consumers of high tension bulk supplies of electricity, on consumers of electricity, in the territories of Mysore. If the Supplier should, at a future date, levy a further surcharge or tax on consumption of energy on high tension bulk supplies of electricity on Consumers of electricity in the territories of Mysore, the Consumer shall be liable to pay to the Supplier such further sums of money which shall be equivalent to such further surcharge or taxes.

12.(i) For the purpose of this agreement, the maximum demand of supply to the Consumer for each month shall be the maximum demand at the point of supply during any consecutive thirty minutes in the month.

(ii) Maximum demand charges for any month and at the point of supply shall be based on maximum kilowatt demand as determined in accordance with sub-clause (i) for the previous calendar months commencing from January of each year and ending with the month in question. For the first calendar year of service the demand charge for any month will be based on the maximum kilowatt demands for the months commencing with the month of commencement of supply and ending with the month in question. The demand charge for the first month of operation will correspond to the maximum demand for

that month.

(iii) The demand payment will be a fixed monthly charge, whether energy is consumed or not, and shall constitute the minimum monthly payment.

13. The Power-factor of the plant and apparatus owned by the Consumer at the point of supply shall not be less than 0.8. Should the power-factor be below 0.8 and more than 0.7 it is liable to a penalty of 8 annas (eight annas) per K.W. of monthly demand while if the power factor drops below 0.7 it must be brought up by methods approved by the Engineers of the Supplier, failing which the service may be discontinued. For purposes of this clause, the power factor shall be that determined during the half-hour of maximum demand on any working day in the month.

14. The Supplier reserves the right to discontinue supply of power for purposes of testing for a period not exceeding one hour once every month, and also at any other time, if it should appear necessary for the Supplier to test any portion of the plant in order to secure subsequent continuity of supply or for the purpose of connecting new machinery. These monthly stoppages may, at the option of the Supplier, be extended, ~~on the notice~~ after reasonable notice, up to six hours once every six months. No reduction of the monthly charges shall be claimed by the Consumer on this account.

15. The Supplier and the Consumer agree that no tax other than that referred to in clause 11 supra shall be levied by either of them on the other in respect of the supply under this agreement. If any such tax is levied, the party so taxed shall be reimbursed by the other party to the extent of the tax so levied. The Consumer shall exempt from the operation of the Madras Motor Vehicles Taxation Act, 1931 as in force in Andhra State the motor

vehicles belonging to the Mysore Government Electricity Department and to the officers of that Department specified below, when used on (1) the Madhugiri-Madakasira Road, Pavagada Road (2) the Goribidnur-Hindupur-Parigi-Madakasira Road, or (3) the Madakasira-Dammathimari-Penukonda Road for the purpose of construction, operation or maintenance of the transmission and telephone lines in the territory of the Consumer:

(I) The Chief Electrical Engineer to the Government of Mysore, Bangalore.

(II) The Technical Assistant to the Chief Electrical Engineer.

(III) The Deputy Chief Electrical Engineer Bangalore.

(IV) The Superintendent of Lines, Bangalore.

(V) The Assistant Superintendent of Lines Bangalore.

(VI) The Superintendent, Power and Light, Chickballapur.

(VII) The Assistant Superintendent, Power and Light, Chickballapur.

(VIII) The Government Electric Inspector, Bangalore.

(IX) The Assistant Government Electric Inspector Bangalore.

16. The Supplier shall, within fifteen days after the expiration of each calendar month, deliver to the Consumer an account stating the number of units supplied to the Consumer by the Supplier in accordance with the readings of the aforesaid meters and the amount payable therefor as also the amount payable in respect of the maximum demand charge and other charges, if any, payable by the Consumer to the Supplier and the Consumer shall pay the same within thirty days from the delivery of such account. Provided that the Supplier shall be at liberty to charge interest at the rate of 7 per cent (seven per cent) per annum on the amounts of such bills as are not paid within the abovesaid period of thirty days in addition to and without prejudice to the other rights of the Supplier

227)

herein contained.

17. If any payment herein provided for or any part thereof shall be unpaid for the space of thirty days next after any of the days whereon the same ought to have been paid as aforesaid, or if the Consumer shall not in all things perform and observe the conditions herein contained and on the part of the Consumer to be observed and performed, then and in such cases and in addition to any other right or power possessed by the Supplier, the Supplier shall be at liberty at any time thereafter, notwithstanding that the Supplier may not have taken advantage of any previous breach or default or event of a like nature, at its choice to suspend all further supply of electrical energy under this agreement, or to discontinue the supply once for all. Such suspension or discontinuance of the supply of electrical energy shall not relieve the Consumer of his liability to pay the minimum charge provided for herein nor shall such suspension or discontinuance affect any right, claim, demand or power which may have accrued to the Supplier.

18.(i) This agreement shall, subject as hereinbefore provided, be and remain in force for a period of ten years from the date of commencement of the supply of electrical energy under this agreement.

(ii) At the request of the Consumer this agreement may be extended beyond the period of ten years for a further period on terms and conditions to be mutually agreed upon by the ~~x~~ Supplier and the Consumer.

19. The Consumer confers on the Supplier the right of construction operation, or maintenance, of the electric and telephone lines referred to above through the territory of the Consumer and also the right of extending the lines within the Supplier's territory and beyond the territory of the Consumer for a period of 60 years (inclusive of the period of this agreement) in the first ~~xxxxxxx~~ instance.

20. The Consumer shall give the Supplier all necessary facilities for clearing jungle lands for the required width for the satisfactory running and maintenance of the above lines through the territory of the Consumer, and the Consumer shall not charge the Supplier compensation or royalty in any shape or form on account of these works on the Government lands within the Consumer's territory.

2781

21. Any dispute or difference arising between the Supplier and the Consumer or their respective Electrical Engineers, as to the supply of electrical energy or the pressure thereof or as to the rates of supply or as to the interpretation of this agreement or the right of the Supplier or the Consumer to determine the same or any other question, matter or thing arising hereunder shall be referred to a Board of Arbitrators to be constituted as follows, namely, each Government to select its own Arbitrator and both the Arbitrators together to select a third who shall be the Chairman of the Board and the decision of the Board of Arbitrators thereon shall be final and binding on both the parties.

IN WITNESS WHEREOF THE Parties have set their hands and seal hereunto in the presence of witnesses.

GENERAL AND REVENUE SECRETARIAT

Serial Nos.

Part B for

SUBJECT

Supply of Electricity to Hindupur Municipality - Residency correspondence.

Serial. No.

Subject:- Supply of electricity to Hindupur Municipality.

Reference:-Chief Electrical Engineer's letter No.19057 dated the 14th March 1941.

In May 1939, the Chief Electrical Engineer submitted for sanction an estimate amounting to --- Rs 1,04,900/- for power supply to Hindupur. The estimate provided for the extension of the 37,500 volts, 3 phase line from Dodballapur to Goribidnur, a distance of 22 miles and from Goribidnur to the State Frontier, a distance of 9 miles, using 46½ feet fabricated structures with suitable sectionalising switches, etc. A revenue of Rs 27,375/- was expected from the above scheme and the anticipations of the Chief Electrical Engineer were as follows:-

1. For the first 25,000 units (guaranteed minimum consumption)	@ Re.0-1-0 per unit.	
2. For the remaining 11,500 units	@ .8 anna	"
3. For power over and above 36,500 units	@ .6 anna	"
4. For the first 25,000 units		Rs 1,562- 8- 0
5. For the remaining 11,500 "		Rs 718-12- 0
Total per month		Rs2,281- 4- 0
Revenue per annum		Rs 27,375- 0- 0 or 17% gross return.

He strongly recommended that the question of power supply to Hindupur might be favourably --- considered in view of its being a remunerative proposition.

Thereupon the Residency was requested to ascertain

[P.T.O.

ascertain from the Madras Government whether they desired that the Town of Hindupur should be supplied with electric power from the Mysore State if this was found feasible. In November 1939, the Secretary to the Hon'ble the Resident replied that the Government of Madras would be prepared to consider the question later, if the Government of Mysore were willing to supply at 50 cycles at a place very near to Hindupur on favourable conditions and rates.

The Chief Electrical Engineer was informed that it was not necessary to sanction the estimate in view of the above decision of the Government of Madras and also of the fact that the same might require revision on account of war.

In January 1941, the Residency enquired at the instance of the Government of Madras whether the Government of Mysore would now be willing to supply electricity at 50 cycles to the Hindupur Municipality at an economical rate and requested to be furnished with information re. conditions, rates, place of supply etc.

The Chief Electrical Engineer, who was requested to furnish the above information, states that the estimate for Rs 1,04,000/- submitted with his letter dated the 24th/30th May 1939 was returned unsanctioned in --- November 1939 based on the reply of the Government of Madras referred to above. It is mentioned that the electric power supply has not yet been converted from 25 to 50 cycles and that, if the Madras Government require 50 cycle power, they will have to provide the

ELECTRICAL SECRETARIAT.

Subject:- Supply of electricity to the Hindupur Municipality.

File No. of 19 .

Serial. No.

the necessary converters at Hindupur, if the Mysore Government agree to supply power at the Frontier between Mysore and Madras. The Chief Electrical Engineer adds that he is not prepared to recommend any reduction in the rates, terms and conditions, already suggested (please vide folios 41 and 42 of stitched section) as the costs of all materials required for this project have substantially ---- increased by reason of the war.

He has not however stated whether the estimate submitted by him previously does not require revision and whether the revenue anticipations still hold -- good.

A draft letter to the Chief Electrical Enginee is accordingly put up for favour of approval or orders.

S i r,

Supply of electricity to the Hindupur Municipality.

I am directed to acknowledge the receipt of your D.O. letter No.D.F.689-40/Pol dated the 22nd May 1941 addressed to the Chief Secretary to Government on the above subject.

2. I am to state in reply that the electric power supply in Mysore is ~~now~~ at present on the 25 cycle system and as the Hindupur Municipality desire power to be supplied at 50 cycles, they ~~will~~ would have to provide the necessary converters at Hindupur. The Government of Mysore would be willing to supply power to Hindupur if the Hindupur Municipality agree to run a 37,500 volts, three phase, 25-cycles line from the State frontier to Hindupur and instal also the necessary frequency changer sets, sub-station equipments etc. at Hindupur, at their own cost, the power being metered in their sub-station on the high tension side. The Mysore Government offer the undermentioned rates and conditions for the power supply referred to:-

(i) For the first 30,000 units, (the monthly minimum consumption to be guaranteed) at Rs 0-1-0 per B.O.T. unit.

(ii) For the next 30,000 units at 0.8 of an anna per B.O.T. unit.

(iii) For power over and above 60,000 units at 0.6 of an anna per B.O.T. unit.

The Hindupur Municipality should guarantee a monthly minimum consumption of 30,000 units and a monthly minimum charge of Rs 1875/-. ~~as mentioned in para 3 above~~.

5

3. I am to request you kindly to communicate the above terms and conditions to the Government of Madras and intimate whether the Hindupur Municipality are agreeable to take power on these conditions. After receipt of a definite reply in the matter, the Mysore Government would be glad to take steps to sanction the necessary estimate for the work.

I have etc.

FINAL NOTE BY THE MINISTER FOR LAW.

...

Subject : - Proposal for supply of electricity to the Hindupur Municipality.

...

These papers relate to the question of power supply to the Hindupur Municipality.

In May 1939, the Chief Electricial Engineer submitted for sanction an estimate amounting to Rs.1,04,400/- for power supply to Hindupur. The estimate provided for the extension of the 37,500 volts, 3 phase line from Dodballapur to Goribidnur, a distance of 22 miles and from Goribidnur to the State frontier, a distance of 9 miles, using 46½ feet fabricated structures with suitable sectionalising switches, etc. A revenue of Rs.27,375/- per annum was expected from the above scheme and the anticipations of the Chief Electrical Engineer were as follows:-

(1) For the first 25,000 units (guaranteed minimum consumption) @ 1 anna per unit	...Rs.	1562 8 0
(2) For the next 11,500 units @ 8 annas " "	...Rs.	718 12 0
Total per month	...Rs.	2281 4 0

Revenue per annum Rs.27,375 or 17 per cent on the capital cost.

For power consumed over and above 36,500 units a rate of 0.6 anna per unit was suggested.

In January 1941, the Residency enquired at the instance of the Government of Madras whether the Government of Mysore would not be willing to supply electricity at 50 cycles to Hindupur Municipality at an economical rate and requested to be furnished with information regarding conditions, rates, place of supply etcetra.

The Chief Electrical Engineer who was requested to furnish the above information stated that electric power supply has not

yet been converted from 25 to 50 cycles and that if the Government of Madras require 50 cycle power, they will have to provide the necessary converters at Hindupur. Thereupon he was requested to intimate whether the estimate for Rs.1,04,400/- submitted by him in May 1939 did not require revision on account of the rise in prices of electrical materials due to war and whether the revenue forecast and the rates and conditions mentioned therein still held good.

With his letter of the 19th May 1941, the Chief Electrical Engineer has submitted a modified estimate amounting to - Rs.1,82,150/- providing for the increase in prices of electrical materials due to war, and has recommended the undermentioned rates : -

1. For the first 30,000 units (guaranteed monthly minimum consumption) @ 1 anna per B.O.T. unit...		Rs.1,875/-
2. For the next 30,000 units @ 0-8 anna per B.O.T. unit	...	Rs.1,500/-
3. For power over and above 60,000 units at 0.6 anna per B.O.T. unit.	...	Rs. -
Total	...	Rs.3,375

He has recommended also that the Hindupur Municipality should guarantee a monthly minimum consumption of 30,000 units and a monthly minimum charge of Rs.1,875/-. The other terms are also contained in the Chief Electrical Engineer's letter of the 19th May 1941.

The Residency request that any information that may be available on the subject may be communicated to them by the 22 June 1941 at the latest.

A draft reply to the Residency in terms of the Chief Electrical Engineer's letter referred to above is placed in file. It has been approved by the Dewan and other Ministers

The same may be graciously approved.

MINISTER FOR LAW.

BANGALORE.

Sir,

ELECTRIFICATION OF HINDUPUR.

With reference to your letter No.EDS.1909 dated 12th March 1941, I have the honour to state that the estimate for Rs1,04,000/- submitted with my letter No.27632 dated 24/30th May 1939 was returned unsanctioned in EDS. No.1209 dated 20th November 1939, as the Government of Madras had replied that the proposal of the Government of Mysore to supply electricity to Hindupur could not be taken up at present and that they would be prepared to consider the question later, if the Government of Mysore were willing to supply at 50 cycles at a place very near Hindupur on favourable conditions and rates.

Our electric power supply has not yet been converted from 25 to 50 cycles, therefore if Madras Government require 50 cycles they will have to provide the necessary converters at Hindupur if Mysore Government agree to supply the power at the Frontier between Mysore and Madras.

As the costs of all materials required for this Project have substantially increased by reason of the War

I am not prepared to recommend any reduction in the rates, terms and conditions already recommended.

I have the honour to be,
Sir,
Your most obedient servant,

SGF-LID-VJN.

D.666
21/5/41

Sir,

ELECTRIFICATION OF HINDUPUR

With reference to your letter No.EDS/2035 dated 27-3-41 I have the honour to state that the estimate for Rs1,04,400/- for the above work submitted to Government in this office No.27632 dated 24-5-1940 has been modified to Rs1.82,150/- providing for the increase in prices of electrical materials due to war. The revised estimate is herewith submitted for favour of orders of Government. The report accompanying the estimate explains the provisions made in the estimate and the conditions under which power supply will be made available to Hindupur.

A 37,500-volts line is proposed to be run to the State Frontier from Dodballapur via Goribidnur. The estimate provides for the transmission line and other equipment necessary for this purpose. Running the 37,500 volts line from the State Frontier to Hindupur and installing Frequency Changer Sets, sub-station equipments, etc., at Hindupur, will have to be executed by the Hindupur Municipality at their expense. The estimate does not provide for these items of work.

I have carefully studied the present load conditions in

Hindupur and the future load demands as forecast by the Hindupur Municipal Engineer. With a population of nearly 20,000 an important place like Hindupur can certainly consume power commensurate with the load now consumed in Shimoga, a town with a population about equal to that of Hindupur. Shimoga now takes on an average more than 1,00,000 units per month and as such, Hindupur can certainly be expected to consume not less than 60,000 units per month. When the consumption reaches this figure, Government's revenue will at the rates now recommended be Rs3,375/- per mensem equivalent to approximately 22.2% on the capital cost.

The Municipal Commissioner, Hindupur, in his letter No.2967-G.36 dated 23rd February 1939, copy of which is herewith attached, and during his subsequent interviews with me, has furnished details of the connected load and the maximum demand that could be expected and the maximum consumption of units per month, on which the estimate is based.

The normal consumption expected by the Municipality per month is estimated at 36,500 units. In consideration of the future load demand in and around Hindupur, I recommend the following revised rates under the condition, that our line terminates at the frontier and all expenses towards the main line and sub-station system etc., outside the State being borne by the Hindupur Municipality and power being metered in their sub-station on the High Tension side:-

1, For the first 30,000 units (guaranteed monthly minimum consumption) at Re.0-1-0 per unit	...	1,875/-
2. For the next 30,000 units at0.8 anna per unit.	...	1,500/-
3. For power over and above 60,000 units at0.6 anna per unit.	...	--
Total	...	Rs3,375/-

Guaranteed monthly minimum consumption	...	30,000 Units.
Guaranteed monthly minimum charges.	...	Rs1,875/-

If this proposal is not sanctioned the estimate submitted with this office No.15409-10 dated 25-1-41 for increasing the capacity of the 4600 volt line from Chickballapur to Goribidanur should be sanctioned as early as possible as the existing line is heavily overloaded and new applicants for power service cannot be accepted without causing still lower voltages for existing consumers.

I have the honour to be,
Sir,
Your most obedient servant,

SGF.LiD.PM.GVS.

Chief Electrical Engineer.

PM
20/5

Letter No.R.C.2967/G-36 dated the 23rd February 1939 from the Commissioner, Hindupur Municipality, to the Chief Engineer for Electricity, Mysore Government, Bangalore.

Hindupur Municipality - Investigation into bringing Mysore Bulk Supply.

Ref: Informal discussion of 10th January 1939.

In continuation of the informal discussion, I and the Municipal Electrical Engineer had with you on 10th January 1939, I have the honour to intimate to you that a consultation on this subject was made with the Electrical Inspector, Electricity Department, Madras, Government, Madras, on 14-2-1939 and now I am in a position to furnish you the following information upon some of the points raised by you. Further, I have the honour to request you to furnish me information on the following points and give me an interview to discuss these and certain other features of this Scheme. I desire to come to your office on Monday the 27th February 1939 during office hours and wish to know if that date will suit you or your Technical Assistants.

The following gives information on the points raised by you:-

(1) That the connected load of this Municipality is 225 kW.

(2) The Maximum demand will be about 100 kW.

(3) The Maximum consumption of units per month shall be 36,500 Units.

(4) The average consumption shall be about 2/3 of the above at the outset.

(5) This estimate has been prepared on a conservative basis for immediate necessities; but a good future is expected after convassing and load development.

Information on the following points is requested of you with an opportunity to discuss these and other points at an informal discussion on 27th February 1939:-

(1) Whether we can take at your existing system of 3 phase 4,500 volts at 25 cycles right up to Hindupur from your Frontier.

(2) Whether you have any objection if we change your frequency of 25 cycles/Sec. into 50 cycles/Sec. to conform to the populat system of the Madras Presidency and also the voltage suitably.

(3) Whether it is possible for you to draw up and own the transmission line from Doddakurugodu till Hindupur provided we pay you on your Capital charges and suitable approval and technical sanction from our Government are obtained.

(4) Whether you are willing to maintain the above Transmission Line for any charges mutually agreed upon.

(5) The period of currency of the agreement between us in case a supply is given.

Only certain important points have been put before you with the hope of discussing a number of other details at an interview.

I hope you would be good enough to grant an interview at Bangalore on 27th February 1939 at your office between 11 and 12 noon.

The favour of an early reply is requested.

THE MYSORE BULK SUPPLY SCHEME

Load Fore-cast

(Period 10 years)

Particulars of Load.	Anticipated load 10 years.	No. of hours.	Units consumed Anticipated per month.	Remarks
	kW.	Hours		
1. Street Lighting.	20	300 per month	6,000	
2. WATER WORKS:-				
1) Municipal:-				
2 Motors of 30 B.H.P. Lighting and gardens : 1 kW Total : 25 kW.	25	16 per day	12,000	
ii) Railway Pump House:-				
2 Motors of 20 BHP. Lighting, etc., Total : 15 kW.	15	12 per day	5,400	
3. Cinema:-				
Load for Arc Lamp Projector site 5 kW. Lights and fans 2½ " Total 7½ kW Provision for 2 cinemas	15	6 per day	2,700	
4. Domestic Pumps:-				
Average Load of each 2 kW Ten pumps are expected	25	4 per day	2,400	
5. Mill Load:-				
1) Industrial:-				
1) Rice Mills 2) Groundnut decorticators and oil presses (3) Flour Mills etc., 7 Mills are expected.	100	8 per day	15,000	
ii) Cottage Industries and Power Looms				
A number of power looms for silk and cotton weaving are expected to be started as in Doddaballapur.	30	8 per day	6,000	
6. Agricultural Loads:-				
Pumps for agriculturists for irrigating Sugar cane fields, gardens etc., About 10 are expected.	25	4 per day	3,000	

7. Special Lighting:-			
Hindupur Railway Station by special contract.	5	8 per day	1,200
8. Domestic Lighting:-			
Fans, Lights, single lights, etc., small power for domestic apparatus, refrigerators, etc.	200	6 per day	20,000
Total ...	460 kW	-	73,700 Units

LID.PM.GVS.

for L. Iswar Babu
Chief Electrical Engineer.

GOVERNMENT OF MYSORE. ELECTRICAL DEPARTMENT.

Report to accompany the estimate for power supply to Hindupur:-

The question of power supply to Hindupur was considered in the year 1934 when a deputation from the Hindupur Municipality waited on the Dewan of -- Mysore. But the question was dropped in view of the then load conditions in the State which did not permit of any large blocks of power being spared for places outside the State.

The question of power supply to Hindupur was taken up again for consideration in view of the further representations made by the people of Hindupur to the First Member of Council during his tour in Kolar District in February 1939 and the frequent interviews the Municipal Commissioner and other leading citizens of Hindupur had with the Chief Electrical Engineer. An estimate for Rs1,04,000/- for supply of power up to the State Frontier was submitted to Government in Chief Electrical Engineer's No. 27632 dated 30-5-1939 and returned in E.D.S.No. 1209 dated 20-11-1939 observing that the Madras Government would consider the question of taking power to Hindupur Municipality, if the Mysore Government was agreeable to supply power at 50 Cycles at a place very near Hindupur.

The question has been taken up again as per letter No. E.D.S.1449 dated 16th January 1941 from the Secretary to the Government of Mysore, Electrical Department, Bangalore, and the estimate revised to Rs1,82,150/- providing for the rise in prices of Electrical materials.

The Municipal Commissioner of Hindupur in his letter No. 2967/G. 36 dated 23rd February 1939 has furnished

the details re: the connected load, the maximum demand that could be expected, the maximum consumption of units per month, etc., on which the estimate is based.

The estimate is prepared on a conservative basis, as the Commissioner reports in his letter that the load demands are expected to be much more than what is actually stated therein.

The estimate provides for the extension of the 37,500 volts, three phase, 25 cycles line from Dodballapur to Goribidnur, a distance of 22 miles and from Goribidnur to the State Frontier, a distance of 7 miles, using 40 feet Ascu treated poles with suitable sectionalising switches, etc.,

A telephone line is also to be extended from Dodballapur to the State Frontier, via, Goribidnur to maintain satisfactory power service to Hindupur.

Provision is made in the estimate for the necessary buildings at Dodballapur, Goribidnur and at an intermediate place on the transmission line.

The 4,600 volts, 3 phase line now running between Chickballapur and Goribidnur, a distance of 21 miles is already overloaded and the voltage conditions at Goribidnur are very bad, therefore an estimate to remodel the line in order to provide the necessary line capacity to Goribidnur for existing overloads and to supply additional loads in that area has been submitted to Government in Chief Electl. Engineer's No. 15409-10 dated 25th January 1941. The present proposal to extend the 37,500 volts line from

Dodballapur to Goribidnur completely eliminates the necessity for remodelling the line, therefore early orders on this proposal are requested, for if it is sanctioned the work of remodelling the Chickballapur-Goribidnur line will not be necessary.

The installation of an out-door Transformer Station at Goribidnur is, however, necessary for the supply of power to Goribidnur from the 37.5 KV line provision for which has been made in this estimate.

The transmission line from the State Frontier to Hindupur does not form part of this estimate and will have to be executed by the Hindupur Municipality.

ELECTRICAL SECRETARIAT
BANGALORE.
Reg. No. 2136
Date 23-5-41

SUPPLY OF ELECTRICITY TO
HINDUPUR MUNICIPALITY.

My Dear Kesavaiengar,

I am desired to say that the Government of Madras wrote to this Residency at the end of December last asking whether the Government of Mysore would be willing to supply electricity at 50 cycles to the Hindupur Municipality at an economical rate and if so, on what terms (conditions, rates and place of supply, etc.). The Secretary to the Government of Mysore, Electrical Department, was addressed officially on the 8th January 1941 to furnish material for a reply to the Government of Madras. In his letter No.E.D.S.2193, dated the 17th April 1941, he informed this Residency that the matter was under correspondence with the Chief Electrical Engineer. The Government of Madras were informed accordingly.

2. The Government of Madras now write that His Excellency the Governor of Madras is likely to visit Hindupur on the 2nd July next and, since almost 6 months have elapsed since their first enquiry, would be grateful if some information on the subject could be given at an early date and in any case before His Excellency visits Hindupur.

Yours Sincerely

A Macaulay.

Subd.
The delay in supplying this info requires looking into. It was true advantage to have gone ahead with the proposal.

30th MAY '41

Dear Sir,

I am desired to request you kindly to furnish data of cost for supplying electric power to the Hindupur Municipality including the cost of the proposed transmission line from Dodballapur to the frontier and the line losses up to Hindupur where power supply is proposed to be metered.

An immediate reply is requested.

Yours sincerely,

ELECTRICAL DEPARTMENT

OFFICE OF THE CHIEF ELECTRICAL ENGINEER,
(MYSORE, S. INDIA.)

Bangalore, 22 JUNE 1941.

From

S. G. FORBES, ESQ., E.E., B.SC., E. & M.E., MEM. A.I.E.E.,
CHIEF ELECTRICAL ENGINEER
TO THE GOVERNMENT OF MYSORE,
BANGALORE.

To

The Secretary
to the Government of His Highness
the Maharaja of Mysore,
BANGALORE.

Sir,

POWER SUPPLY TO HINDUPUR.

With reference to D.O. letter No. EDS. 2590 dated 30th May 1941 from the Assistant Secretary, Electrical Secretariat, Bangalore, I have the honour to state that the data of cost per unit for supplying power to the Hindupur Municipality is arrived at, on the following basis:--

In this connection, I have to mention that the present proposal to extend the transmission line from Dodballapur to Hindupur via Goribidnur is made with a view to improve the conditions at Goribidnur and as such I have taken into consideration this aspect of the question also in my calculations for arriving at the cost per unit as delivered at Hindupur.

The total cost of the estimate for extending the transmission line from Dodballapur to State Frontier is Rs1,82,150/- and it includes the cost of a step-down station at Goribidnur. Also the transmission line and the buildings between Dodballapur and Goribidnur serve both Goribidnur as well as Hindupur and hence half the cost of this portion along with the cost of the

step-down station at Goribidnur is deducted from the total cost of the estimate to arrive at the cost to be allocated for power supply to Hindupur, which will be Rs98,015/-.

The interest on this amount is taken at 3½% per annum and the depreciation at 2½% per annum and the working expenses, Viz., the staff and the materials, are taken at 50% of the total provided for in the estimate vide statement "H".

From the load data furnished by the Hindupur Municipality, the maximum load that can be expected in the course of a 10-year period is 460 K.W. and for purposes of calculating the line loss, it is taken at 500KW. Analysing the loads the industrial or the day load is 200 K.W. and the lighting load is 260 K.W. Hence the average load is taken to be 250 K.W. which gives a load factor at 50% for this line.

The cost per unit is arrived at on the assumption that 60,000 units will be consumed per month as already stated by me which will work up to 7,20,000 units per annum. The line loss for the entire line from Dodballapur to Hindupur, assuming that the line between the State Frontier and Hindupur would be similar in all respects to the line that is proposed to be extended from Dodballapur to the State Frontier by us, will be 2½% with a load -- factor of 50%.

The cost per unit as delivered at Hindupur will work out to 4Pies or .33 of an anna taking the cost per unit generated as 1.8 Pies plus the interest, depreciation, working expenses and the line loss as stated above.

The rates proposed by me to be charged to Hindupur Municipality as mentioned in my letter No. 33262-63 dated 19th May 1941 are as follows:-

For the Ist 30,000 Units	...	Re. 0-1-0 per unit.	
For the next 30000 Units	...	.8 of an anna)	Do
For over & above 60,000 Units	...	.6 of an anna)	Do

These rates are very favourable when compared with the cost of unit as delivered at Hindupur.

I may also mention here that the estimates for improving the voltage conditions or increasing the -- capacity of the line between Chikballapur and Goribidnur submitted by me will not be necessary as the improvement proposed therein will be provided for by installing a step-down station at Goribidnur which is included as a part of the estimate for power supply to Hindupur.

I have the honour to be,
S i r,
Your most obedient servant,

CHIEF ELECTRICAL ENGINEER.

NOTE—Contn. Sheet.

IMMEDIATE

No E 82710

24th JUNE 41

The Secretary to the Hon'ble
the Resident in Mysore,
Bangalore.

Subject:- Supply of electricity to the Hindupur Municipality.

Sir,

I am directed to acknowledge the receipt of your D.O. letter No.D.F.689-40/Pol. dated the 22nd May 1941 addressed to the Chief Secretary to Government on the above subject.

2. I am to state in reply that the electric power supply in Mysore is at present on the 25 cycle system and as the Hindupur Municipality desire power to be supplied at 50 cycles, they would have to provide the necessary converters at Hindupur. The Government of Mysore would be willing to supply power to Hindupur if the Hindupur Municipality agree to run a 37,500 Volts, three phase, 25 cycles line from the State frontier to Hindupur and instal also the necessary frequency changer sets, sub-station equipments etc., at Hindupur, at their own cost, the power being metered in their sub-station on the high tension side. The Mysore Government offer the undermentioned rates and conditions for the power supply referred to:-

(i) For the first 30,000 units, (the monthly minimum consumption to be guaranteed) at Rs 0-1-0 per B.O.T.Unit.

(ii) For the next 30,000 units at 0.8 of an anna per B.O.T.Unit.

(iii) For power over and above 60,000 units at 0.6 of an anna per B.O.T.Unit.

The Hindupur Municipality should guarantee a monthly minimum consumption of 30,000 units and a monthly minimum charge of Rs 1,075, -

I will be obliged if you kindly to communicate the above terms and conditions to the Government of Madras and intimate whether the Hindupur Municipality are agreeable to take power on these conditions. After receipt of a definite reply in the matter, the Mysore Government would be glad to take steps to sanction the necessary estimate for the work.

I have the honour to be,
Sir,
Your most obedient servant,

Sd. M. G. Mehkri,

Secretary to Government,
Electrical Department.

P.T.O.

No.EDB. 2711 Dated Bangalore, 24th June 1941

Copy of the above, is forwarded, with compliments, to the Chief Electrical Engineer, for information, with reference to correspondence ending with his letter No.33262 dated the 19th May 1941.

Secretary to Government,
Electrical Department.

The reply to this communication should be addressed to the Secretary to the Resident in Mysore, Bangalore, by designation and not by name.

SUPPLY OF ELECTRICITY TO THE HINDUPUR MUNICIPALITY.

SIR,

I am directed to refer to your letter No.E.D.S. 2710, dated the 24th June 1941.

2. The Government of Madras now write that it is not convenient to take power at 25 cycles from the Mysore Government for use by the Hindupur Municipality. They enquire whether it will be possible for the Government of Mysore to supply power at 50 cycles in the near future, and if so, when and also whether they would be willing to supply it at 6 pies per unit.

3. I am to request you if there is no objection kindly to furnish the information asked for by the

Government
